

MOLECULAR AND DEVELOPMENTAL BIOLOGY OF CARTILAGE

Editors and Conference Organizers

BENOIT DE CROMBRUGGHE, WILLIAM A. HORTON, BJORN REINO OLSEN,
and FRANCESCO RAMIREZ

CONTENTS

Preface. By BENOIT DE CROMBRUGGHE, WILLIAM A. HORTON, BJORN REINO OLSEN, and FRANCESCO RAMIREZ	xiii
Retinoid Signaling in Vertebrate Limb Development. By CHRISTINA THALLER and GREGOR EICHELE	1
Genetic Analysis of the Retinoid Signal. By VINCENT GIGUÈRE, DIANA FAWCETT, JIANGMING LUO, RONALD M. EVANS, and HENRY M. SUCOV	12
Growth Factor Interactions in Limb Development. By LEE NISWANDER	23
Pax Genes and Skeletal Development. By RUDI BALLING, UTE HELWIG, JOE NADEAU, ANNETTE NEUBÜSER, WOLFGANG SCHMAHL, and KENJI IMAI	27
Function of Homeobox Genes in Skeletal Development. By MARIO R. CAPECCHI	34
<i>Dlx5</i> and <i>Dlx6</i> : An Evolutionary Conserved Pair of Murine Homeobox Genes Expressed in the Embryonic Skeleton. By XIAOWEI CHEN, XUE LI, WEIDONG WANG, and THOMAS LUFKIN	38
Function of the <i>Msx2</i> Gene in the Morphogenesis of the Skull. By YI-HSIN LIU, LIANG MA, RAMENDRA KUNDU, MICHAEL IGNEZI, FRANK SANGIORGI, LANYING WU, WEN LUO, MALCOLM L. SNEAD, and ROB MAXSON	48
Signaling Pathways in Skeletal Formation: A Role for BMP Receptors. By VICKI ROSEN, R. SCOTT THIES, and KAREN LYONS	59

^aThis volume contains the papers from a conference entitled *Molecular and Developmental Biology of Cartilage*, which was held by the New York Academy of Sciences in Bethesda, Maryland, on September 27-30, 1995.

The Role of BMPs and GDFs in Development of Region-Specific Skeletal Structures. By JENNIFER A. KING, ELAINE E. STORM, PAUL C. MARKER, RALPH J. DiLEONE, and DAVID M. KINGSLEY	70
BMP Signaling in <i>Drosophila</i> Embryogenesis. By KAVITA ARORA, MICHAEL B. O'CONNOR, and RAHUL WARRIOR	80
BMP 7 Is Required for Nephrogenesis, Eye Development, and Skeletal Patterning. By GERARD KARSENTY, GUANGBIN LUO, CLEMENTINE HOFMANN, and ALLAN BRADLEY	98
A New Subclass of Helix-Loop-Helix Transcription Factors Expressed in Paraxial Mesoderm and Chondrogenic Cell Lineages. By ERIC N. OLSON, DORIS BROWN, ROB BURGESS, and PETER CSERJESI	108
Role of Parathyroid Hormone-Related Protein in Skeletal Development. By HENRY M. KRONENBERG, ANDREW C. KARAPLIS, and BEATE LANSKE	119
Role of Cartilage Collagens in Formation of the Skeleton. By BJORN REINO OLSEN	124
Sulfate Transport in Chondrodysplasia. By JOANNA HÄSTBACKA, ANDREA SUPERTI-FURGA, WILLIAM R. WILCOX, DAVID L. RIMOIN, DANIEL H. COHN, and ERIC S. LANDER	131
Campomelic Dysplasia with XY Sex Reversal: Diverse Phenotypes Resulting from Mutations in a Single Gene. By ALAN J. SCHAFER, JAMIE W. FOSTER, CHENI KWOK, POLLY A. WELLER, SILVANA GUIOLI, and PETER N. GOODFELLOW	137
Progress in Human Chondrodysplasias: Molecular Genetics. By WILLIAM A. HORTON	150
Mutations Affecting Multiple Functional Domains of FGFR3 Cause Different Skeletal Dysplasias: A Personal Retrospective in Honor of John Wasmuth. By DANIEL H. COHN	160
Fibroblast Growth Factor Receptor-2 Mutations in Craniosynostosis. By SUE MALCOLM and WILLIAM REARDON	164
The Role of <i>Msx</i> Genes in Mammalian Development. By RICHARD MAAS, YI PING CHEN, MARIANNA BEI, IAN WOO, and ICHIRO SATOKATA	171
Hypochondroplasia: Molecular Analysis of the Fibroblast Growth Factor Receptor 3 Gene. By GARY A. BELLUS, IAIN MCINTOSH, JINNY SZABO, ARTHUR AYLSWORTH, ILKKA KAITILA, and CLAIR A. FRANCOMANO	182
Mutations in the Cartilage Oligomeric Matrix Protein (COMP) Gene in Pseudoachondroplasia and Multiple Epiphyseal Dysplasia. By DANIEL H. COHN, MICHAEL D. BRIGGS, LILY M. KING, DAVID L. RIMOIN, WILLIAM R. WILCOX, RALPH S. LACHMAN, and ROBERT G. KNOWLTON	188
A Family of Chondrodysplasias Caused by Mutations in the <i>Diastrophic Dysplasia Sulfate Transporter</i> Gene and Associated with Impaired Sulfation of Proteoglycans. By A. SUPERTI-FURGA, J. HÄSTBACKA, A. ROSSI, J. J. VAN DER HARTEN, W. R. WILCOX, D. H. COHN, D. L. RIMOIN, B. STEINMANN, E. S. LANDER, and R. GITZELMANN	195

