

Contents

Contributors	xiii
Preface	xv
Contents of Volume 1	xvii

Part I Product Generation

1 Cell Products: An Overview

J. B. GRIFFITHS

1. Introduction	3
2. Viral Vaccines	4
3. Enzymes	6
4. Hormones and Growth Factors	7
5. Cells and Cell Components	9
6. Conclusion	10
References	11

2 Structure and Synthesis of Cellular Products

JOHN R. STEPHENSON

1. Introduction	13
2. Replication of Viruses and Viral Components	14
3. Molecules Involved in Host Defence Mechanisms	40
References	45

3 Lymphocyte Hybridomas: Production and Use of Monoclonal Antibodies

ALBERT OSTERHAUS AND FONS UYTDEHAAG

1. Introduction	49
2. Immunization	50
3. Fusion Partners	52
4. Hybridization	54
5. Cultivation of Hybridomas	55
6. Screening Methods	58
7. Applications of Monoclonal Antibodies	59
8. Addendum: Preparation of Mouse-Mouse Hybridomas	62
References	66

4 Production of Insect-pathogenic Viruses in Cell Culture

R. A. J. PRISTON

1. Introduction	71
2. Basic <i>in Vitro</i> Methods	73
3. Large-scale Production	75
4. Virus Purification	79
5. Prospects	79
References	80

Part II Downstream Processing

5 Clarification and Sterilisation

G. D. BALL

1. Introduction	87
2. Sedimentation	88
3. Centrifugation	88
4. Filtration	93

5.	Sterility Control	124
	References	125
6	Inactivation of Viruses Produced in Animal Cell Cultures	
	T. R. DOEL	
1.	Introduction	129
2.	Kinetics of Inactivation	131
3.	Inactivants	132
4.	Technical Aspects of Inactivation	141
5.	Innocity Testing	142
6.	Conclusions	145
	References	145
7	Purification of Products from Cultured Animal Cells	
	TERENCE CARTWRIGHT AND M. DUCHESNE	
1.	Introduction	151
2.	Product Safety and Purification Strategy	152
3.	Assay Procedures	154
4.	Scale	155
5.	Purification of Proteins from Animal Cells	155
6.	Purification of Viruses	169
7.	Evaluation of Purity	179
	References	181
8	Concentration	
	PIETER VAN DER MAREL	
1.	Introduction	185
2.	Precipitation	186
3.	Adsorption/Elution	192
4.	Centrifugation	198
5.	Ultrafiltration	204

6.	Summary and Discussion	211
	References	212
9	Virus Fractionation and the Preparation of Sub-unit Vaccines	
	B. ROBERTS	
1.	Introduction	217
2.	Methods of Fractionation	219
3.	Applications	223
4.	Benefits and Advantages of Sub-unit Vaccines	229
	References	231
10	Adjuvants	
	R. BOMFORD	
1.	Introduction	235
2.	Adjuvants in Current Use	236
3.	Possible Future Adjuvants	244
	References	246
11	Formulation and Storage	
	K. A. CAMMACK AND G. D. J. ADAMS	
1.	Introduction	252
2.	Physicochemical Character of Biopolymers	253
3.	Water	255
4.	Salt Solutions and Freezing	257
5.	Biopolymer Modification by Freezing and Freeze-drying	260
6.	Protective Agents and Water Structure	264
7.	Introduction to Practical Aspects of Preserving Complex Biological Products	266
8.	Methods of Dehydration at Elevated Temperatures	266
9.	Freeze-drying	266

10.	Preservation of Viruses and Vaccines	270
11.	Freeze-drying of Blood and Blood Products	281
12.	Freeze-drying of Interferons	281
13.	Preservation of Hormones	282
	References	284

Part III Product Testing

12 Product Testing: An Introduction

J. FONTAINE, A. BRUN, R. CAMAND,
G. CHAPPUIS, C. DURET, M. LOMBARD,
Y. MOREAU, P. PRECAUSTA, M. RIVIERE,
C. ROULET, J.-P. SOULEBOT, AND
C. STELLMANN

1.	Introduction	291
2.	Basic Concepts	292
3.	Product Testing	296
4.	Statistics in Testing	312
	References	316

13 Pyrogenicity and Carcinogenicity Tests

C. N. WIBLIN

1.	Pyrogenicity Testing	321
2.	Carcinogenicity Testing	337
	References	349

14 Field Tests

T. M. POLLOCK

1.	Introduction	355
2.	Efficacy	358

3.	Safety	367
4.	Ethics	370
	References	371

15 Regulatory Agencies: The Control of Medicinal Substances Intended for Use in Humans

J. P. JACOBS

1.	Introduction	373
2.	Early History	374
3.	Control in the United Kingdom	375
4.	Control in the United States	387
5.	Some Similarities and Differences between the Regulatory Systems of the United Kingdom and the United States	392
6.	International and Regional Control	393
7.	Alternative Systems: Multiple Systems or Harmonisation	394
8.	The Regulatory Power of the State: Conflicting Opinions	396
9.	Control Measures for New Products and Substances Produced by Unconventional Methods	398
10.	Trends and Prospects	399
	References	400
	Further Reading	400

Part IV Prospects

16 Genetic Engineering of Animal Cells

F. COLBÈRE-GARAPIN AND A. C. GARAPIN

1.	Introduction	406
2.	Cloning of Viral and Cellular Genes	406
3.	Eukaryotic Viral Vectors	407

4.	Selective Markers	410
5.	Gene Transfer Methods and Recipient Cells	412
6.	Transient Gene Expression	414
7.	Permanent Gene Expression	415
8.	Transgenic Animals	418
9.	Discussion	419
	References	420
17	The Biotechnological Future for Animal Cells in Culture	
	R. E. SPIER AND F. HORAUD	
1.	Introduction	432
2.	Immunobiological Materials	434
3.	Insecticides	445
4.	Enzymes from Animal Cells	446
5.	Hormones	447
6.	Other Proteins Derivable from Animal Cells in Culture	448
7.	Cells as Products	448
8.	Further Development of the Biotechnology Which Produces and Exploits Animal Cells in Culture	451
9.	Conclusion	453
	References	454
	Further Reading	458
	Index	459
