

Molecular Biology of Microbial Differentiation

Contents

Preface.....	ix
MOLECULAR CLONING AND GENETICS OF SPORULATION AND GERMINATION GENES	
Genes Controlling Development in <i>Bacillus subtilis</i> . PATRICK J. PIGGOT AND JAMES A. HOCH.....	1-7
Molecular Cloning and Nucleotide Sequence of the <i>spo0A</i> Locus and Its Mutations. FRANCO A. FERRARI, KATHLEEN TRACH, DOMINIQUE LE COQ, AND JAMES A. HOCH.....	8-14
Analysis of the Control of <i>spo</i> Gene Expression in <i>Bacillus subtilis</i> . P. J. PIGGOT, J. W. CHAPMAN, AND C. A. M. CURTIS.....	15-21
<i>Bacillus subtilis</i> Genes Involved in Spore Outgrowth. MAURIZIO GIANNI, FRANCESCO SCOFFONE, AND ALESSANDRO GALIZZI.....	22-28
Functions of <i>spo0F</i> Upstream Region for the Sporulation of <i>Bacillus subtilis</i> . HIROFUMI YOSHIKAWA, HIDETAKA SONE, TATSUYA SEKI, FUJIO KAWAMURA, AND HIUGA SAITO.....	29-34
Progress in the Molecular Genetics of Spore Germination in <i>Bacillus subtilis</i> 168. ANNE MOIR, IAN M. FEAVERS, AAMIR R. ZUBERI, RACHEL L. SAMMONS, IAN S. ROBERTS, JEFFREY R. YON, EDITH A. WOLFF, AND DEREK A. SMITH.....	35-46
Use of Tn917-Mediated Transcriptional Gene Fusions to <i>lacZ</i> and <i>cat-86</i> for the Identification and Study of <i>spo</i> Genes in <i>Bacillus subtilis</i> . PHILIP YOUNGMAN, JOHN B. PERKINS, AND KATHLEEN SANDMAN.....	47-54
Use of Cloned <i>spoIIA</i> and <i>spoVA</i> Probes to Study Synthesis of mRNA in Wild-Type and Asporogenous Mutants of <i>Bacillus subtilis</i> . DEMETRIS SAVVA AND JOEL MANDELSTAM.....	55-59
Small, Acid-Soluble Spore Proteins of <i>Bacillus</i> : Products of a Sporulation-Specific, Multigene Family. EDWARD R. FLISS, MICHAEL J. CONNORS, CHARLES A. LOSHON, EVERARDO CURIEL-QUESADA, BARBARA SETLOW, AND PETER SETLOW.....	60-66
Cloning of <i>gerJ</i> and Other Genes from the <i>spoIIA-tyrA</i> Region of <i>Bacillus subtilis</i> . R. J. WARBURG, M. P. DAVIS, I. MAHLER, D. J. TIPPER, AND H. O. HALVORSON.....	67-70
Characterization of the Gene for Glucose Dehydrogenase and Flanking Genes of <i>Bacillus subtilis</i> . BRENDA URATANI, KEITH A. LAMPEL, ROBERT H. LIPSKY, AND ERNST FREESE.....	71-76
Regulation of the <i>Bacillus spo0H</i> Gene. I. SMITH, E. DUBNAU, J. WEIR, J. OPPENHEIM, N. RAMAKRISHNA, AND K. CABANE.....	77-84
Cloning, Amplification, and Characterization of Sporulation Genes, Especially <i>spoIIIG</i> , of <i>Bacillus subtilis</i> . YASUO KOBAYASHI AND HIROYUKI ANAGUCHI.....	85-94
CHARACTERIZATION OF CLONED GENES AND THEIR REGULATORY SIGNALS	
Expression of Cloned Protease Genes in <i>Bacillus subtilis</i> . DENNIS J. HENNER, MARIA YANG, LOUISE BAND, AND JAMES A. WELLS.....	95-103
Identification of a Positive Retroregulator That Functions in <i>Escherichia coli</i> and <i>Bacillus subtilis</i> . HING C. WONG AND SHING CHANG.....	104-109
Penicillinase Synthesis in <i>Bacillus licheniformis</i> : Nature of Induction. ANTHONY J. SALERNO, NANCY J. NICHOLLS, AND J. OLIVER LAMPEN.....	110-116
<i>Bacillus subtilis</i> Secretion Vectors for Proteins and Oligopeptides Constructed from <i>B. subtilis</i> α -Amylase Genes. KUNIO YAMANE, TERUAKI SHIROZA, TAKASHI FURUSATO, KOUJI NAKAMURA, KIYOSHI NAKAZAWA, KAZUO YANAGI, MAKARI YAMASAKI, AND GAKUZO TAMURA.....	117-123
Two Structural Genes for Alkaline Phosphatase in <i>Bacillus licheniformis</i> Which Require Different RNA Polymerase Holoenzymes for Transcription: a Possible Explanation for Complex Synthesis and Localization Data. F. MARION HULETT.....	124-134

Transcription, Processing, and Expression of tRNA Genes from <i>Bacillus subtilis</i> . BARBARA S. VOLD AND CHRISTOPHER J. GREEN	135-141
---	---------