Poster Papers

A 1.9-kb 5' Fragment from the Human COL1A1 Gene Drives Inappropriate Expression of the Human COL2A1 Gene in Tissues of Transgenic Mice that Normally Express Only the COL1A1 Gene. <i>By</i> LEENA ÅLA-KOKKO, CONSTANCE M. YUAN, DOMINIQUE LE GUELLEC, SUZANNE FRANC, ANDRZEJ FERTALA, JASPAL S. KILLAN, BORIS P. SOKOLOV, and DARWIN J. PROCKOP	202
Creation of a System for the Assembly and Expression of DNA Constructs Encoding Novel Recombinant Human Procollagen II. <i>By</i> WILLIAM V. ARNOLD, ALEKSANDER L. SIERON, and DARWIN J. PROCKOP	204
Elucidation of Homeoprotein Cart-1 Function during <i>In Vitro</i> Chondrogenesis of C3H10T1/2 Micromass Cultures. <i>By</i> BRENT L. ATKINSON, MARGARET E. RYAN, JAMES J. BENEDICT, WILLIAM E. HUFFER, and ARTHUR GUTIERREZ-HARTMANN	206
Transcriptional Regulation of the Human Type X Collagen Gene Expression. <i>By</i> F. BEIER, M. J. LAMMI, W. BERTLING, and K. VON DER MARK	209
Modulation of Annexin V during Chondrocytic Differentiation <i>In Vitro</i> . <i>By</i> S. M. BERNIER and Y. YAMADA	212
Arg ⁵¹⁹ -Cys Mutation in COL2A1: Evidence for Multiple Founders. <i>By</i> J. F. BLEASEL, D. HOLDERBAUM, V. BRANCOLINI, R. W. MOSKOWITZ, T. M. HAQOI, E. CONSIDINE, D. J. PROCKOP, M. DEVOTO, and C. J. WILLIAMS	215
Retinoic Acid and Interleukin-1 Together Promote the Release of Collagen Fragments from Bovine Nasal Cartilage in Culture. <i>By</i> T. E. CAWSTON and A. J. ELLIS	219
Changes in Bone Morphogenetic Protein Sensitivity Relative to Differentiation in Fetal Rat Bone Cell Cultures. <i>By</i> MICHAEL CENTRELLA, SANDY CASINGHINO, CAREN GUNDBERG, THOMAS L. MCCARTHY, JOHN WOZNEY, and VICKI ROSEN	224
Sequence Elements within Intron 1 of the Human Collagen X Gene Do Not Contribute to the Regulation of Gene Expression. <i>By</i> D. CHAMBERS, J. T. THOMAS, D. BOAM, G. A. WALLIS, M. E. GRANT, and R. P. BOOT-HANDFORD	227
Type X Collagen NC1 Mutations Produced by Site-directed Mutagenesis Prevent <i>In Vitro</i> Assembly. <i>By</i> DANNY CHAN, YI MA WENG, SUE GOLUB, and JOHN F. BATEMEN	231
Recurrent Transition at a CG Dinucleotide in Exon 12 of COL2A1 Produces Kniest Dysplasia and Abnormal RNA Splicing by Chondrocytes and Lymphoblasts and Interruption of the Triple Helix of Type II Collagen. <i>By</i> LUPING CHEN, WINNIE YANG, and WILLIAM G. COLE	234
Cartilage Matrix Protein: Expression Patterns in Chicken, Mouse, and Human. <i>By</i> QIAN CHEN, DAVID M. JOHNSON, DOMINIK R. HAUDENSCHILD, and PAUL F. GOETINCK	238
Regulation of Chondrocyte Differentiation by Transforming Growth Factors β 1, β 2, β 3, and β 5. <i>By</i> JESÚS CHIMAL-MONROY, MARIA TERESA BRAVO-RUIZ, and LINO DIAZ DE LEÓN	241

