

Contents

Chapter 1

Introduction	1
---------------------------	----------

Richard S. Hanson

1. Distribution in Nature of Reduced One-Carbon Compounds and Microbes that Utilize Them	1
Isolation and Characteristics of Methylotrophic Bacteria	3
2. Ecology of Methylotrophs	7
3. Methylotrophs and Biotechnology	9
4. Genetics of Methylotrophs	11
5. Conclusions	14
References	15

Chapter 2

Taxonomy of Methylotrophic Bacteria	23
--	-----------

Peter N. Green

1. Introduction	23
2. Obligate Methylotrophs	25
2.1. Methane-Utilizing Bacteria	25
2.2. Taxonomic Structure within the Methanotrophs	45
2.3. Obligate Methanol and Methylated Amine Utilizers	53
3. Facultative Methylotrophs	62
3.1. The Genus <i>Methylobacterium</i>	63
3.2. <i>Pseudomonas aminovorans</i> and Related Strains	67
3.3. Other Non-Pink-Pigmented Motile Rods	69
3.4. Nonmotile Rods and Coccobacilli	70
3.5. The Hyphomicrobia	71
3.6. Gram-Positive Facultative Methylotrophs	72

3.7.	Facultative Autotrophs and Phototrophs	72
3.8.	Facultatively Methylophilic Marine Bacteria	74
3.9.	Anaerobic Methanol-Utilizing Bacteria	74
3.10.	Methylophilic Halophilic Methanogens	74
4.	Phylogeny of Methylophilic	75
	References	77

Chapter 3

Methane Oxidation by Methanotrophs: Physiological and Mechanistic Implications	85
---	-----------

Howard Dalton

1.	Introduction	85
2.	Chemical Versus Biological Catalysis	86
3.	Particulate Methane Monooxygenase	88
4.	Soluble Methane Monooxygenase	90
4.1.	The Three Protein Components	90
4.2.	The Hydroxylase	93
5.	Kinetic Mechanism of the MMO Reaction	98
6.	Substrate Specificity—Mechanistic Implications	99
6.1.	Oxygen or Hydrocarbon Activation?	99
6.2.	Substrate Oxidation	101
6.3.	Mechanism of Action of MMO	103
7.	The Physical Nature of the Active Site	108
	References	111

Chapter 4

The Genetics and Molecular Biology of Obligate Methane-Oxidizing Bacteria	115
--	------------

J. Colin Murrell

1.	Introduction	115
2.	Mutagenesis	116
2.1.	Conventional Mutagenesis	116
2.2.	Dichloromethane Mutagenesis	117

3.	Gene Transfer Systems	118
3.1.	Plasmids in Methanotrophs	118
3.2.	Bacteriophages of Methanotrophs	120
3.3.	Conjugation Systems	120
3.4.	Transformation Studies and Electroporation	123
4.	Molecular Biology of Methanotrophs	123
4.1.	Nitrogen Metabolism Genes	124
4.2.	C ₁ -Specific Genes	130
5.	Future Developments	142
	References	144

Chapter 5

The Physiology and Biochemistry of Aerobic Methanol-Utilizing Gram-Negative and Gram-Positive Bacteria	149
---	------------

L. Dijkhuizen, P. R. Levering, and G. E. de Vries

1.	Introduction	149
2.	The Ribulose Monophosphate Cycle of Formaldehyde Fixation	151
2.1.	Discovery and General Properties	151
2.2.	Occurrence of the RuMP Pathway of Formaldehyde Fixation	154
2.3.	Distribution of Variants of the RuMP Pathway	156
3.	Biochemistry of Enzymes Involved in Methanol Oxidation ..	157
3.1.	Methanol Dehydrogenase in Gram-Negative Bacteria	157
3.2.	Methanol Dehydrogenase in Gram-Positive Bacteria ..	158
3.3.	Oxidation of Formaldehyde and Formate	160
3.4.	Oxidation of Formaldehyde in Methylotrophs Using the RuMP Cycle	162
3.5.	Hexulosephosphate Synthase and Hexulosephosphate Isomerase	166
4.	Metabolic Regulation	168
4.1.	Regulation of Methanol Dehydrogenase Synthesis	168
4.2.	Regulation of the RuMP Cycle of Formaldehyde Fixation	169
	References	173