CONTROL OF DEVELOPMENTAL TRANSCRIPTION

Isolation of Genomic Segments from <i>Bacillus subtilis</i> that Contain Promoters for σ^{28} RNA Polymerase, and Studies on Regulation of Their Transcription in <i>B. subtilis</i> and <i>Escherichia coli</i> . M. J. CHAMBERLIN, J.-F. BRIAT, V. L. SINGER, J. S. GLENN, J. HELMANN, A. LEUNG, M. B. MOOREFIELD, AND M. Z. GILMAN	143-148
Localizing the Site of <i>spo0</i> -Dependent Regulation in the <i>spoVG</i> Promoter of <i>Bacillus</i> <i>subtilis</i> . PETER ZUBER	149-156
Major Sigma Factor, Sigma-43, of <i>Bacillus subtilis</i> RNA Polymerase and Interacting <i>spo0</i> Products Are Implicated in Catabolite Control of Sporulation. ROY H. DOI, MICHAEL GITT, LIN-FA WANG, CHESTER W. PRICE, AND FUJIO KAWAMURA	157-161
P^{31} , a σ^{29} -Like RNA Polymerase Binding Protein of <i>Bacillus subtilis</i> . JANINE E. TREMPY, TERRY L. LABELL, G. L. RAY, AND W. G. HALDENWANG	162-169
Effects of Base Substitutions in a Complex Promoter from <i>Bacillus subtilis</i> . REGINE E. HAY AND CHARLES P. MORAN, JR.	170-175
The <i>Bacillus subtilis spo0</i> Regulon: Intergenic Suppression Analysis of Initiation Control. ABRAHAM LEUNG, DEAN NG, CHARLES YANG, SHERYL RUBINSTEIN, CATHERINE DEEDE, WENDY PUTNAM, AND TERRANCE LEIGHTON	176-179
Effect of Sporulation Mutations on Subtilisin Expression, Assayed Using a Subtilisin- β -Galactosidase Gene Fusion. EUGENIO FERRARI, SANDRA M. H. HOWARD, AND JAMES A. HOCH	180-184

METABOLIC CONTROL OF GENE EXPRESSION AND SPORULATION

Recent Progress in Metabolic Regulation of Sporulation. ABRAHAM L. SONENSHEIN ...	185-193
Metabolic Initiation of Spore Development. E. FREESE, E. B. FREESE, E. R. ALLEN, Z. OLEMPKA-BEER, C. ORREGO, A. VARMA, AND H. WABIKO	194-202
Organization and Cloning of a Gluconate (<i>gnt</i>) Operon of <i>Bacillus subtilis</i> . YASUTARO FUJITA, JUN-ICHI NIHASHI, AND TAMIE FUJITA	203-208

ENDOTOXIN FORMATION IN SPORULATING ORGANISMS

Protein Toxins of Bacilli. H. E. SCHNEPF AND H. R. WHITELEY	209-216
Cloning and Expression in <i>Escherichia coli</i> of the Crystal Protein Gene from <i>Bacillus</i> <i>thuringiensis</i> Strain <i>aizawa</i> 7-29 and Comparison of the Structural Organization of Genes from Different Serotypes. ANDRÉ KLIER, DIDIER LERECLUS, JACQUES RIBIER, CATHERINE BOURGOUIN, GHISLAINE MENOU, MARGUERITE-M. LECADET, AND GEORGES RAPOPORT	217-224
Structure and Expression of Cloned <i>Bacillus thuringiensis</i> Toxin Genes. H. R. WHITELEY, J. W. KRONSTAD, AND H. E. SCHNEPF	225-229
Biochemistry, Genetics, and Mode of Action of <i>Bacillus thuringiensis</i> δ -Endotoxins. DAVID J. ELLAR, WENDY E. THOMAS, BARBARA H. KNOWLES, SALLY WARD, JOHN TODD, FRANCIS DROBNIEWSKI, JANE LEWIS, TREVOR SAWYER, DAVID LAST, AND COLIN NICHOLS	230-240
Biocidal Gene(s) of <i>Bacillus sphaericus</i> Cloned and Expressed in <i>Escherichia coli</i> . JOHN LOUIS AND JEKISIEL SZULMAJSTER	241-245
Plasmids and Delta-Endotoxin Production in Different Subspecies of <i>Bacillus thurin-</i> <i>giensis</i> . BRUCE C. CARLTON AND JOSÉ M. GONZÁLEZ, JR.	246-252

MICROBIAL DIFFERENTIATION SYSTEMS

Differential Expression of Two Homologous Genes Coding for Spore-Specific Proteins in <i>Myxococcus xanthus</i> . MARTIN TEINTZE, TEIICHI FURUICHI, ROLLAND THOMAS, MASAYORI INOUE, AND SUMIKO INOUE	253-260
--	---------

Organization and Transcription of <i>Anabaena</i> Genes Regulated During Heterocyst Differentiation. ROBERT HASELKORN, STEPHANIE E. CURTIS, JAMES W. GOLDEN, PETER J. LAMMERS, SANDRA A. NIERZWICKI-BAUER, STEVEN J. ROBINSON, AND NILGUN E. TUMER	261-266
Approaches to the Study of Cell Differentiation in <i>Caulobacter crescentus</i> . AUSTIN NEWTON, NORIKO OHTA, EDWARD HUGUENEL, AND LING-SING CHEN	267-276
Author Index	277
Subject Index	278-280
