CONTRIBUTORS TO VOLUME 353	ix
PREFACE	xvii
VOLUMES IN SERIES	xix

Section I. Protein Structure and Function

1. Mammalian Two-Hybrid Assay Showing Redox Control of HIF-Like Factor	DAVID LANDO, DANIEL J. PEET, INGEMAR PONGRATZ, AND MURRAY L. WHITELAW	3
2. Predicting Redox State of Cysteines in Proteins	ANDRÁS FISER AND ISTVÁN SIMON	10
3. Enzyme-Linked Immunospot Assay for Detection of Thioredoxin and Thioredoxin Reductase Secretion from Cells	BITA SAHAF, ANITA SÖDERBERG, CHRISTINA EKERFELT, STAFFAN PAULIE, AND ANDERS ROSÉN	22
4. Determination of Redox Properties of Protein Disulfide Bonds by Radiolytic Methods	CHANTAL HOUÉE-LEVIN	35
5. Crystal Structures of Oxidized and Reduced Forms of NADH Peroxidase	JOANNE I. YEH AND AL CLAIBORNE	44
6. Redox Control of Zinc Finger Proteins	MICHAEL A. BALDWIN AND CHRISTOPHER C. BENZ	54
7. Quantification of Intracellular Calcineurin Activity and H ₂ O ₂ -Induced Oxidative Stress	TIFFANY A. REITER AND FRANK RUSNAK	70
8. High-Performance Affinity Beads for Identifying Anti-NF- κ B Drug Receptors	MASAKI HIRAMOTO, NORIAKI SHIMIZU, TAKEYUKI NISHII, DAISUKE SHIMA, SHIN AIZAWA, HIROTOSHI TANAKA, MAMORU HATAKEYAMA, HARUMA KAWAGUCHI, AND HIROSHI HANDA	81
9. Regulation of Protein Kinase C Isozyme Activity by S-Glutathiolation	NANCY E. WARD, FENG CHU, AND CATHERINE A. O'BRIAN	89

10. Detection and Affinity Purification of Oxidant-Sensitive Proteins Using Biotinylated Glutathione Ethyl Ester	DANIEL M. SULLIVAN, RODNEY L. LEVINE, AND TOREN FINKEL	101
11. Redox Role for Tetrahydrobiopterin in Nitric Oxide Synthase Catalysis: Low-Temperature Optical Absorption Spectral Detection	ANTONIUS C. F. GORREN, NICOLE BEC, REINHARD LANGE, AND BERND MAYER	114
12. Lysozyme-Osmotic Shock Methods for Localization of Periplasmic Redox Proteins in Bacteria	VICTOR L. DAVIDSON AND DAPENG SUN	121
13. Alterations in Membrane Cholesterol That Affect Structure and Function of Caveolae	ERIC J. SMART AND RICHARD G. W. ANDERSON	131
14. Contribution of Neelaredoxin to Oxygen Tolerance by <i>Treponema pallidum</i>	KARSTEN R. O. HAZLETT, DAVID L. COX, ROBERT A. SIKKINK, FRANÇOISE AUCHÈRE, FRANK RUSNAK, AND JUSTIN D. RADOLF	140
15. Redox Control of Integrin Adhesion Receptors	JEFFREY W. SMITH, BOXU YAN, FRANCE LANDRY, AND CHRISTIAN R. LOMBARDO	156
16. Heme Oxygenase 1 in Regulation of Inflammation and Oxidative Damage	SHAW-FANG YET, LUIS G. MELO, MATTHEW D. LAYNE, AND MARK A. PERRELLA	163
17. Redox Properties of Vanillyl-Alcohol Oxidase	ROBERT H. H. VAN DEN HEUVEL, MARCO W. FRAAIJE, AND WILLEM J. H. VAN BERKEL	177
18. Anaerobic Oxidations of Myoglobin and Hemoglobin by Spectroelectrochemistry	CÉLINE H. TABOY, CELIA BONAVENTURA, AND ALVIN L. CRUMBLISS	187
19. Cysteine-Nitric Oxide Interaction and Olfactory Function	MARIE-CHRISTINE BROILLET	209
20. Functional Evaluation of Nonphagocytic NAD(P)H Oxidases	FRANCIS J. MILLER, JR. AND KATHY K. GRIENDLING	220
21. Purification and Assessment of Proteins Associated with Nitric Oxide Synthase	CHARLES J. LOWENSTEIN	233
22. Detection of Redox Sensor of Ryanodine Receptor Complexes	WEI FENG AND ISAAC N. PESSAH	240
23. Redox Control of 20S Proteasome	BERTRAND FRIGUET, ANNE-LAURE BULTEAU, MARIANGELA CONCONI, AND ISABELLE PETROPOULOS	253

