

Contents

Acknowledgements	6
1 Introduction	7
2 Protein chemistry	9
2.1 Actin and actin-binding proteins	9
2.2 Tubulin and microtubule polymerization	14
2.3 Intermediate filament proteins	17
2.4 Proteins that associate with several filament systems	20
2.5 Potential microtrabecular proteins	21
2.6 Covalent modification of cytoskeletal proteins	22
3 Cytoskeletal architecture	24
3.1 Red blood cells	24
3.2 Platelets	26
3.3 Fibroblasts	29
3.4 Muscle	33
3.5 Epithelial and endothelial cells	38
3.6 Transformed cells	45
3.7 Protists	45
3.8 Plants	47
4 Cytoskeletal choreography	50
4.1 Cytoskeletal drugs and drugs with secondary cytoskeletal effects	50
4.2 Control of cell movement and shape	52
4.3 Cytoskeletal interactions with the plasma membrane and the extracellular matrix	58
4.4 Intracellular movement and transcytosis	60
4.5 Mitosis and assembly	63
4.6 The cytoskeleton and gene expression	67
4.7 Transformation	69
