

Chapter 1 Organizing and Summarizing Data	1
1.1 Introduction / 1	
1.2 Some Basic Concepts / 1	
1.3 Computers and Biostatistical Analysis / 3	
1.4 The Ordered Array / 4	
1.5 Grouped Data—The Frequency Distribution / 6	
1.6 Measures of Central Tendency / 19	
1.7 Measures of Dispersion / 24	
1.8 Measures of Central Tendency Computed from Grouped Data / 28	
1.9 The Variance and Standard Deviation—Grouped Data / 35	
1.10 Summary / 38	
Review Questions and Exercises / 39	
References / 42	
Chapter 2 Some Basic Probability Concepts	44
2.1 Introduction / 44	
2.2 Two Views of Probability—Objective and Subjective / 44	
2.3 Elementary Properties of Probability / 46	
2.4 Set Theory and Set Notation (Basic Notions) / 47	
2.5 Counting Techniques—Permutations and Combinations / 51	
2.6 Calculating the Probability of an Event / 58	
2.7 Summary / 65	
Review Questions and Exercises / 65	
References / 68	
Chapter 3 Probability Distributions	70
3.1 Introduction / 70	
3.2 Probability Distributions of Discrete Variables / 70	
3.3 The Binomial Distribution / 73	
3.4 The Poisson Distribution / 81	
3.5 Continuous Probability Distributions / 85	
3.6 The Normal Distribution / 87	

- 3.7 Summary / 98
- Review Questions and Exercises / 98
- References / 100

Chapter 4 Some Important Sampling Distributions 102

- 4.1 Introduction / 102
- 4.2 Simple Random Sampling / 102
- 4.3 Sampling Distributions / 106
- 4.4 Distribution of the Sample Mean / 106
- 4.5 Distribution of the Difference Between Two Sample Means / 115
- 4.6 Distribution of the Sample Proportion / 120
- 4.7 Distribution of the Difference Between Two Sample Proportions / 123
- 4.8 Summary / 125
- Review Questions and Exercises / 125
- References / 127

Chapter 5 Estimation 129

- 5.1 Introduction / 129
- 5.2 Confidence Interval for a Population Mean / 132
- 5.3 The t Distribution / 138
- 5.4 Confidence Interval for the Difference Between Two Population Means / 143
- 5.5 Confidence Interval for a Population Proportion / 151
- 5.6 Confidence Interval for the Difference Between Two Population Proportions / 152
- 5.7 Determination of Sample Size for Estimating Means / 154
- 5.8 Determination of Sample Size for Estimating Proportions / 157
- 5.9 Confidence Interval for the Variance of a Normally Distributed Population / 158
- 5.10 Confidence Interval for the Ratio of the Variances of Two Normally Distributed Populations / 163
- 5.11 Summary / 167
- Review Questions and Exercises / 167
- References / 189

Chapter 6 Hypothesis Testing 191

- 6.1 Introduction / 191
- 6.2 Hypothesis Testing: A Single Population Mean / 195
- 6.3 Hypothesis Testing: The Difference Between Two Population Means / 209
- 6.4 Paired Comparisons / 218
- 6.5 Hypothesis Testing: A Single Population Proportion / 223
- 6.6 Hypothesis Testing: The Difference Between Two Population Proportions / 225

- 6.7 Hypothesis Testing: A Single Population Variance / 228
- 6.8 Hypothesis Testing: The Ratio of Two Population Variances / 230
- 6.9 Summary / 233
- Review Questions and Exercises / 234
- References / 272

Chapter 7 Analysis of Variance

274

- 7.1 Introduction / 274
- 7.2 The Completely Randomized Design / 275
- 7.3 The Randomized Complete Block Design / 297
- 7.4 The Factorial Experiment / 305
- 7.5 Miscellany / 317
- 7.6 Summary / 320
- Review Questions and Exercises / 320
- References / 362

Chapter 8 Simple Linear Regression and Correlation

366

- 8.1 Introduction / 366
- 8.2 The Regression Model / 367
- 8.3 The Sample Regression Equation / 368
- 8.4 Evaluating the Regression Equation / 378
- 8.5 Using the Regression Equation / 393
- 8.6 The Correlation Model / 398
- 8.7 The Correlation Coefficient / 399
- 8.8 Some Precautions / 410
- 8.9 Summary / 411
- Review Questions and Exercises / 412
- References / 437

Chapter 9 Multiple Regression and Correlation

439

- 9.1 Introduction / 439
- 9.2 The Multiple Regression Model / 440
- 9.3 Obtaining the Multiple Regression Equation / 441
- 9.4 Evaluating the Multiple Regression Equation / 451
- 9.5 Using the Multiple Regression Equation / 458
- 9.6 Qualitative Independent Variables / 462
- 9.7 The Multiple Correlation Model / 477
- 9.8 Choosing the Independent Variables for the Multiple Regression Equation / 485
- 9.9 Summary / 486
- Review Questions and Exercises / 486
- References / 525

Chapter 10 The Chi-Square Distribution and the Analysis of Frequencies	528
10.1 Introduction / 528	
10.2 The Mathematical Properties of the Chi-Square Distribution / 528	
10.3 Tests of Goodness-of-Fit / 531	
10.4 Tests of Independence / 542	
10.5 Tests of Homogeneity / 551	
10.6 Summary / 558	
Review Questions and Exercises / 558	
References / 574	
Chapter 11 Nonparametric and Distribution-Free Statistics / 576	
11.1 Introduction / 576	
11.2 Measurement Scales / 577	
11.3 The Sign Test / 579	
11.4 The Wilcoxon Signed-Rank Test for Location / 586	
11.5 The Median Test / 589	
11.6 The Mann-Whitney Test / 592	
11.7 The Kolmogorov-Smirnov Goodness-of-Fit Test / 596	
11.8 The Kruskal-Wallis One-Way Analysis of Variance by Ranks / 602	
11.9 The Friedman Two-Way Analysis of Variance By Ranks / 608	
11.10 The Spearman Rank Correlation Coefficient / 613	
11.11 Nonparametric Regression Analysis / 621	
11.12 Summary / 624	
Review Questions and Exercises / 624	
References / 628	
Chapter 12 Vital Statistics	631
12.1 Introduction / 631	
12.2 Death Rates and Ratios / 632	
12.3 Measures of Fertility / 638	
12.4 Measures of Morbidity / 640	
12.5 Summary / 642	
References / 642	
Appendix I Some Basic MINITAB Data Handling Commands	643
Appendix II Statistical Tables	649
Answers to Odd Numbered Exercises	727
Index	737
