Section I. CELLULAR ASPECTS

Protoplasts and Somatic Cell Hybridization in Plants	1
<i>O. L. Gamborg, F. Constabel, K. N. Kao, L. C. Fowke, K. Ohyama, L. Pelcher, and K. K. Kartha</i>	
Opportunities and Obstacles in the Culture of Cereal Protoplasts and Calluses	13
<i>A. W. Galston, W. Adams, Jr., F. Brenneman, Y. Fuchs, M. Rancillac, R. K. Reid, R. K. Sawhney, and B. Staskawicz</i>	
Novel Cellular Associations Formed <i>In Vitro</i>	43
<i>Peter S. Carlson</i>	
Isolation of Biochemical Mutants of Cultured Plant Cells	57
<i>Jack M. Widholm</i>	
The Applicability of Plant Cells and Tissue Culture Techniques to Plant Improvement	67
<i>Oliver E. Nelson, Jr.</i>	

Section II. GENETIC ASPECTS

- Transducing Viruses and Viral Integration:
Techniques for Genetic Modification** 77
*Kazunori Shimada, Robert A. Weisberg,
and Max E. Gottesman*

- Interactions of Bacterial Viruses and Bacterial Genes
with Animal Systems** 83
Carl R. Merrill

- Appendix A: Phage Gene Directed Enzyme
Activity in Genetically Defective Human Cells** 96
*Jurgen Horst, Fridrich Kluge, Konrat
Beyreuther, and Wolfgang Gerok*

- Appendix B: Phage-Mediated Transgenosis in
Human Galactosemic Fibroblasts** 98
Barry G. Rolfe

- Gene Transfer in *Drosophila melanogaster*** 101
Allen S. Fox

- Phage-Mediated Transgenosis in Plant Cells** 133
Colin H. Doy

- Physical and Biological Studies of DNA Uptake
by Plants** 137
A. Kleinhofs

- Molecular Genetic Modification of Legumes** 149
F. B. Holl

- New Genetic Approaches to Plant Protection against
Diseases** 159
P. R. Day

- Index** 167
