

MODERN TRENDS OF RESEARCH IN ZOOLOGY

CONTENTS

Page No.

(A) Environment/Wildlife/Biodiversity

1. Success story of combating desertification through people's participation 1
2. Gene pool fragmentation hypothesis and vanishing wildlife 13
3. Biodiversity—conservation : Concept of protected areas 24

(B) Toxicology/Pollution

4. Fluctuations in nucleotide degradation enzymes and cholesterol during heavy metals intoxication and detoxication 31
5. Effect of mercuric chloride on cholesterol and glucose level in mice testes 59
6. Toxicity of dietary selenium in the fingerling of *Catla catla* (Ham.) 65
7. Effect of dietary selenium on certain growth and biochemical profiles in the fingerlings of *Cirrhinus mrigala* (Ham.) 73
8. Impact of textile pollutants on erythrocyte count in male wistar rats 84

9. Toxicity of isoproturon to the fish <i>Puntius ticto</i>		90
10. Acute toxicity of 2, 4,-D to the seed of Indian major carp, <i>Catla catla</i>		96
11. Cobalt and manganese induced biochemical alterations in Hepato-renal tissues of rat		106
12. Praquat Induced Histopathological lesions in the gill of fish, <i>Catla catla</i>	...	116

(C) Endocrinology

13. Radioimmunoassay, the most reliable technique for the estimation of hormones : Some findings on the role of temperature and photoperiod in the thyroid functions of <i>Calotes versicolor</i>		121
14. Changes in thyroid concentrations in relation to seasonal events in Jungle Bush Quail, <i>Perdica asiatica asiatica</i>		129
15. Nucleus lateralis tuberis in <i>Silonia silondia</i> (Ham.)		145
16. Histochemical nature of pineal organ in two fresh water teleosts <i>P. ticto</i> (Ham.) and <i>L. reticulatus</i> (Peters)		151

(D) Parasitology/Immunology

17. Hypcholesterolemia in murine Ancylostomiasis		157
--	------	-----

18. <i>In vitro</i> studies on the suceptibility of the tick (<i>Hyalomma anatolicum anatolicum</i>) to acaricides using F.A.O. test kit		164
19. Immune response during experimental infection of <i>Nematosprioides dubius</i> in Swiss albino mice		169
20. Experimental study on morphology and clinical observation of <i>Theileria annulata</i> strain in male calves		175

(E) Biotechnology/Agriculture Entomology

21. Biotechnological approach in synthesizing new genotypes of silkworm <i>Bombyx mori</i> (L)		182
22. Assessment of yield losses caused by leaf webber and capsule borer insect (<i>Antigastra catalaunalis</i>) in different cultivar of sesame		194
23. Sources of resistance to loose smut, wire-worm insect of wheat and screening under rainfed condition		199

(F) Limnology

24. Effect of Flora and Fauna of fish population of a pond		205
25. Some salient features of a wintering habitat of aquatic birds		212
26. Secchi disc transparency of Kalika Pond. Distt. Dhar (M.P.)		220

27. Assessment of physico-chemical parameter 224
of the River Narmada at Maheshwar

(G) Snake Biology

28. Biology of checkered keelback water snake 231
Xenochrophis piscator, Part -I
