Conference Participants	vii
Preface	xiii

BOOK A

Section 1. Human Herpesviruses

Consequences of Persistent Epstein-Barr Virus Infections	3
W. Henle and G. Henle	
Multistep Carcinogenesis, Epstein-Barr Virus, and Human Malignancies	11
G. de-The	
New Intracellular States of Epstein-Barr Virus DNA in the Burkitt's-lymphoma-derived Raji Cell Line	23
E. Gussander and A. Adams	
Recombination between Epstein-Barr Virus Genomes	35
K.O. Fresen, M.-S. Cho, and H. zur Hausen	
Epstein-Barr Virus from the Malignant Cells of Two Nasopharyngeal Carcinomas: Biological and Biochemical Observations on the Isolates	45
M.A. Epstein, D.H. Crawford, B.G. Achong, S. Finerty, J.L. Thompson, and G.W. Bornkamm	
Antibody to Viral Capsid Antigens of Epstein-Barr Virus and Cytomegalovirus in Patients with Carcinoma of the Esophagus	55
R. Nategh, A. Attarzadeh, B. Aramesh, D. Mojtabai, S. Amiri, F. Modabber, K. Dowlatshaki, J. Waner, and J. Kmet	

Transformation by Herpes Simplex Viruses F. Rapp	63
Herpes Simplex Virus Type 2 and Cervical Cancer: Cells Transformed by a Viral DNA Fragment Express the Cervical-tumor-associated Antigen AG-4 L. Aurelian, R.J. Jariwalla, P.O.P. Ts'o, and I.I. Kessler	81
Herpes Simplex Virus Expression in Latently Infected Ganglion Cells and in Cervical Neoplasia J.K. McDougall, D.A. Galloway, D.J.M. Purifoy, K.L. Powell, R.M. Richart, and C.M. Fenoglio	101
Specific Antibodies to Herpes Simplex Virus Type 2 among Women with Cervical Cancer W.E. Rawls, A. Clarke, K.O. Smith, J.J. Docherty, S.C. Gilman, and S. Graham	117

Section 2. Animal Herpesviruses

Herpesvirus Saimiri Infection in Squirrel and Marmoset Monkeys L. Falk, R. Desrosiers, and R.D. Hunt	137
Generation of Recombinants between Different Strains of Herpesvirus Saimiri G. Kell, I. Müller, B. Fleckenstein, J.M. Koomey, and C. Mulder	145
Mechanism of Oropharyngeal Excretion of the Rabbit Mononucleosis-Lymphoma Agent, Herpesvirus Sylvilagus H.C. Hinze and K.W. Lee	163
Molecular Aspects of Marek's Disease Virus and Transformed Lymphoid Cells K. Nazerian and C. Kaschka-Dierich	171
Modification of Marek's Disease Pathogenesis by In Ovo Infection or Prior Vaccination B.W. Calnek, K.A. Schat, and J. Fabricant	185
Antigenic Difference between Marek's Disease Tumor-associated Surface Antigens of MSB-1 and RPL-1 Line Cells Derived from Marek's Disease Lymphoma T. Mikami, K. Suzuki, M. Kodama, M. Onuma, H. Izawa, and I. Okada	199

Section 3. Papilloma Viruses

Papilloma Viruses in Benign and Malignant Tumors of Cattle W.F.H. Jarrett, P.E. McNeil, H.M. Laird, B.W. O'Neill, J. Murphy, M.S. Campo, and M.H. Moar	215
--	-----