Studies on the G3 Domain of Aggrecan from Human Cartilage. <i>By</i> JAYESH DUDHIA, CATHERINE M. DAVIDSON, TERRI M. WELLS, TIMOTHY E. HARDINGHAM, and MICHAEL T. BAYLISS	245
Tissue Distribution and Phenotypic Consequences of Different Type X Collagen Gene Constructs in Transgenic Mice. <i>By</i> IIRO EEROLA, KATI ELIMA, MERJA MARKKULA, KIRSI KANANEN, and EERO VUORIO	248
Characterization of Recombinant Human Collagen II with Arg ₅₁₉ -to-Cys Substitution. <i>By</i> ANDRZEJ FERTALA, LEENA ALA-KOKKO, and DARWIN J. PROCKOP	251
The Effect of Overexpression of BMPs and GDF-5 on the Development of Chick Limb Skeletal Elements. <i>By</i> P. H. FRANCIS-WEST, M. K. RICHARDSON, E. BELL, P. CHEN, F. LUYTEN, A. ADELFATTAH, A. J. BARLOW, P. M. BRICKELL, L. WOLPERT, and C. W. ARCHER	254
Role of BMP-2a on Otic Capsule Chondrogenesis. <i>By</i> D. A. FRENZ, W. LIU, and M. CAPPARELLI	256
Identification of an API-Like Response Region for Osteogenic Protein-1 in Type X Collagen Promoter. <i>By</i> SHUN-ICHI HARADA, T. KUBER SAMPATH, and GIDEON A. RODAN	259
Expression of the Chicken Sox9 Gene Marks the Onset of Cartilage Differentiation. <i>By</i> CHRIS HEALY, DAFE UWANOGHO, and PAUL T. SHARPE ...	261
Localization of Gene Expression during Endochondral Ossification. <i>By</i> M. C. HILLARBY, K. E. KING, G. BRADY, M. E. GRANT, G. A. WALLIS, and R. P. BOOT-HANDFORD	263
$\beta 1$ Integrin Antibodies Inhibit Chondrocyte Terminal Differentiation in Whole Sterna. <i>By</i> MICHELLE S. HIRSCH and KATHY K. H. SVOBODA	267
Expression of Functional Link Protein Domains Using an Avian-Specific Retroviral Vector. <i>By</i> URS HOFER, BEHNAM KAHOUSSI, JEREMY TRELSTAD, MARIAFEDERICA ZAVATARELLI, and PAUL F. GOETINCK	271
Homeobox Gene Expression during Bone Formation Induced by BMP. <i>By</i> TADAHIRO IIMURA, OTTO BABA, YUTAKA MARUOKA, KOHSUKE TAKEDA, SATOSHI SASAKI, HITOYATA SHIMOKAWA, and SHINICHIRO OIDA	274
Skeletal and Hematopoietic Defects in Mice Transgenic for Collagen X. <i>By</i> O. JACENKO, S. ITO, and B. R. OLSEN	278
Polarizing Activity in Early Limb Cartilaginous Condensations. <i>By</i> EIKI KOYAMA, JUDITH L. LEATHERMAN, SUMIHARE NOJI, and MAURIZIO PACIFICI	281
A 47-bp Sequence of the First Intron of the Mouse Pro α (II) Collagen Gene Is Sufficient to Direct Chondrocyte Expression. <i>By</i> VÉRONIQUE LEFEBVRE, KRISH MUKHOPADHYAY, GUANG ZHOU, SILVIO GAROFALO, CHAD SMITH, HEIDI EBERSPÄCHER, JAMES H. KIMURA, and BENOIT DE CROMBRUGHE ...	284
Role of <i>Krox-20</i> in Endochondral Bone Formation. <i>By</i> GIOVANNI LEVI, PIOTR TOPILKO, SYLVIE SCHNEIDER-MAUNOURY, MARCO LASAGNA, STEFANO MANTERO, BARBARA PESCE, GIULIO GHERSI, RANIERI CANCEDDA, and PATRICK CHARNAY	288

