PREFACE	ix
---------------	----

Structure and Regulation of G Protein-Coupled Receptors: The β_2 -Adrenergic Receptor as a Model

SHEILA COLLINS, MARTIN J. LOHSE, BRIAN O'DOWD, MARC G. CARON,
AND ROBERT J. LEFKOWITZ

I. Introduction	1
II. Primary Sequence Analysis of G Protein-Coupled Receptors	2
III. Regulation of Receptor-Mediated Transmembrane Signaling	16
IV. Conclusions	30
References	32

Cellular and Molecular Mechanisms in the Regulation and Function of Osteoclasts

T. J. CHAMBERS AND T. J. HALL

I. Introduction	41
II. Molecular Mechanisms of Osteoclastic Bone Resorption	42
III. Cellular and Hormonal Regulation of Bone Resorption	55
References	72

Expression and Function of the Calcitonin Gene Products

MONE ZAIDI, BALJIT S. MOONGA, PETER J. R. BEVIS,
A. S. M. TOWHIDUL ALAM, STEPHEN LEGON, SUNIL WIMALAWANSA,
IAIN MACINTYRE, AND LARS H. BREIMER

I. Molecular Biology	87
II. Chemistry	104

III. Endocrinology	110
IV. Pharmacology	115
V. Conclusions and Future Perspectives	144
References	146

Pantothenic Acid in Health and Disease

ARUN G. TAHILIANI AND CATHY J. BEINLICH

I. Introduction	165
II. Pantothenic Acid	166
III. Pantothenic Acid in Biological Systems	172
IV. Coenzyme A in Biological Systems	185
V. Altered Pantothenate Metabolism	202
VI. Other Roles of Pantothenic Acid	210
VII. Summary	215
References	217

Biochemical and Physiological Functions of Pyrroloquinoline Quinone

MINORU AMEYAMA, KAZUNOBU MATSUSHITA, EMIKO SHINAGAWA, AND
OSAO ADACHI

I. Introduction	230
II. Occurrence and Distribution of PQQ	233
III. Pyrroloquinoline Quinone as a Growth-Stimulating Substance for Microorganisms	235
IV. Production of PQQ	242
V. Structure and Enzymatic Properties of Quinoprotein Dehydrogenase ..	244
VI. Coupling of Quinoprotein Dehydrogenase to the Respiratory Chain ...	253
VII. Physiological Role of PQQ in Mammals	261
References	263
INDEX	271
