

TABLE OF CONTENTS

List of Illustrations	xi
I. The Fundamental Principles of Genetics	1
Mendel's Two Laws	1
Linkage	10
Crossing-Over	14
The Simultaneous Interchange of Many Genes in Crossing-Over	20
The Linear Order of the Genes	22
The Theory of the Gene	25
II. Particulate Theories of Heredity	26
III. The Mechanism of Heredity	32
The Mechanism of Mendel's Two Laws	33
The Number of the Linkage Groups and the Number of the Chromosome Pairs	36
The Integrity and Continuity of the Chromosomes	37
Mechanism of Crossing-Over	39
IV. Chromosomes and Genes	45
V. The Origin of Mutant Characters	59
VI. Are Mutant Recessive Genes Produced by Losses of Genes?	72
Recessive Characters and Absences of Genes	74
The Bearing of Reverse Mutation (Atavism) on the Interpretation of the Mutation Process	85
The Evidence from Multiple Allelomorphs	92
Conclusions	94
VII. The Location of Genes in Related Species	95
VIII. The Tetraploids, or Fourfold Type	105
Tetraploidy as a Means of Increasing the Number of Genes in a Species	130

IX. Triploids	131
X. Haploids	139
XI. Polyploid Series	150
The Polyploid Wheats	150
The Polyploid Roses	158
Other Polyploid Series	165
XII. Heteroploids	172
XIII. Species Crossing and Changes in Chromosome Number	191
XIV. Sex and Genes	199
The Insect Type (XX-XY)	199
The Avian Type (WZ-ZZ)	206
Sex-Chromosomes in Dioecious Flowering Plants	212
Sex-Determination in Mosses	214
XV. Other Methods of Sex-Determination Involving the Sex-Chromosomes	219
The Attachment of the X-Chromosome to Autosomes	219
The Y-Chromosome	222
Degeneration of Male-Producing Sperm	228
The Elimination of one X-Chromosome from a Diploid Egg to Produce a Male	228
Sex-Determination through the Accidental Loss of a Chromosome in Spermatogenesis	231
Diploid Females and Haploid Males	233
XVI. Intersexes	240
Intersexes from Triploid <i>Drosophila</i>	240
Intersexes in the Gypsy Moth	243
The Free Martin	247
XVII. Sex Reversals	250
Environmental Changes	251
Changes of Sex Associated with Age	254

TABLE OF CONTENTS

ix

131	Sex and Sex Reversal in Frogs	256
139	Transformation of Bidder's Organ of the Male Toad into an Ovary	266
150	Sex Reversal in Miastor	269
150	Sex Reversal in Birds	271
158	The Effect of Ovariectomy in Birds	272
165	The Sex of Parabioidic Salamander Twins	275
172	Sex Reversal in Hemp	276
	XVIII. Stability of the Gene	281
	XIX. General Conclusions	300
191	The Effects Produced by a Change in Chromosome Number and by a Change in a Gene	300
199	Is the Mutation Process Due to a Degradation of the Gene?	307
206	Are Genes of the Order of Organic Molecules?	309
212		
214	Bibliography	311
219	Index	337
