

CONTENTS

Contributions to Volume 18 vii

Regulation of Gene Expression in Prokaryotic Organisms

ROBERT F. GOLDBERGER, ROGER G. DEELEY, AND KATHLEEN P. MULLINIX

I. Introduction	1
II. Examples of Regulated Systems	6
III. Autogenous Regulation	21
IV. Cyclic AMP and Catabolite Repression	24
V. Stringency	29
VI. RNA Polymerase	33
VII. Translational Control	47
VIII. Conclusion	53
References	54

Genetics of Bacterial Sporulation

JAMES A. HOCH

I. Introduction	69
II. Sequence of Spore Formation	70
III. Genetic Studies	77
IV. RNA Polymerase and Transcription	86
V. Control of the Temporal Order of Gene Expression	89
References	91

The Cell Cycle and the Control of Cellular Reproduction

DAVID M. PRESCOTT

I. Introduction	100
II. Properties of the G ₁ Period	101
III. Initiation of the S Period	123
IV. The S Period	131
V. Properties of the G ₂ Period	141
VI. The G ₂ -to-D Transition	144
VII. Activities during Cell Division	144
VIII. Cell Surface Changes during the Cell Cycle	147

IX. Cyclic AMP and the Cell Cycle	148
X. Nuclear Proteins and the Cell Cycle	151
XI. RNA Synthesis in Relation to the Cell Cycle	152
XII. Patterns of Enzyme Activities through the Cell Cycle	153
XIII. The Genetics of the Cell Cycle	156
XIV. Concluding Remarks	158
References	159

Developmental Genetics of Homoeosis

WILLEM J. OUWENEEL

I. Introduction	179
II. Types of Homoeotic Transformation	180
III. Types of Homoeotic Mutation	188
IV. Genetic Properties	199
V. Developmental Properties	210
VI. Hypotheses of Homoeosis	223
VII. Summary and Conclusions	234
References	236

Drosophila Gene-Enzyme Systems

JAMES B. COURTRIGHT

I. Introduction	249
II. Specific Gene-Enzyme Systems	251
III. Enzymes in Natural Populations	287
IV. Dosage Compensation of Gene Activity	293
V. Conclusions	296
References	301

Genetics, Cytogenetics, and Evolution of Mosquitoes

JAMES B. KITZMILLER

I. Introduction	316
II. Formal Genetics	317
III. Cytogenetics	343
IV. Evolution and Speciation	356
V. Cytoplasmic Incompatibility	362
VI. Genetic Manipulation	364
VII. Behavior Genetics	364
VIII. Genetic Control	365
IX. Biochemical Genetics	380
References	383

Subject Index	435