<i>In Vivo</i> Footprinting Implicates Negative Regulators in the Expression of the Type X Collagen Gene in Chickens. By FANXIN LONG and THOMAS F. LINSENMAYER	292
Analysis of Cell Behavior and Gene Expression in the Developing Face of the Chick Embryo. By I. M. McCONNELL, J. D. W. CLARKE, K. PATEL, D. M. WILKINSON, and C. TICKLE	295
Expression of Trk Receptors during Cartilage Differentiation. By THIMIOS A. MITSIAKIS, JOANNA WROBLEWSKI, JOSÉ-LUIS URDIALES, ELENA BECKER, DIONISIO MARTIN-ZANCA, BRIAN B. RUDKIN, and URBAN LENDAHL	298
Cleidocranial Dysplasia in Mice. By S. MUNDLOS, L. F. HUANG, P. SELBY, and B. R. OLSEN	301
A Mutation in COL9A2 Causes Multiple Epiphyseal Dysplasia (EDM2). By YASUTERU MURAGAKI, EDWIN C. M. MARIMAN, SYLVIA E. C. VAN BEERSUM, MERJA PERÄLÄ, JAN B. A. VAN MOURIK, MATTHEW L. WARMAN, BEN C. J. HAMEL, and BJORN R. OLSEN	303
The C-Propeptide of Type II Procollagen Binds to the Enhancer Region of the Type II Procollagen Gene and Regulates its Transcription. By KEN NAKATA, SHINGO MIYAMOTO, SUZANNE BERNIER, MASAHIKO TANAKA, ATSUSHI UTANI, PAUL KREBSBACH, CRAIG RHODES, and YOSHIHIKO YAMADA	307
Analysis of Up-Regulated Genes during Chondrocyte Hypertrophy. By M. NURMINSKAYA and T. F. LINSENMAYER	309
Localization of Type IIA Procollagen during Chondrogenesis. By ANUSH OGANESIAN, YONG ZHU, and LINDA J. SANDELL	311
Genetic and Molecular Analysis of the Mouse <i>Ulnaless</i> Locus. By CATHERINE L. PEICHEL and THOMAS F. VOGT	314
Characterization of <i>Medea</i> , A Gene Required for Maximal Function of the <i>Drosophila</i> BMP Homolog <i>Decapentaplegic</i> . By LAUREL A. RAFTERY and ROBERT G. WISOTZKEY	318
Alternative Splicing of a Chondrocyte-Specific Gene. By PAUL R. REYNOLDS, SUSAN D. REYNOLDS, REGIS J. O'KEEFE, J. EDWARD PUZAS, and RANDY N. ROSIER	321
mRNA Encoding a Novel Growth Regulatory Factor Is Coexpressed with Type II Procollagen during Chondrogenesis. By LINDA J. SANDELL, UWE H. DIETZ, and ANDREW M. NALIN	325
Growth Retardation in Transgenic Mice Harboring a Type II Collagen Mutation. By MIKKO SAVONTAUS, EERO VUORIO, and MARJO METSÄRANTA	328
Stickler Syndrome Type 2 and Linkage to the Col11A1 Gene. By M. P. SNEAD, J. R. W. YATES, R. WILLIAMS, S. J. PAYNE, F. M. POPE, and J. D. SCOTT	331
CD44 in Growing Normal and Neoplastic Rat Cartilage. By JAN W. STEVENS, KENNETH J. NOONAN, PATRICK P. BOSCH, TIMOTHY B. RAPP, JAMES A. MARTIN, GAIL L. KURRIGER, JERRY A. MAYNARD, KARLA J. DANIELS, MICHAEL SOLURSH, RAIIJA TAMMI, MARKKU TAMMI, and RONALD J. MIDURA	333