24. Measuring Reactive Oxygen Species Inhibition of Endothelin-Converting Enzyme	CHARLES J. LOWENSTEIN	263
25. Redox Sensor Function of Metallothioneins	JAMES P. FABISIAK, GREGORY G. BORISENKO, SHANG-XI LIU, VLADIMIR A. TYURIN, BRUCE R. PITT, AND VALERIAN E. KAGAN	268
26. SIR2 Family of NAD ⁺ -Dependent Protein Deacetylases	JEFFREY S. SMITH, JOSE AVALOS, IVANA CELIC, SHABAZZ MUHAMMAD, CYNTHIA WOLBERGER, AND JEF D. BOEKE	282
27. Defining Redox State of X-Ray Crystal Structures by Single-Crystal Ultraviolet-Visible Microspectrophotometry	CARRIE M. WILMOT, TOVE SJÖGREN, GUNILLA H. CARLSSON, GUNNAR I. BERGLUND, AND JANOS HAJDU	301

Section II. Nucleic Acids and Genes

28. Model System for Developing Gene Therapy Approaches for Myocardial Ischemia-Reperfusion Injury	JUSAN YANG, TERESA C. RITCHIE, AND JOHN F. ENGELHARDT	321
29. Cloning and Characterization of Soluble Decoy Receptors	JOHANNA LAUKKANEN AND SEPPO YLÄ-HERTTUALA	337
30. Using Genetically Engineered Mice to Study Myocardial Ischemia-Reperfusion Injury	DIPAK K. DAS, WOLFGANG DILLMANN, YE-SHIH HO, KURT M. LIN, AND BERND R. GLOSS	346
31. Transgenic Model for the Study of Oxidative Damage in Huntington's Disease	JOSÉ SEGOVIA	365
32. Heme Oxygenase 1 Transgenic Mice as a Model to Study Neuroprotection	MAHIN D. MAINES	374
33. Copper/Zinc Superoxide Dismutase Transgenic Brain in Neonatal Hypoxia-Ischemia	R. ANN SHELDON, LYNN ALMLI, AND DONNA M. FERRIERO	389
34. Manganese Superoxide Dismutase Transgenic Mice: Characteristics and Implications	CHING K. CHOW, HSIU-CHUAN YEN, WISSAM IBRAHIM, AND DARET K. ST. CLAIR	398
35. Tissue-Specific Knockout Model for Study of Mitochondrial DNA Mutation Disorders	ALEKSANDRA TRIFUNOVIC AND NILS-GÖRAN LARSSON	409

36. Antisense Oligodeoxyribonucleotides: A Better Way to Inhibit Monocyte Superoxide Anion Production?	ERIK A. BEY AND MARTHA K. CATHCART	421
37. Transgenic Shuttle Vector Assays for Determining Genetic Differences in Oxidative B Cell Mutagenesis <i>in Vivo</i>	KLAUS FELIX, LYNNE D. ROCKWOOD, AND SIEGFRIED JANZ	434
38. Redox Control of Cell Cycle-Coupled Topoisomerase II α Gene Expression	PRABHAT C. GOSWAMI, RYUJI HIGASHIKUBO, AND DOUGLAS R. SPITZ	448
39. Chemokine Expression in Transgenic Mice Overproducing Human Glutathione Peroxidases	NOBUYA ISHIBASHI AND OLEG MIROCHNITCHENKO	460
40. Analysis of Promoter Methylation and Its Role in Silencing Metallothionein I Gene Expression in Tumor Cells	KALPANA GHOSHAL, SARMILA MAJUMDER, AND SAMSON T. JACOB	476
41. Functional Genomics: High-Density Oligonucleotide Arrays	SASHWATI ROY, SAVITA KHANNA, KIMBERLY BENTLEY, PHIL BEFFREY, AND CHANDAN K. SEN	487
42. Reporter Transgenes for Study of Oxidant Stress in <i>Caenorhabditis elegans</i>	CHRISTOPHER D. LINK AND CAROLYN J. JOHNSON	497
43. Detection of DNA Base Mismatches Using DNA Intercalators	ELIZABETH M. BOON, JENNIFER L. KISKO, AND JACQUELINE K. BARTON	506
44. Deoxyguanosine Adducts of <i>tert</i> -4-Hydroxy-2-nonenal as Markers of Endogenous DNA Lesions	FUNG-LUNG CHUNG AND LEI ZHANG	523
45. Transcription-Coupled Repair of 8-Oxoguanine in Human Cells	FLORENCE LE PAGE, JANUARIO CABRAL-NETO, PRISCILLA K. COOPER, AND ALAIN SARASIN	536
46. Nucleobase and 5'-Terminal Probes for DNA Redox Chemistry	XI HU, STEPHEN J. LEE, AND MARK W. GRINSTAFF	548
47. Expressed Sequence Tag Database Screening for Identification of Human Genes	AGNÈS RÖTIG, ARNOLD MUNNICH, AND PIERRE RUSTIN	566
