Foreword	Dennis Baker	iii
Preface		v
Contributors		xiii

PART I General Concepts

1. Introduction to the Response of Plants to Environmental Stresses	H. R. Lerner	1
2. The Importance of Individuality	Anthony J. Trewavas	27
3. Plant Cell Wall Modifications Induced by Adaptation to Growth on the Herbicide 2,6-Dichlorobenzonitrile	Deborah P. Delmer, Esther Shedletzky, and Miri Shmuel	43
4. Gene Switches and Stress Management: Modulation of Gene Expression by Transcription Factors	Eric Lam and Lee Meisel	51
5. Stressful Lifestyle-Associated Mutation in Microorganisms	Mary-Jane Lombardo, Reuben S. Harris, and Susan M. Rosenberg	71
6. Differentiation of Vegetative <i>Anabaena</i> Cells into Nitrogen-Fixing Heterocysts	Herbert Böhme and Bernd Masepohl	91

7. Genetic and Epigenetic Instability in Tissue Culture
and Regenerated Progenies 111
Paula M. Olhoft and Ronald L. Phillips
8. The Environment as an Active Generator of Adaptive Genomic Variation 149
Christopher A. Cullis
9. The Effect of Environmental Stress on Repetitive DNA Behavior in Plants 161
Paola Bassi
10. Plant Evolution: Toward an Adaptive Theory 171
G. N. Amzallag
11. Oxidative Stress as a Regulator of Environmental Responses in Plants 247
Alex Levine
12. The Alternative Oxidase: Is It a Respiratory Pathway Allowing a Plant
to Cope with Stress? 265
Bert H. Simons and Hans Lambers
13. Role of Phytohormones in Plant Responses to Stresses 287
Chanan Itai
14. Regulation of Gene Expression by Abscissic Acid During
Environmental Stress 303
Aine L. Plant and Elizabeth A. Bray
15. Abscissic Acid: A Long Distance Stress Signal in Salt-Stressed Plants 333
Wolfram Hartung and W. Dieter Jeschke

PART II Plant Responses to Particular Stresses or Interactions with Other Organisms or Viruses

16. Metabolic Aspects of the Phosphate Starvation Response in Plants 349
William C. Plaxton and M. Christian Carswell
17. The Response of Plants to Oxygen Deprivation: Role of Enzyme
Induction in the Improvement of Tolerance to Anoxia 373
Pierre Saglio, Véronique Germain, and Bérénice Ricard
18. Some Effects of Environmental Factors on the Acquisition of
Inorganic Ions by Higher Plants 395
Brian C. Loughman and G. Ferrari
19. Involvement of the Cell Wall in Responses to Water Deficit and Flooding 413
Imad N. Saab

20. Stimulated Shoot Elongation: A Mechanism of Semiaquatic Plants to Avoid Submergence Stress <i>L. A. C. J. Voesenek and C. W. P. M. Blom</i>	431
21. Adaptations of the Photosynthetic Apparatus to Stress Conditions <i>Doris Godde</i>	449
22. Root Impedance: Sensing, Signaling and Physiological Effects <i>Josette Masle</i>	475
23. The Influence of Temperature Extremes on Gene Expression, Genomic Structure, and the Evolution of Induced Tolerance in Plants <i>Charles Guy</i>	497
24. Regulation of the γ -Aminobutyrate-Synthesizing Enzyme, Glutamate Decarboxylase, by Calcium-Calmodulin: A Mechanism for Rapid Activation in Response to Stress <i>Wayne A. Snedden and Hillel Fromm</i>	549
25. Plant Desiccation <i>John Chandler and Dorothea Bartels</i>	575
26. Evolutionary Consequences of Transition to a Lichen Symbiotic State and Physiological Adaptation to Oxidative Damage Associated with Poikilohydry <i>Ilse Kranner and François Lutzoni</i>	591
27. The Involvement of Flavonoids, Nod Factors, and Phytohormones in Nodulation <i>Yiwen Fang and Ann M. Hirsch</i>	629
28. Conifer Chemical Defenses Against Bark Beetles: The Modulation of Monoterpene Biosynthesis by Wounding, Environmental Stress, and Ethylene <i>Efraim Lewinsohn, Sadanobu Katoh, and Rodney Croteau</i>	659
29. Plant Responses to Pathogens <i>Marcos Lusso and Joseph Kuć</i>	683
30. Viral Pathogens and Host Plant Interactions: Mutual Survival <i>Raffi Salomon</i>	707
<i>Index</i>	719
