| 6. Nitric Oxide Measurement Using Electrochemical<br>Methods | TADEUSZ MALINSKI,<br>STEFAN MESAROS, AND<br>PAUL TOMBOULIAN                                                                                                                              | 58 |
| 7. Electrochemical Methods for Detection of Nitric<br>Oxide  | DANAE CHRISTODOULOU,<br>SETSUKO KUDO,<br>JOHN A. COOK,<br>MURALI C. KRISHNA,<br>ALLEN MILES,<br>MATTHEW B. GRISHAM,<br>RAMACHANDRAN<br>MURUGESAN,<br>PETER C. FORD, AND<br>DAVID A. WINK | 69 |

|                                                                                                                                              |                                                                                                                                                                                                       |     |
|----------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 8. Chemiluminescence Headspace-Gas Analysis for Determination of Nitric Oxide Formation in Biological Systems                                | JAMES F. BRIEN,<br>BRIAN E. McLAUGHLIN,<br>KANJI NAKATSU, AND<br>GERALD S. MARKS                                                                                                                      | 83  |
| 9. Colorimetric Assays for Nitric Oxide and Nitrogen Oxide Species Formed from Nitric Oxide Stock Solutions and Donor Compounds              | RAYMOND W. NIMS,<br>JOHN C. COOK,<br>MURALI C. KRISHNA,<br>DANAE CHRISTODOULOU,<br>CHARLES M. B. POORE,<br>ALLEN M. MILES,<br>MATTHEW B. GRISHAM, AND<br>DAVID A. WINK                                | 93  |
| 10. Determination of Nitric Oxide Using Fluorescence Spectroscopy                                                                            | ALLEN M. MILES,<br>DAVID A. WINK,<br>JOHN C. COOK, AND<br>MATTHEW B. GRISHAM                                                                                                                          | 105 |
| 11. Determination of Selectivity of Reactive Nitrogen Oxide Species for Various Substrates                                                   | DAVID A. WINK,<br>MATTHEW B. GRISHAM,<br>ALLEN M. MILES,<br>RAYMOND W. NIMS,<br>MURALI C. KRISHNA,<br>ROBERTO PACELLI,<br>DIANE TEAGUE,<br>CHARLES M. B. POORE,<br>JOHN A. COOK, AND<br>PETER C. FORD | 120 |
| 12. Quantitation of Nitrate, Nitrite, and Nitrosating Agents                                                                                 | JOHN S. WISHNOK,<br>JOSEPH A. GLOGOWSKI, AND<br>STEVEN R. TANNENBAUM                                                                                                                                  | 130 |
| 13. Measurement of Nitrate and Nitrite in Biological Samples Using Nitrate Reductase and Griess Reaction                                     | DONALD L. GRANGER,<br>READ R. TAINTOR,<br>KENNETH S. BOOCKVAR, AND<br>JOHN B. HIBBS, JR.                                                                                                              | 142 |
| 14. Analysis of Nitrite, Nitrate, and Nitric Oxide Synthase Activity in Brain Tissue by Automated Flow Injection Technique                   | ISAO YOKOI,<br>HITOSHI HABU,<br>HIDEAKI KABUTO, AND<br>AKITANE MORI                                                                                                                                   | 152 |
| 15. Microtiter Plate Assay for Determining Kinetics of Nitric Oxide Synthesis                                                                | STEVEN S. GROSS                                                                                                                                                                                       | 159 |
| 16. Detection of Nitric Oxide by Electron Spin Resonance in Chemical, Photochemical, Cellular, Physiological, and Pathophysiological Systems | B. KALYANARAMAN                                                                                                                                                                                       | 168 |
| 17. <i>In Vivo</i> Spin Trapping of Nitric Oxide by Heme: Electron Paramagnetic Detection Resonance <i>ex Vivo</i>                           | DAVID M. HALL AND<br>GARRY R. BUETTNER                                                                                                                                                                | 188 |

|                                                                                                                                        |                                                                                                           |     |
|----------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------|-----|
| 18. Electron Spin Resonance and Mass Spectral Analysis of Interactions of Ferrylhemoglobin and Ferrylmyoglobin with Nitric Oxide       | ANATOLY N. OSIPOV,<br>NIKOLAI V. GORBUNOV,<br>BILLY W. DAY,<br>NABIL M. ELSAYED, AND<br>VALERIAN E. KAGAN | 193 |
| 19. Electron Spin Resonance for Spin Trapping of 3,5-Dibromo-4-nitrosobenzene Sulfonate                                                | KOHI ICHIMORI,<br>CARMEN M. ARROYO, AND<br>HIROE NAKAZAWA                                                 | 203 |
| 20. Quantitation of Nitric Oxide Using 2-Phenyl-4,4,5,5-tetramethylimidazoline-1-oxyl 3-Oxide Derivatives in Biological Systems (PTIO) | TAKAAKI AKAIKE AND<br>HIROSHI MAEDA                                                                       | 211 |
| 21. Continuous and Quantitative Monitoring of Rate of Cellular Nitric Oxide Generation                                                 | YASHIGE KOTAKE                                                                                            | 222 |
| 22. Electron Paramagnetic Resonance Characterization of Rat Neuronal Nitric Oxide Production <i>ex Vivo</i>                            | ANDREY V. KOZLOV,<br>ANNA BINI,<br>ANNA IANNONE,<br>ISABELLA ZINI, AND<br>ALDO TOMASI                     | 229 |
| 23. Quantitation of Nitrate and Nitrite in Extracellular Fluids                                                                        | MATTHEW B. GRISHAM,<br>GLENDA G. JOHNSON, AND<br>JACK R. LANCASTER, JR.                                   | 237 |
| 24. Stirred Reactor with Continuous Nitric Oxide Sampling for Use in Kinetic Studies                                                   | RANDY S. LEWIS AND<br>WILLIAM M. DEEN                                                                     | 247 |

