

CONTENTS

Microinjection: A Technique to Study Inhibition of HIV-1 Replication Mediated by Antisense RNA and Parvovirus genes	1
G. Sczakiel, I. Oelze, and K. Rittner	
How to Make Glass Microtools for the Injection of Isolated Plant Sperm Cells into Embryo Sac Cells Using a Microforge	11
C.J. Keijzer	
Application of the Firefly Luciferase Reporter Gene to Microinjection Experiments in <i>Xenopus</i> Oocytes	19
M.R.H. White, M. Braddock, E.D. Byles, L. Amet, A.J. Kingsman, and S.M. Kingsman	
Application of Confocal Microscopy for the Study of Neuronal Organization in Human Cortical Areas After Microinjection of Lucifer Yellow	29
P.V. Belichenko, A. Dahlstrom, and P. Sourander	
The Dye-Transfer Assay Permits the Evaluation of the Modulation of Junctional Communication by Chemicals: Results Obtained Employing a Highly Sensitive Video-Recording System Connected with the Microinjector	37
G. Mazzoleni, A. Camplani, P. Teldò, S. Tanganelli, and G. Ragnotti	
Comparison of Fluorescent Dye Transfer in Intercellular Communication Studies Using Scrape-Loading and Microinjection Techniques	45
E. Honikman-Leban and M.M. Shahin	
Characterization of the <i>Zea mays</i> Embryo Sac Using Fluorescent Probes and Microinjection of Lucifer Yellow into the Female Cells	53
E. Matthys-Rochon, C. Digonnet, and C. Dumas	

Fluorescent Probes - Where Do They Go in Cells, and Why?	61
R.W. Horobin and F. Rashid-Doubell	
Fluorescent Phospholipids in Membrane and Lipoprotein Research	67
A. Hermetter, R. Gorges, J. Loidl, and F. Paltauf	
Selection of Fluorescent Golgi Complex Probes Using Structure-Activity Relationship Models	73
F. Rashid-Doubell and R.W. Horobin	
Fluorescent Probes for the Assessment of the Subcellular Effects of Chemicals and Disease Processes <i>In Vivo</i> and <i>In Vitro</i>	79
P.H. Bach, C.H. Reynolds, and S. Brant	
Whole-Cell Patch-Clamping: Introducing Substances into Cells During Electrical Measurements from the Cell Membrane: A Review of Potential Difficulties in Plant and Animal Cells	99
B. Van Duijn, C. Ince, Z. Wang, A.F. Weidema, K.R. Libbenga and D.L. Ypey	
Fluorescent Analysis of Replication and Intermediates of Chromatin Folding in Nuclei of Mammalian Cells	111
G. Banfalvi	
Autofluorescence in Potato Tuber Phellum: Location and Time Course of Appearance During Tuber Formation	121
T. Hendricks, J.W. van Eck, and H.A. Verhoeven	
Flow Cytometric Assessment of Gentamicin Nephrotoxicity in Established Renal Cell Lines	129
H. Mc Glynn, E. Healy, T. Bedell, and M.P. Ryan	
The Use of the Fluorescent Probe Fura-2 for Intracellular Free Calcium Measurements: Some Methodological Aspects	133
A. Wiltink, A. van der Laarse, N.P.M. Herrmann-Erlee, J.M. van der Meer, and D.L. Ypey	
Studies on the Effects of Peroxisome Proliferators as Novel Ca^{2+} Mobilizing Agents using Indo-1-Loaded Hepatocytes	143
A.M. Bennett, O.P. Flint, and G.M. Williams	
Confocal Fluorescence Ratio Imaging of pH in Plant Cells	153
M.D. Fricker, M.R. Blatt, and N.S. White	
Analysis of the Calcium and Phosphorus Distribution in Predentine Tissue of Rat Incisors	165
H.P. Wiesmann, U. Plate, H.J. Höhling, and R.H. Barckhaus	

Quantitative Localisation of HIV Proteins in Mammalian Cells	173
L.E.A. Amet, M.R.H. White, J.A. Sutton, L.J. Capsey, M. Braddock, A.J. Kingsman, and S.M. Kingsman	
Concepts of the Cytometric Approach	185
S.C. Brown	
Laser Microperforation of <i>Medicago sativa</i> Root Hair Cells	197
G. Leitz, A. Kurkdjian, P. Manigault, A. Harim and K.O. Greulich	
Application of pH-sensitive Fluorescent Dyes to Fungi	207
I.R. von Recklinghausen, D. Molenaar, W.N. Konings, and J. Visser	
Very Low Level Fluorescence Detection and Imaging Using a Long Exposure Charge Coupled Device System	221
M.H.F. Wilkinson, G.J. Jansen, and D. van der Waaij	
Modulation of Nucleus Formation in Mouse Oocytes Fused with Early and Late G2 Blastomeres	231
C. Wojcik, E.T. Mystkowska, W. Sawicki, and A. Komar	
Index	239