Expression of the ID1 and ID3 Genes during Chondrocyte Differentiation. <i>By</i> MARIA THORNEMO, EVA SJÖGREN JANSSON, and ANDERS LINDAHL	337
Separable Regulatory Elements from Pro- α 2(XI) Collagen Gene Drive Distinct Patterns of Cartilage-Specific Expression in Transgenic Mice. <i>By</i> N. TSUMAKI, M. SUGIMOTO, K. NAKATA, Y. MATSUI, T. OCHI, and T. KIMURA . . .	340
Complete Structure of the Human COL11A2 Gene: The Exon Sizes and Other Features Indicate the Gene Has Not Evolved with Genes for Other Fibrillar Collagens. <i>By</i> MIRKA M. VUORISTO, TERO PIHLAJAMAA, PHILIPP VANDENBERG, JARMO KÖRKÖ, DARWIN J. PROCKOP, and LEENA ALA-KOKKO	343
A Splice Variant of CD44 Expressed in the Rat Apical Ectodermal Ridge Contributes to Limb Outgrowth. <i>By</i> DAVID WAINWRIGHT, LARRY SHERMAN, JONATHAN SLEEMAN, HELMUT PONTA, and PETER HERRLICH	345
Aetiology of the Skeletal Dysmorphology Syndrome Campomelic Dysplasia: Expression of the <i>Sox9</i> Gene during Chondrogenesis in Mouse Embryos. <i>By</i> SUSAN WHEATLEY, EDWINA WRIGHT, YVETTE JESKE, ANDREW MCCORMACK, JOSEPHINE BOWLES, and PETER KOOPMAN	350
Nestin Distribution in the Developing Limb Bud <i>in vivo</i> and <i>in vitro</i> . <i>By</i> J. WROBLEWSKI, M. ENGSTRÖM, C. EDWALL-ARVIDSSON, G. SJÖBERG, T. SEJERSEN, and U. LENDAHN	353
Construction and Expression of a Functional Recombinant Gene for Proteoglycan. <i>By</i> BAIHUA YANG, BING L. YANG, and PAUL F. GOETTINCK	356
Craniofacial Cartilage Development in Zebrafish. <i>By</i> PAMELA C. YELICK, WOLFGANG DRIEVER, STEPHAN NEUHAUSS, and PHILIP STASHENKO	360
Index of Contributors	363
