	<i>page</i>
Editors preface	ix
GEORGES N. COHEN	
The long excursion of an enzymologist in the study of regulatory mechanisms	1
P. W. POSTMA	
Catabolite repression and related processes	21
STEPHEN J. W. BUSBY	
Positive regulation in gene expression	51
YEN-SEN HO, DANIEL WULFF AND MARTIN ROSENBERG	
Protein-nucleic acid interactions involved in transcription activation by the phage lambda regulatory protein cII	79
DAVID M. J. LILLEY	
The genetic control of DNA supercoiling, and vice versa	105
ALAN D. GROSSMAN AND RICHARD LOSICK	
RNA polymerase heterogeneity in bacteria	127
SYDNEY KUSTU, KATHERINE SEI AND JOHN KEENER	
Nitrogen regulation in enteric bacteria	139
JILL L. GALLOWAY AND TERRY PLATT	
Control of prokaryotic gene expression by transcription termination	155
CHRISTOPHER F. HIGGINS AND NOEL H. SMITH	
Messenger RNA processing, degradation and the control of gene expression	179
MASAYASU NOMURA	
Regulation of the synthesis of ribosomes and ribosomal components in <i>Escherichia coli</i> : translational regulation and feedback loops	199

NANCY KLECKNER	
Mechanism and regulation of Tn10 and IS10 transposition	221
DAVID SHERRATT	
Control of plasmid maintenance	239
DAVID A. HOPWOOD, MERVYN J. BIBB, KEITH F. CHATER, GARY R. JANSSEN, FRANCISCO MALPARTIDA AND COLIN P. SMITH	
Regulation of gene expression in antibiotic-producing <i>Streptomyces</i>	251
J. G. WILLIAMS, C. J. PEARS, K. A. JERMYN, D. M. DRISCOLL, H. MAHBUBANI AND R. R. KAY	
The control of gene expression during cellular differentiation of <i>Dictyostelium discoideum</i>	277
INDEX	299
