

CONTENTS

Toward New Viral Vaccines for Man

ERLING NORRBY

I.	Introduction	1
II.	Protective Immunity Deriving from Regular Virus Infections	3
III.	Avenues for Active Immunization Aiming at Mimicking Natural Protective Immunity	5
IV.	Identification of Immunogens Involved in Inactivation of Virion Infectivity	7
V.	Immune Pathological Complications in Immunization	14
VI.	New Approaches to Live Vaccines	16
VII.	New Approaches to Vaccines Containing Nonreplicating Antigens	21
VIII.	Immunogenicity of Different Forms for Presentation of Subunit or Peptide Antigens	27
IX.	Epilogue	29
	References	30

Retroid Virus Genome Replication

WILLIAM S. MASON, JOHN M. TAYLOR, AND ROGER HULL

I.	Introduction	35
II.	Background	37
III.	Genome Organization	49
IV.	DNA Synthesis	62
V.	Packaging and Unpackaging	71
VI.	Integration	74
VII.	Transcription	76
VIII.	Translation	84
IX.	Retrotransposons, Retrovirus-Like Elements, and RNA-Mediated Transposition	85
X.	Conclusions and Outlook	86
	References	88

Viral Oncogenes, *v-src* and *v-erbB*, and Their Cellular Counterparts

KUMAO TOYOSHIMA, TADASHI YAMAMOTO, SADAAKI KAWAI, AND
MITSUAKI YOSHIDA

I.	Introduction	97
II.	Outline of <i>src</i> Gene Study	98

III. An Avian Sarcoma Virus Y73 and the <i>yes</i> Gene	100
IV. <i>erbB</i> , an Oncogene of Avian Erythroblastosis, Originating from the Epidermal Growth Factor Receptor Gene	104
V. <i>src</i> Family	109
VI. Search for the Cellular Target Proteins for the Products of the <i>src</i> Family	114
VII. The <i>c-yes</i> and <i>c-erbB</i> Genes	117
VIII. Summary and Perspectives	121
IX. Postscript	121
References	122

Hepatitis A

A. G. COULEPIS, B. N. ANDERSON, AND I. D. GUST

I. Introduction	129
II. Epidemiology	135
III. Biology	140
IV. Propagation of HAV in Cell Culture	147
V. Replicative Strategy	149
VI. Molecular Biology	151
VII. Prevention and Treatment	158
References	163

Cryptic Plant Viruses

GUIDO BOCCARDO, VITTORIA LISA, ENRICO LUISONI, AND
ROBERT G. MILNE

I. Introduction	171
II. Detection Methods	181
III. Symptoms and Pathology	188
IV. Transmission	189
V. Distribution in Plants	191
VI. Purification and Physical Properties	195
VII. Particle Structure	199
VIII. Particle Composition	200
IX. Relationships	205
X. Conclusion	210
References	212

Molecular Studies of Brome Mosaic Virus Using Infectious Transcripts from Cloned cDNA

PAUL AHLQUIST, ROY FRENCH, AND JOZEF J. BUJARSKI

I. Introduction	215
II. Background Information	216

III	Deletion Analysis of Viral RNA Regulatory Elements	223
IV	Insertion and Expression of Foreign Genes in RNA Viruses	224
V	The Use of Artificial Mutations in RNA Virus Genetics: Viral RNA Recombination Events in Plants	233
VI	Conclusion	238
	References	239

Adeno-Associated Viruses: An Update

KENNETH I. BERNs AND ROY A. BOHENZKY

I	Introduction	243
II	Background	244
III	Virion Structure	245
IV	Replication	250
V	Latent Infection	268
VI	Inhibition of Other Viruses	277
VII	AAV as a Eukaryotic Cloning Vector	287
VIII	Conclusions	291
	References	293
	Index	307