Chapter 6

The Genetics and Molecular Biology of Methanol-Utilizing Bacteria 183

Mary E. Lidstrom

1.	Introduction	183
2.	Plasmids in Methanol-Utilizing Bacteria	186
3.	Mutagenesis in <i>Methylobacillus flagellatum</i>	187
4.	Transposon Mutagenesis	187
5.	Chromosomal Mapping	188
5.1.	Auxotrophy Markers in <i>Methylophilus</i> Strains	189
5.2.	R-Prime Mapping in <i>Methylobacterium extorquens</i> AM1	189
5.3.	Hfr-Like Donors in <i>M. flagellatum</i>	190
6.	Expression of Foreign Genes in Methanol-Utilizing Bacteria	191
7.	Methanol Oxidation Genes	191
7.1.	Localization and Identification of Mox Genes in <i>Methylobacterium</i> Strains	192
7.2.	Phenotypic Characterization of Mox Mutants in <i>Methylobacterium</i> Strains	194
7.3.	Characterization of Mox Genes	196
8.	PQQ Synthesis Genes	199
9.	Genes for Assimilation of C ₁ Units	200
9.1.	Serine Cycle Genes	200
9.2.	Ribulose Monophosphate Cycle Genes	202
10.	Summary and Future Prospects	202
	References	203

Chapter 7

Methanol-Utilizing Yeasts 207

W. de Koning and W. Harder

1.	Introduction	207
2.	Isolation and Properties	209
2.1.	Enrichment and Isolation	209
2.2.	Taxonomy	210

3.	Physiology and Biochemistry.....	213
3.1.	Enzymology and Compartmentation of Methanol Metabolism.....	213
3.2.	Regulation of the Synthesis and Activity of Enzymes Involved in Methanol Metabolism.....	218
3.3.	Regulation of the Flux of Formaldehyde over Dissimilatory and Assimilatory Pathways.....	220
4.	Genetics and Molecular Biology.....	222
4.1.	Mutagenesis and Auxotrophic Mutants.....	222
4.2.	Classical Genetics.....	223
4.3.	Methanol Pathway Mutants.....	224
4.4.	Properties of Methanol-Regulated Genes.....	225
4.5.	Transformation Systems and Vectors.....	226
4.6.	Expression of Heterologous Genes.....	227
5.	Applications.....	228
5.1.	General Economics.....	228
5.2.	Single-Cell Protein.....	229
5.3.	Enzymes.....	231
5.4.	Bulk and Fine Chemicals.....	232
5.5.	Hosts for Heterologous Gene Expression.....	234
6.	Concluding Remarks.....	235
	References.....	236

Chapter 8

Biotechnological and Applied Aspects of Methane and Methanol Utilizers.....	245
--	------------

David J. Leak

1.	Introduction.....	245
2.	Biotechnology and Economics.....	246
3.	Processes Highly Dependent on Substrate Economics.....	247
3.1.	Single-Cell Protein.....	248
3.2.	SCP from Methanol.....	249
4.	Metabolic Products from Methylobacteria.....	256
4.1.	Amino Acids.....	257
4.2.	Vitamins and Coenzymes.....	261
4.3.	Carboxylic Acids.....	262

5.	Microbial Polymers from C ₁ Substrates	262
5.1.	Polysaccharides	263
5.2.	Poly- β -hydroxybutyrate (PHB)	264
6.	Metabolic Activities and Enzymes from Methylootrophs	265
6.1.	Cofactor Regeneration	265
6.2.	Analysis and Biosensors	266
6.3.	Methylootrophs as Biocatalysts. 1. Synthesis	267
6.4.	Methylootrophs as Biocatalysts. 2. Biodegradation	271
7.	The Future Outlook	272
	References	273

Species Index	281
