

CONTENTS

Asepsis in Bioreactors

M. C. SHARMA AND A. K. GURTU

I. Introduction	1
II. "Invaders"	3
III. Consequences	3
IV. Sources	4
V. Approaches	6
VI. Overcautious Approaches	24
VII. Conclusion	25
References	25

Lipids of *n*-Alkane-Utilizing Microorganisms and Their Application Potential

SAMIR S. RADWAN AND NASER A. SORKHOH

I. Introduction	29
II. <i>n</i> -Alkane-Utilizing Microorganisms	30
III. Total Lipid Contents	35
IV. Fatty Acids	42
V. Acylglycerols	59
VI. Sterols	61
VII. Fatty Alcohols, Ketones, and Epoxides	63
VIII. Hydrocarbons and Waxes	66
IX. Phospholipids	67
X. Glycolipids and Peptidolipids	73
XI. Biolipid Extract	76
XII. Environmental Considerations	78
References	81

Microbial Pentose Utilization

PRASHANT MISHRA AND AJAY SINGH

I. Introduction	91
II. Pentoses from Natural Sources	93
III. Pentose-Fermenting Organisms	94
IV. Pentose Metabolism	101
V. Production of Solvents and Organic Acids	112

VI. Factors Affecting Pentose Fermentation	127
VII. Product Tolerance	136
VIII. Strain Improvement	139
IX. Future Prospects	142
References	143

Medicinal and Therapeutic Value of the Shiitake Mushroom

S. C. JONG AND J. M. BIRMINGHAM

I. Introduction	153
II. Medicinal and Therapeutic Properties	154
III. Patented Products and Processes	172
IV. Discussion	175
References	177

Yeast Lipid Biotechnology

Z. JACOB

I. Introduction	185
II. Yeasts as Potential Sources of Lipids	186
III. Importance of Yeast Lipids in Beverages and Foods	187
IV. Medical Importance of Yeast Lipids	191
V. Modification of Lipids	192
VI. Commercial Significance of Yeast Lipid Biotechnology	204
VII. Conclusion	207
References	208

Pectin, Pectinase, and Protopectinase: Production, Properties, and Applications

TAKUO SAKAI, TATSUJI SAKAMOTO, JOHAN HALLAERT, AND
ERICK J. VANDAMME

I. Introduction	213
II. Review of Pectin	214
III. Classification of Pectic Enzymes	236
IV. Role of Pectic Enzymes in Phytopathogenesis	244
V. Applications of Pectinases	245
VI. Protopectin-Solubilizing Enzyme (Protopectinase)	248
References	288

Physicochemical and Biological Treatments for Enzymatic/ Microbial Conversion of Lignocellulosic Biomass

PURNENDU GHOSH AND AJAY SINGH

I. Introduction	295
II. Structure of Lignocellulosic Biomass	298
III. Physical Treatment	300
IV. Thermal Treatment	304
V. Chemical Treatment	306
VI. Biological Treatment	316
VII. Epilogue	326
References	327
INDEX	335
CONTENTS OF PREVIOUS VOLUMES	349