State of Bovine Papilloma Virus DNA in Connective-tissue Tumors W.D. Lancaster and C. Olson	223
Molecular Characterization of Papilloma Virus Genomes P.M. Howley, M.-F. Law, C. Hellman, L. Engel, M.C. Alonso, M.A. Israel, D.R. Lowy, and W.D. Lancaster	233
Characterization of Human and Bovine Papilloma Viruses and of the Humoral Immune Response to Papilloma Virus Infection H. Pfister, L. Gissmann, H. zur Hausen, and G. Gross	249
Epidermodysplasia Verruciformis: A Model for the Role of Papilloma Viruses in Human Cancer G. Orth, M. Favre, F. Breitburd, O. Croissant, S. Jablonska, S. Obalek, M. Jarzabek-Chorzelska, and G. Rzesä	259
Neoplastic Progression of the Shope Rabbit Papilloma J.W. Kreider	283
Distribution and State of Viral Nucleic Acid in Tumors Induced by Shope Papilloma Virus F.O. Wettstein and J.G. Stevens	301
Section 4. Polyoma Virus and Other Small DNA Viruses	
Human Polyoma Viruses: Evaluation of Their Possible Involvement in Human Cancer K.K. Takemoto	311
Human Papovavirus JVC: Natural History, Tumorigenicity, and Interaction with Human Cells in Culture B.L. Padgett and D.L. Walker	319
BK Virus DNA Sequences in Human Tumors and Normal Tissues and Cell Lines M.M. Pater, A. Pater, M. Fiori, J. Slota, and G. di Mayorca	329
Further Studies on the Relationship of SV40-like Viruses to Human Tumors E. Geissler, S. Scherneck, H. Waehle, W. Zimmermann, L. Luebke, H. Krause, M. Thelle, H.-J. Herold, M. Rudolph, F. Weickmann, and G. Nisch	343
Immunological Controls in Simian Papovavirus SV40-induced Neoplasia S.S. Tevethia	357
Characterization of a Lymphotropic Papovavirus H. zur Hausen, L. Gissmann, A. Mincheva, and J.F. Böcker	365
Human Adenovirus Transforming Genes: Group Relationships, Integration, Expression in Transformed Cells, and Analyses of Human Cancers and Tonsils M. Green, W.S.M. Wold, K.H. Brackmann, M.A. Cartas, P.R. Sanders, K. Olson, T.K. Lee, L. Young, T. Matsuo, and Q. Kapoor	373

Section 5. Hepatitis B Virus

Hepatitis B Virus and Primary Hepatocellular Carcinoma: Relationship of "Icrons" to Cancer B.S. Blumberg and W.T. London	401
Hepatitis B Virus and Hepatocellular Carcinoma P.L. Marlon and W.S. Robinson	423
Structures Specific for Hepatitis B Virus in Cytoplasmic Extracts of a Hepatoma Cell Line Producing Hepatitis-B Surface Antigen P.H. Hofschneider, O. Marquardt, T.-K. Wong, and V. Zaslavsky	435
Woodchuck Hepatitis Virus and Hepatocellular Carcinoma R.L. Snyder and J. Summers	447
Hepatitis B Virus and Woodchuck Hepatitis Virus Are Members of a Novel Class of DNA Viruses J. Summers, J.M. Smolec, B.G. Werner, T.J. Kelly, Jr., G.V. Tyler, and R.L. Snyder	459
Immunological Approach to Natural History, Early Diagnosis, and Etiology of Human Primary Hepatocellular Carcinoma Z. Sun, L. Wang, Q. Xia, Y.-Y. Chu, N. Wang, and Y.-L. Zhang	471
Hepatitis B Virus Infection and Primary Hepatocellular Carcinoma: Epidemiological, Clinical, and Virological Studies in Senegal from the Perspective of Prevention by Active Immunization P. Maupas, A. Goudeau, P. Coursaget, J.-P. Chiron, J. Drucker, F. Barin, J. Perrin, F. Denis, I. Diop Mar, and J. Summers	481

