CONTRIBUTORS TO VOLUME 210		vii
PREFACE		ix
VOLUMES IN SERIES		xiii
1. Parameter Estimation by Least-Squares Methods	MICHAEL L. JOHNSON AND LINDSAY M. FAUNT	1
2. Global Analysis of Biochemical and Biophysical Data	JOSEPH M. BEECHEM	37
3. Padé-Laplace Algorithm for Sums of Exponen- tials: Selecting Appropriate Exponential Model and Initial Estimates for Exponential Fitting	HERBERT R. HALVORSON	54
4. Use of Weighting Functions in Data Fitting	ENRICO DI CERA	68
5. Analysis of Residuals: Criteria for Determining Goodness-of-Fit	MARTIN STRAUME AND MICHAEL L. JOHNSON	87
6. Analysis of Ligand-Binding Data with Experimen- tal Uncertainties in Independent Variables	MICHAEL L. JOHNSON	106
7. Monte Carlo Method for Determining Complete Confidence Probability Distributions of Esti- mated Model Parameters	MARTIN STRAUME AND MICHAEL L. JOHNSON	117
8. Singular Value Decomposition: Application to Analysis of Experimental Data	E. R. HENRY AND J. HOFRICHTER	129
9. Fourier Resolution Enhancement of Infrared Spectral Data	DOUGLAS J. MOFFATT AND HENRY H. MANTSCH	192
10. Maximum Likelihood Analysis of Fluorescence Data	ŽELJKO BAJZER AND FRANKLYN G. PRENDERGAST	200
11. Method of Moments and Treatment of Nonran- dom Error	ENOCH W. SMALL	237
12. Laplace Deconvolution of Fluorescence Decay Surfaces	MARCEL AMELOOT	279
13. Interpolation Methods	CAROLE J. SPANGLER	305
14. Compartmental Analysis of Fluorescence Decay Surfaces of Excited-State Processes	MARCEL AMELOOT, NOËL BOENS, RONN ANDRIESEN, VIVIANE VAN DEN BERGH, AND FRANS C. DE SCHRYVER	314

15. Analysis of Discrete, Time-Sampled Data Using Fourier Series Method	LINDSAY M. FAUNT AND MICHAEL L. JOHNSON	340
16. Alternatives to Consider in Fluorescence Decay Analysis	JAY R. KNUTSON	357
17. Practical Aspects of Kinetic Analysis	JULIEN S. DAVIS	374
18. Compartmental Analysis of Enzyme-Catalyzed Reactions	PRESTON HENSLEY, GLENN NARDONE, AND MERYL E. WASTNEY	391
19. Analysis of Site-Specific Interaction Parameters in Protein-DNA Complexes	KENNETH S. KOBLAN, DAVID L. BAIN, DOROTHY BECKETT, MADELINE A. SHEA, AND GARY K. ACKERS	405
20. Analysis of Circular Dichroism Spectra	W. CURTIS JOHNSON, JR.	426
21. Fluorescence Quenching Studies: Analysis of Nonlinear Stern-Volmer Data	WILLIAM R. LAWS AND PAUL BRIAN CONTINO	448
22. Simultaneous Analysis for Testing of Models and Parameter Estimation	DONALD F. SENEAR AND DAVID WAYNE BOLEN	463
23. Numerical Analysis of Binding Data: Advantages, Practical Aspects, and Implications	CATHERINE A. ROYER AND JOSEPH M. BEECHEM	481
24. Deconvolution Analysis for Pulsed-Laser Photoacoustics	JEANNE RUDZKI SMALL	505
25. Parameter Estimation in Binary Mixtures of Phospholipids	E. E. BRUMBAUGH AND C. HUANG	521
26. Deconvolution Analysis of Hormone Data	JOHANNES D. VELDHUIS AND MICHAEL L. JOHNSON	539
27. Dynamic Programming Algorithms for Biological Sequence Comparison	WILLIAM R. PEARSON AND WEBB MILLER	575
28. Programs for Symbolic Mathematics in Biochemistry	HERBERT R. HALVORSON	601
29. Artificial Neural Networks	W. T. KATZ, J. W. SNELL, AND M. B. MERICKEL	610
30. Fractal Applications in Biology: Scaling Time in Biochemical Networks	F. EUGENE YATES	636
