

Contents

Foreword	Charles R. Cantor	iii
Preface		vii
Contributors		xv
Strategies for Gene Mapping		
1.	Strategies and Technologies for Comparative Gene Mapping	3
	<i>James E. Womack</i>	
✓ 2.	Mapping Quantitative Trait Loci Affecting Traits of Economic Importance in Animal Populations Using Molecular Markers	21
	<i>Morris Soller</i>	
3.	The Use of Reference Families for Genome Mapping in Domestic Livestock	51
	<i>D. J. S. Hetzel</i>	
		xi

- 4 From Linked Marker to Disease Gene:
Current Approaches 65

David L. Nelson

Techniques for Gene Mapping

- ✓ 5 Hypervariable Minisatellites and Their Use
in Animal Breeding 89

Michel Georges

- 6 In Situ Hybridization and High-Resolution
Banding of Chromosomes 113

*C. Larry Chrisman, Glenn P. Briley,
and Geoffrey C. Waldbieser*

- 7 Pulsed-Field Gel Electrophoresis and Its
Application in the Physical Analysis of the
Bovine Major Histocompatibility Complex 127

*Albert Bensaid, John R. Young, Anita Kaushal,
and Alan J. Teale*

- 8 Chromosomal Assignment of Marker Loci to
Monitor Marker Spacing 159

*Ruedi Fries, Sabina Solinas, and Asoka
Gunawardana*

9. Data Analysis for Linkage Studies 177

*Mark Lathrop, P. Cartwright, S. Wright,
Y. Nakamura, and Michel Georges*

Applications of Gene Mapping

- ✓ 10. Genomic Genetics and Plant Genetic Improvement 201

Jacques S. Beckmann

Contents

xiii

11. **Restriction Fragment Length Polymorphism Applications in Human Chromosome Mapping** 231
Paul C. Watkins
12. **The Family of Bovine Prolactin-Related Genes Transcribed in the Placenta** 257
Mark A. Kessler and Linda A. Schuler
13. **Mapping Genes for Resistance to Infectious Diseases in Animals** 283
Harris A. Lewin, Penelope A. Clamp, Jonathan E. Beever, and Lawrence B. Schook
- ✓ 14. **Strategies for the Improvement of Animal Production Using Marker-Assisted Selection** 305
Joel I. Weller and Rohan L. Fernando