Section 6. Avian Retroviruses

Origin of RAV-0, the Endogenous Retrovirus of Chickens D. Frisby, R. MacCormick, and R. Weiss	509
Malignant Lymphoma of the Bursa of Fabricius: Analysis of Early Transformation P.E. Nelman, L. Jordan, R.A. Weiss, and L.N. Payne	519
New Hypothesis for Viral Induction of Lymphoid Leukosis in Chickens L.B. Crittenden	529
Viral Envelope Antigens and c Regions in Nonacute Disease Associated with Avian Leukosis Virus H.L. Robinson, M.N. Pearson, P.N. Tschlis, and J.M. Coffin	543
Lymphoid Leukosis Virus: Natural Transmission and Nonneoplastic Effects J.L. Spencer, J.S. Gavora, and R.S. Gowe	553
Structure and Function of Transformation-specific Sequences in the RNA of Avian Erythroblastosis Virus M.M.C. Lai, T.C. Wong, S.S.F. Hu, J.C. Nell, and P.K. Vogt	565

Genetic Content and Possible Origin of Defective Avian Leukemia Retroviruses	577
D. Stéhelin, S. Saule, M. Roussel, and N. Pluquet	

Section 7. Feline Retroviruses

Significance of the Feline Oncornavirus-associated Cell-membrane Antigen (FOCMA) in the Natural History of Feline Leukemia	589
M. Essex, A.H. Sliski, M. Worley, C.K. Grant, H. Snyder, Jr., W.D. Hardy, and L.B. Chen	
Natural Occurrence of Subgroups of Feline Leukemia Virus	603
O. Jarrett	
Comparative Structures of Unintegrated Linear DNA Intermediates of Snyder-Theilen Feline Leukemia and Sarcoma Viruses Cloned in Bacteriophage λ	613
C.J. Sherr, L.A. Fedele, M. Oskarsson, M. Sullivan, and G.F. Vande Woude	
Feline Leukemia Virus Genomes Associated with the Domestic Cat: A Survey of Normal and Leukemic Animals	623
F. Wong-Staal, R. Koshy, and R.C. Gallo	
Host-Virus Interactions in Progressive versus Regressive Feline Leukemia Virus Infection in Cats	635
E.A. Hoover, J.L. Rojko, and R.G. Olsen	
Long-term Immune Response to Feline Leukemia Virus Components in Cats after Natural Infection	653
H. Lutz, N.C. Pederson, J. Higgins, F.A. Troy, and G.H. Thellen	
Abrogation of Lymphocyte Functions by Feline Retroviral Protein: A Model for Immunosuppression	665
R.G. Olsen, L.E. Mathes, M.J. Tarr, M. Stiff, S. Nichols, S. Krakowka, and E.A. Hoover	
Immunology and Epidemiology of Feline Leukemia Virus Nonproducer Lymphosarcomas	677
W.D. Hardy, Jr., A.J. McClelland, E.E. Zuckerman, H.W. Snyder, Jr., E.G. MacEwen, D.P. Francis, and M. Essex	
Risk to Humans from Exposure to Feline Leukemia Virus: Epidemiological Considerations	699
N. Gutensohn, M. Essex, D.P. Francis, and W.D. Hardy, Jr.	

BOOK B

Section 8. Primate Retroviruses

Origins and Distributions of Genetically Transmitted Retroviruses of Primates	709
G.J. Todaro	
Factor Regulating the Onset of Chronic Myelogenous Leukemia in Gibbons	719
T.G. Kawakami and T.S. McDowell	