### C. Nitric Oxide Donors, Nitric Oxide Deactivation, and Nitric Oxide Gas

|                                                                                                                       |                                                                                              |     |
|-----------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------|-----|
| 25. Nitric Oxide Generation from Pharmacologic Nitric Oxide Donors                                                    | NARENDRA S. KISHNANI AND<br>HO-LEUNG FUNG                                                    | 259 |
| 26. Photolabile Donors of Nitric Oxide: Ruthenium Nitrosyl Chlorides as Caged Nitric Oxide                            | NADIR BETTACHE,<br>TOM CARTER,<br>JOHN E. T. CORRIE,<br>DAVID OGDEN, AND<br>DAVID R. TRENTAM | 266 |
| 27. "NONOates" (1-Substituted Diazen-1-ium-1,2-diolates) as Nitric Oxide Donors: Convenient Nitric Oxide Dosage Forms | LARRY K. KEEFER,<br>RAYMOND W. NIMS,<br>KEITH M. DAVIES, AND<br>DAVID A. WINK                | 281 |
| 28. S-Nitrosothiol Detection                                                                                          | GEORGE N. WELCH,<br>GILBERT R. UPCHURCH, JR.,<br>AND JOSEPH LOSCALZO                         | 293 |
| 29. S-Nitrosothiols and Role of Metal Ions in Decomposition to Nitric Oxide                                           | D. LYN H. WILLIAMS                                                                           | 299 |

## Section II. Biochemistry and Molecular Biology of Enzymes and Proteins Associated with Nitric Oxide Metabolism

### A. Nitric Oxide Synthase: Reduction Mechanism, Purification, and Activity Assays

|                                                                                               |                                                                      |     |
|-----------------------------------------------------------------------------------------------|----------------------------------------------------------------------|-----|
| 30. Binding Sites of Nitric Oxide Synthases                                                   | QING LIU AND<br>STEVEN S. GROSS                                      | 311 |
| 31. Purification and Properties of Nitric Oxide Synthases                                     | DENNIS J. STUEHR                                                     | 324 |
| 32. Purification of Isoforms of Nitric Oxide Synthase                                         | ULRICH FÖRSTERMANN AND<br>INGOLF GATH                                | 334 |
| 33. Purification and Inhibitor Screening of Human Nitric Oxide Synthase Isozymes              | EDWARD P. GARVEY,<br>ERIC S. FURFINE, AND<br>PAULA A. SHERMAN        | 339 |
| 34. Generation of Isoform-Specific Antibodies to Nitric Oxide Synthases                       | TED M. DAWSON AND<br>VALINA L. DAWSON                                | 349 |
| 35. Determination of Nitric Oxide Synthase Cofactors: Heme, FAD, FMN, and Tetrahydrobiopterin | PETER KLATT,<br>KURT SCHMIDT,<br>ERNST R. WERNER, AND<br>BERND MAYER | 358 |

### B. Inhibitors of Nitric Oxide Synthase Isozymes

|                                                                               |                                             |     |
|-------------------------------------------------------------------------------|---------------------------------------------|-----|
| 36. Chemistry of N-Hydroxy-L-arginine                                         | JON M. FUKUTO                               | 365 |
| 37. Nitric Oxide Synthase Inhibitors: Amino Acids                             | OWEN W. GRIFFITH AND<br>ROBERT G. KILBOURN  | 375 |
| 38. 7-Nitroindazole: An Inhibitor of Nitric Oxide Synthase                    | PHILIP K. MOORE AND<br>PHILIP A. BLAND-WARD | 393 |
| 39. Selective Inhibition of Inducible Nitric Oxide Synthase by Aminoguanidine | JOHN A. CORBETT AND<br>MICHAEL L. MCDANIEL  | 398 |

### C. Induction of Nitric Oxide Synthase

|                                                                                                        |                                                                                              |     |
|--------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------|-----|
| 40. Biological Control and Inhibition of Induction of Nitric Oxide Synthase                            | CHIN-CHEN WU AND<br>CHRISTOPH THIEMERMANN                                                    | 408 |
| 41. Large-Scale Purification of Rat Brain Nitric Oxide Synthase from Baculovirus Overexpression System | BERND MAYER,<br>PETER KLATT,<br>BARBARA M. LIST,<br>CHRISTIAN HARTENECK, AND<br>KURT SCHMIDT | 420 |

## D. Molecular Cloning and Expression

- |                                                                          |                                                                                                                                                               |     |
