

CONTENTS

Microbial Cellulases: Protein Architecture, Molecular Properties, and Biosynthesis

AJAY SINGH AND KIYOSHI HAYASHI

I. Introduction	1
II. Microbial Sources of Cellulolytic Enzymes	2
III. Protein Architecture and Molecular Properties	6
IV. Structural and Catalytic Properties	15
V. Cellulase Biosynthesis	26
VI. Future Prospects	34
References	35

Factors Inhibiting and Stimulating Bacterial Growth in Milk: An Historical Perspective

D. K. O'TOOLE

I. Introduction	45
II. Early Developments	47
III. Lactenin	48
IV. Studies with Lactic Acid Bacteria	53
V. Effect of Cow Ration on Milk as a Growth Medium for Bacteria	69
VI. Role of Inhibitors in Milk Quality	71
VII. Stimulators of the Growth of Lactic Acid Bacteria	72
VIII. Growth Inhibitors of Other Bacteria	77
IX. Applications of the Antimicrobial Systems in Milk	81
X. Conclusion	82
Appendix A	83
Appendix B	84
References	85

Challenges in Commercial Biotechnology. Part I. Product, Process, and Market Discovery

ALEŠ PROKOP

I. Introduction	95
II. Biocatalysts: Sources for Discovery	108
III. Primary Market Classification	113

IV. Pathway to Commercialization: Discovery and Development (D & D) Cycle.....	114
V. Product Discovery.....	115
VI. Process Discovery.....	141
VII. Market Discovery.....	148
VIII. Interactions of Discovery Aspects within the D & D Cycle.....	149
References.....	152

Challenges in Commercial Biotechnology. Part II. Product, Process, and Market Development

ALEŠ PROKOP

I. Introduction.....	155
II. Product Development.....	156
III. Process Development and Scale-Up.....	173
IV. Market Development.....	209
V. Outlook.....	227
References.....	233

Effects of Genetically Engineered Microorganisms on Microbial Populations and Processes in Natural Habitats

JACK D. DOYLE, GUENTHER STOTZKY, GWENDOLYN MCCLUNG,
AND CHARLES W. HENDRICKS

I. Introduction.....	237
II. Aquatic Environments.....	245
III. Activated Sludge.....	248
IV. Soil.....	249
V. Plants.....	261
VI. Discussion.....	267
References.....	280

Detection, Isolation, and Stability of Megaplasmid-Encoded Chloroaromatic Herbicide-Degrading Genes within *Pseudomonas* Species

DOUGLAS J. CORK AND AMJAD KHALIL

I. Introduction.....	289
II. Selected Model Haloaromatic and Aromatic Compounds of Agricultural and Industrial Importance.....	290
III. Detection and Isolation of Large Plasmids from <i>Pseudomonas</i> spp.	301

IV. Effect of Alternative Carbon Sources on the Stability and Curing of a Large Molecular Weight Plasmid, pDK1	308
V. Summary	317
References	319
INDEX	323
CONTENTS OF PREVIOUS VOLUMES	331