Characterization of Unique Nucleotide Sequences and Antigenic Determinants of a Type-C Virus Isolated from Normal Human Cells (HEL-12 Virus)	729
E. Hefti, J.T. Reynolds, S. Panem, and W.H. Kirsten	
Partial Characterization of the Virion Proteins of a Type-C RNA Virus Produced by a Human Histiocytic Lymphoma Cell Line	737
R.S. Goodenow, S. Brown, R. Levy, and H.S. Kaplan	
Recent Studies with Infectious Primate Retroviruses: Hybridization to Primate DNA and Some Biological Effects on Fresh Human Blood Leukocytes by Simian Sarcoma Virus and Gibbon Ape Leukemia Virus	753
R.C. Gallo, F. Wong-Staal, P.D. Markham, F. Ruscetti, V.S. Kalyanaraman, L. Ceccherini-Nelli, R. Dalla Favera, S. Josephs, N.R. Miller, and M.S. Reitz, Jr.	
Immunological Characterization of Reverse Transcriptases from Human Tumors: Evidence for Subgroup-specific Interspecies Antigenic Determinants on the Reverse Transcriptase Molecule	775
P. Chandra, L.K. Steel, H. Laube, S. Balikcioglu, B. Mildner, U. Ebener, K. Welte, and A. Vogel	
Prevalence of Natural Immunity to Type-D and Type-C Retroviruses in Primates	793
D.L. Fine and L.O. Arthur	
Evidence for Type-C Virus-related Antigens and Antibodies Cross-reactive with Type-C Viral Antigens in Human Tissues and Sera	815
P. Herbrink, G.N.P. van Muijen, F.J. van Bussel, J.E.T. Moen, J. Brouwer, and S.O. Warnaar	
Oncornavirus Synthesis in Human Teratocarcinoma Cultures and an Increased Antiviral Immune Reactivity in Corresponding Patients	835
R. Kurth, R. Löwer, J. Löwer, R. Harzmann, R. Pfeiffer, C.G. Schmidt, J. Fogh, and H. Frank	
Serological Reactivities of an Antiserum Against SiSV Nonproducer Cells	847
H.-J. Thiel, J.D. Igelhart, T.J. Matthews, A.W. Butchko, and D.P. Bolognesi	
Natural Human Antibodies Reactive with Carbohydrates on Oncoviral Glycoproteins	857
H.W. Snyder, Jr., M. Fox, and E. Fleissner	
Search for Evidence of Humoral Immunity to Oncoviruses in Man	869
M. Barbacid, J. Krakower, S.A. Aaronson, and D. Bolognesi	
 Section 9. Bovine and Ovine Retroviruses	
Bovine Leukemia: A Model for Viral Carcinogenesis	887
J.F. Ferrer, C. Cabradilla, and P. Gupta	

The Biology of Bovine Leukemia Virus Infection in Cattle	901
J.M. Miller and M.J. Van Der Maaten	
Some Properties of Bovine Leukemia Virus, Its Use in Seroepidemiological Studies, and Eradication of the Disease from Infected Herds	911
M. Musgay, B. Dietzschold, R. Lorenz, H.-D. Matheka, W. Matthaeus, O.C. Straub, F. Welland, J.W. Willesmith, B. Frenzel, and O.R. Kaaden	
Genomic Integration of Bovine Leukemia Provirus	927
R. Kettmann, G. Marbaix, A. Burny, M. Meunier-Rotival, J. Cortadas, G. Bernardi, and M. Mammerick	
Bovine Leukemia Virus: An Etiologic Agent Associated with Lymphosarcoma of Domestic Cattle	943
S.G. Devare	
Mutation as a Mechanism for Escape from Immunosuppression: The Visna Virus Example	953
J.E. Clements, O. Narayan, F.S. Pedersen, and W.A. Haseltine	

Section 10. Murine Retroviruses

The History of Viruses and Cancer in Wild Mice	971
M.B. Gardner, S. Rasheed, J.D. Estes, J. Casagrande, J.N. Ihle, and J.R. Stephenson	
Recombinant Murine Leukemia Viruses and Protective Factors in Leukemogenesis	989
P.J. Fischinger, J.N. Ihle, J.-P. Levy, D.P. Bolognesi, J. Elder, and W. Schäfer	
Isolation of Viruses that Induce Leukemia, Sarcoma, and Carcinoma from Mouse Fibroblast Cell Lines Chronically Infected with Endogenous Murine Leukemia Virus	1005
U.R. Rapp	
Molecular Parameters and Immunotherapy of Leukemia in BALB/Mo Mice	1021
R. Jaenisch, P. Nobis, D. Jähner, and H. Stuhlmann	
Analysis of Murine Retroviral Genes and Genes for Viral Membrane Receptors by Somatic-cell Genetics	1033
J. Hilkens, J. Hilgers, R. Michalides, M. van der Valk, B. van der Zelst, A. Colombatti, N. Hynes, and B. Groner	
Chronic Immunostimulation as a Possible Mechanism in Type-C Viral Leukemogenesis	1049
J.N. Ihle, J.C. Lee, L. Enjuanes, L. Cicurel, I. Horak, and L. Pepersack	
Methylcholanthrene-induced Lymphomagenesis in Mice of Crosses between RF/J and I/LnJ Strains Is Independent of Fv-1 Restriction	1065
A. Mayer, F. Lilly, and M.L. Duran-Reynals	

