How to Protect Yourself in the Laboratory—Safety Rules	1
Suggested Apparatus for Student Desks	5
Checkout Procedure	7
Important Techniques and Common Laboratory Operations	9
Measurement of Mass	9
Types of Balances	9
Single-Arm Balances	9
Top-Loading Balances	10
Care of the Balance	10
Weighing Solids	10
Weighing Liquids	13
Volumetric Measurements	13
Graduated Cylinders, Burets, and Pipets	13
Calibrated Beakers' and Flasks	15
Calibrated Test Tubes and Medicine Droppers	15
Volumetric Flasks	16
Making Solutions, Including Dilutions	16
Preparation of Solutions	16
Making Dilutions	17
Methods of Separating an Insoluble Solid from a Liquid	18
Filtration	18
Decantation	19
Care of Laboratory Equipment	19
General Rules	19
Washing Glassware	20
The Burner	20
Heating Liquids and Solids	22
Working with Glass Tubing and Rods	23
Cutting and Fire Polishing	23
Bending Glass Tubing	24
Fitting Glass Tubing to a Rubber Stopper	25
Making a Tapered End on a Tube: Making	
a Dropping Pipet	26
Making a Capillary	26
Reporting Data	27
Precision versus Accuracy	27
Significant Figures	27
Significant Figures and Direct Results	27
Significant Figures and Indirect Results:	
Relative Uncertainty	29

The International System (SI) of Units—Metric Quantities 31

- Experiment 1 The Measurement of Volume 31
Experiment 2 The Measurement of Mass (Weight); Determination of Density 37

Energy and Matter: Physical and Chemical Properties and Changes 41

- Experiment 3 Comparison of the Physical Properties of Some Compounds With Those of Their Component Elements 41
Experiment 4 Evidence of Chemical Reaction 45
Experiment 5 Heat Energy and Chemical Changes 49
Experiment 6 Chemical Change: Oxidation and Reduction 53
Experiment 7 Ionic and Molecular Compounds 57

Stoichiometric Relationships: Moles, Grams, and Balanced Equations 61

- Experiment 8 Conservation of Mass During a Chemical Change 61
Experiment 9 Weight Relations in Chemical Changes 65

Behavior of Matter in the Gaseous State 69

- Experiment 10 The Partial Pressure of Oxygen in the Air (Percent Oxygen in Air)

Solutions and the Kinetic-Molecular Theory 75

- Experiment 11 Factors Affecting Solubility 75
Experiment 12 Factors Affecting the Rate of Dissolution; Kinetic-Molecular Theory 79
Experiment 13 Reprecipitation, Rapid and Slow 83

Le Chatelier's Principle and the Effect of Mass Action on Dynamic Equilibrium 87

- Experiment 14 Reaction to Stress by Systems in Dynamic Equilibrium 87

Properties of Water and Solutions 93

- Experiment 15 Surface Tension and Surfactants 93
Hydrates 97
Experiment 16 Hydrates of Copper Sulfate and Calcium Sulfate (Plaster of Paris) 97

Colloidal Dispersions 103

- Experiment 17 Colloidal Dispersions Versus True Solutions 103
Experiment 18 Dialysis 109

Behavior of Ionic Substances in Aqueous Solution 113

- Experiment 19 Reactions of Hydronium Ions 113
Experiment 20 Conductivity (The Ability of Ions to Carry an Electric Current) 117
Experiment 21 Predicting Reactions Using Solubility Rules 123

Hydrogen Ion—Its Determination 127

- Experiment 22 Determination of pH 127

Hydrogen Ion—Its Control 131

Experiment 23 Hydrolysis of Salts: How Salts Can Change the pH of Aqueous Systems 131

Buffers: How Salts Can Stabilize pH 135

Experiment 24 Testing a Substance For Buffering Ability and Buffering Capacity 135

Total Acidity: Its Determination 139

Experiment 25 Acid—Base Titration 139

Organic Chemistry 147

Experiment 26 Studies in Structural Organic Chemistry: Isomerism 149

Experiment 27 Hydrocarbons 153

Experiment 28 Exercises in Structural Organic Chemistry: Hydrocarbons 159

Experiment 29 Structure and Solubility (Polarity) 161

Experiment 30 Oxidation of Alcohols (Primary, Secondary, Tertiary) 165

Experiment 31 Exercises in Structural Organic Chemistry: Alcohols, Thioalcohols, Ethers, and Amines 169

Experiment 32 Basicity of Amines: A Comparison With Ammonia 171

Experiment 33 Oxidation of Carbonyl Compounds 175

Experiment 34 Carboxylic Acids and Their Salts 179

Experiment 35 Esterification: Synthesis of Methyl Salicylate (Oil of Wintergreen) and Other Pleasant Odors 181

Experiment 36 Aspirin 185

Experiment 37 Saponification: The Saponification of Methyl Benzoate 189

Experiment 38 Alkaline Hydrolysis of an Amide: Action of Aqueous Sodium Hydroxide on Benzamide 191

Experiment 39 Exercises in Structural Organic Chemistry: Carbonyl Compounds 193

Biological Chemistry 195

Carbohydrates 195

Experiment 40 Tests for Carbohydrates 195

Experiment 41 Hydrolysis of Sucrose and of Starch 201

Experiment 42 Exercises in Structural Biochemistry: Carbohydrates 205

Lipids 207

Experiment 43 Tests for Lipids 207

Experiment 44 Saponification: Preparation and Properties of a Soap; Properties of Soaps Versus Detergents 211

Proteins 217

Experiment 45 Reactions of Proteins 217

Experiment 46 pH and Protein Solubility: The Isoelectric Point 223

Experiment 47 Exercises in Structural Biochemistry: Lipids, Amino Acids, and Peptides 229

Enzymes and Digestion 231

Experiment 48 Factors Affecting Enzymatic Activity 231

Urine 241

Experiment 49 Normal and Pathological Urine Analysis 241

Chemistry of Heredity 247

Experiment 50 Exercise in Structural Biochemistry: Elements of Protein Synthesis 247
