

Contents

List of Contributors	xi
Preface	xiii
1 Introduction to Photosynthesis <i>Govindjee and Rajni Govindjee</i>	
1. General	2
2. Primary Events	15
3. Secondary Events	26
4. Summary	39
Appendix I. Photosynthesis Literature	40
Appendix II. Constants, Conversion Factors, and Equations	41
References	43
2 Chloroplast Structure and Function <i>Charles J. Arntzen and Jean-Marie Briantais</i>	
1. Introduction	52
2. Chloroplast Morphology	54
3. Localization of Photochemical Activities along the Chloroplast Lamellae	60
4. Substructure of Chloroplast Lamellae	84
5. Substructural Organization of Membrane Functional Components	94
6. Correlation of Membrane Substructure and Photochemical Activities	101
7. Summary	105
References	107

3 Primary Events and the Trapping of Energy*Kenneth Sauer*

1. Introduction	116
2. Chlorophyll Spectroscopy	117
3. Chlorophylls in Photosynthetic Membranes	137
4. Primary Photochemistry of Photosynthesis	155
5. Summary	173
References	175

4 Excitation Energy Transfer and Migration: Theoretical Considerations*R. S. Knox*

1. Excited Electronic States in Condensed Systems	183
2. Energy Transfer	189
3. Random Walks of Excitons on Lattices	203
4. Special Topics	211
5. Summary	216
References	217
Appendix	220

5 Luminescence*J. Lavorel*

1. Introduction	225
2. Methods	226
3. Fluorescence and Luminescence	231
4. Luminescence and States of Photosystem II Centers	240
5. Luminescence and Electroosmotic Properties of the Photosynthetic Membrane	245
6. Kinetics of Luminescence	259
7. A Mechanism and Several Problems	293
8. Summary	298
Appendix I	302
Appendix II	303
Appendix III	304
Appendix IV	307
Appendix V	308
Appendix VI	310
References	314

6 Chlorophyll Fluorescence: An Intrinsic Probe of Photosynthesis

George Papageorgiou

1. Introduction	320
2. The Reaction Center Complex of Photosystem II	325
3. The Kinetics of Chlorophyll <i>a</i> Fluorescence	334
4. Structural Control of the Yield of Chlorophyll <i>a</i> Fluorescence	344
5. Fluorescence Properties of Photosynthetic Mutants	358
6. Fluorescence Properties of Manganese-Deficient Photosynthetic Tissue	362
7. Summary	364
References	366

7 The Electron Transport Chain in Chloroplasts

M. Avron

1. Introduction	374
2. Two Photosystems	374
3. Components of the Electron Transport Chain	377
4. Electron Acceptors, Donors, and Inhibitors	382
5. Summary	384
References	384

8 Oxygen Evolution in Photosynthesis

Pierre Joliot and Bessel Kok

1. Introduction	388
2. Kinetics of O ₂ Evolution	391
3. Related Processes	406
4. Donor Reactions	410
5. Summary	410
References	411

9 Mechanisms of Photophosphorylation

André T. Jagendorf

1. Coupling of Electron Transport and Phosphorylation	414
2. Proton and Ion Movements: Relation to Electron Transport	421
3. Proton Gradients: Relation to ATP Metabolism	446
4. Biochemistry of the Reversible ATPase	460
5. Summary	483
References	485

10 Energy Conservation in the Functional Membrane*H. T. Witt*

1. Introduction	495
2. Light Reactions of Two Chlorophylls	498
3. Function of Plastoquinone	506
4. Electrical Field Generation and Field-Driven Ion Fluxes	511
5. Vectorial Electron Transfer and Proton Translocation	531
6. Phosphorylation in the Electrical Field	535
7. Summary and Conclusions	548
References	551

11 Structure of the Chloroplast Membrane—Relation to Energy Coupling and Ion Transport*Satoru Murakami, J. Torres-Pereira, and Lester Packer*

1. Introduction	556
2. Structure at the Organelle Level	556
3. Structure at the Membrane and Molecular Level	577
4. Summary	613
References	614

12 Molecular Organization of Chlorophyll and Energetics of the Initial Stages in Photosynthesis*Felix F. Litvin and Vitaly A. Sineshchekov*

1. Introduction	620
2. Native Pigment Forms in Higher Plants, Algae, and Photosynthetic Bacteria	620
3. Energy Migration in the Photosynthetic Unit (PSU) and the Role of Triplet States in the Primary Steps of Photosynthesis	636
4. Delayed Light Emission of Photosynthetic Organisms and Model Systems—Energy Traps in Photosynthesis	642
5. Electrical Phenomena in Membrane Structures Connected with Energy Storage	646
6. Energy Storage in Photophosphorylation and Its Coupling with Electron Transfer	650
7. Water Decomposition and Oxygen Evolution in Photosynthesis	653
8. Net Energy Storage and Gas Exchange in Photosynthesizing Plants	654
9. Summary	654
References	656