- B-cell and T-cell Malignant Lymphomas in C57BL/6 Mice
Induced by Different Recombinant Retroviruses Isolated
from X-irradiated Mice 1073

M. Haas

- Integrated and Proviral DNA Sequences Specific for Wild Rat
Tumor Virus and for Rat Hepatoma Helper Virus in Various
Laboratory and Wild Rat Tumor Cells: A Restriction
Enzyme Analysis 1083

S.S. Yang, L.-S.L. Yeh, J. Taub, N. Miller, and M.B. Gardner

Section 11. Mammary Tumor Viruses

- Expression of Endogenous Mammary Tumor Virus in Mice:
Its Genetic Control and Relevance to Spontaneous
Mammary Carcinogenesis 1095

P. Bentvelzen, J. Brinkhof, and F. Westenbrink

- Mouse Mammary Tumor Biology: A New Synthesis 1105

R.D. Cardiff and L.J.T. Young

- Diversity of Mammary Tumor Virus Genes and
Viral Gene Products in Rodent Species 1115

J. Schlom, W. Drohan, Y.A. Teramoto, J.M. Young, and P. Horan Hand

- Mouse Mammary Tumor Virus: Role of Class-specific
Antigenic Determinants on the Envelope Glycoprotein
in the Development of Autogenous Immunity and Binding
of Virus to Cell Receptors 1133

G. Schochetman, B. Altrock, L. Arthur, G. Lovinger, and R. Massey

- The Presence and Clinical Implications of a Virus-related
Protein in Human Breast Cancer 1149

S. Spiegelman, R. Mesa-Tejada, T. Ohno, M. Ramanarayanan, R. Nayak,
J. Bausch, C. Fenoglio, and I. Keydar

Section 12. Viruses and Cancer: Regulatory Factors

- Studies with Glucose-6-Phosphate Dehydrogenase
on the Origin of Human Neoplasms 1171

P.J. Flalkow

- Lymphocyte-mediated Cytotoxicity toward Virus-induced
Tumor Cells; Natural and Activated Killer Lymphocytes
in Man 1187

E. Klein, M.G. Masucci, W. Berthold, and B.A. Blazar

- The Role of Abnormal T-lymphocyte Differentiation
in Murine Leukemia Virus Expression and Leukemogenesis 1199

R.S. Schwartz, S.K. Datta, H. Hiai, P.J. Morrissey, and S.D. Waksal

- Unique Properties of Protective Antibodies Against
a Transplantable Murine Tumor 1209

T.J. Matthews, H.-J. Thiel, J.J. Collins, G.J. Roiloson, and D.P. Bolognesi

	Contents	xxiii
Epidemiology of Hodgkin's Disease in Young Adults: Compatibility with Various Infectious-disease Models T.M. Mack		1221
Oncofetal Antigens as Markers for Retrodifferentiation in Malignant Transformation H. Bauer and Y. Yoshikawa		1231
Organ-specific Expression of Particle-bound Reverse Transcriptase during Different Stages of Quail Embryogenesis H. Mondal, J. Jendis, and P.H. Hofschneider		1239
Herpesvirus-induced Atherosclerosis C.G. Fabricant, J. Fabricant, C.R. Minick, and M.M. Litrenta		1251
Summary: Tumor Virus Genes in the "Real World"— Current Status G. Todaro		1259
Author Index		1275
Subject Index		1277
