Conference Participants, v
Preface, xi

INTRODUCTION

The Biology of Simian Virus 40 and Polyomavirus	M. Fried and C. Prives	1
Papillomaviruses: Retrospectives and Prospectives	T.R. Broker and M. Botchan	17
Adenovirus Gene Expression and Replication: A Historical View	U. Pettersson and R.J. Roberts	37
Herpesviruses		
I. Genome Structure and Regulation	G.S. Hayward	59
II. Latent and Oncogenic Infections by Human Herpesviruses	B. Sugden	77

TRANSCRIPTION

Duplications within Mutated SV40 Enhancers That Restore Enhancer Function	W. Herr, J. Clarke, B. Ondek, A. Shepard, and H. Fox	95
Identification of Cellular Proteins That Interact with Polyomavirus or Simian Virus 40 Enhancers	J. Piette, S. Cereghini, M.-H. Kryszke, and M. Yaniv	103
<i>Cis</i> - and <i>Trans</i> -acting Factors Regulating Gene Expression from the Polyomavirus Late Promoter	F.G. Kern, S. Pellegrini, and C. Basilio	115
Alternate Roles of Simian Virus 40 Sequences in Viral Gene Expression in Different Types of Cells	C. Prives, L. Covey, T. Michaeli, E.D. Lewis, and J.L. Manley	125
Enhanced Transcriptional Activity of HeLa Cell Extracts Infected with Adenovirus Type 2	S.J. Flint and K. Leong	137
DNA-binding Specificity of USF, a Human Gene-specific Transcription Factor Required for Maximum Expression of the Major Late Promoter of Adenovirus	M. Sawadogo and R.G. Roeder	147
The TGGCA Protein Binds In Vitro to DNA Contained in a Nuclease-hypersensitive Region That Is Present Only in Active Chromatin of the Lysozyme Gene	A.E. Sippel, H.P. Fritton, M. Theisen, U. Borgmeyer, U. Strech-Jurk, and T. Igo-Kemenes	155

REGULATION OF TRANSCRIPTION

Regulation of Herpes Simplex Virus 1 Gene Expression: The Effect of Genomic Environments and Its Implications for Model Systems	J.L.C. McKnight, T.M. Kristie, S. Silver, P.E. Pellett, P. Mavromara-Nazos, G. Campadelli-Fiume, M. Arsenakis, and B. Roizman	163
Multiple <i>Trans</i> -acting Proteins of Herpes Simplex Virus That Have Different Target Promoter Specificities and Exhibit Both Positive and Negative Regulatory Functions	P. O'Hare, J.P. Mosca, and G.S. Hayward	175
Evidence That Polymerase II Transcription Requires Interaction between Proteins Binding to Control Sequences	M.R. Loeken, K. Khalili, G. Khoury, and J. Brady	189
<i>Sequences and Factors Involved in E1A-mediated Transcription Activation</i>	I. Kovesdi, R. Reichel, M. Imperiale, R. Hart, and J.R. Nevins	197
Intricate Sequence Elements Involved in Constitutive and <i>Trans</i> -activated Expression from the Adenovirus Early E2A Promoter Region	H. Boeuf, D. Zajchowski, P. Jalinot, C. Goding, B. Devaux, C. Hauss, and C. Kédinger	203
Transcriptional Control by the Adenovirus Type-5 E1A Proteins	D.H. Smith, A. Velcich, D. Kegler, and E. Ziff	217
Identification of the DNA Sequences in the Adenovirus E2A Late Promoter That Are Responsive to E1A Repression	R. Guilfoyle, M.R. Fontana, M. Mora, W. Osheroff, and M. Rossini	227
A Genetic Analysis of Bovine Papillomavirus Type-1 Transformation and Plasmid-maintenance Functions	M.S. Rabson, Y.C. Yang, and P.M. Howley	235

RNA PROCESSING AND TRANSLATION

Analysis of Splicing of mRNA Precursors In Vitro	P.A. Sharp	245
Analysis of mRNA Splicing Using Fractions Isolated from HeLa Cells and Mutant Adenovirus Pre-mRNAs	K.K. Perkins, H.M. Furneaux, G.A. Freyer, J. Arenas, L. Pick, and J. Hurwitz	249
The Pathway of SV40 Early mRNA Splicing	J.L. Manley, J.C.S. Noble, M. Chaudhuri, X.-Y. Fu, T. Michaeli, L. Ryner, and C. Prives	259
Adenovirus as a Model for Transcription-termination Studies	E. Falck-Pedersen, J. Logan, T. Shenk, G. Galli, and J.E. Darnell, Jr.	267
The Adenovirus E1B 495R Protein Plays a Role in Regulating the Transport and Stability of the Viral Late Messages	J. Williams, B.D. Karger, Y.S. Ho, C.L. Castiglia, T. Mann, and S.J. Flint	275

Functional Analysis of the Adenovirus E1B 55K Polypeptide	S. Pilder, K. Leppard, J. Logan, and T. Shenk	285
The Control of Protein Synthesis by Adenovirus VA RNA	R.P. O'Malley, T.M. Mariano, J. Siekierka, W.C. Merrick, P.A. Reichel, and M.B. Mathews	291
TRANSFORMATION		
Changes in the Expression of Cellular Genes in Cells Immortalized or Transformed by Polyomavirus	N. Glaichenhaus, P. Léopold, P. Masiakowski, P. Vaigot, M. Zerlin, M. Julius, K.B. Marcu, and F. Cuzin	303
The Organization and Expression of Integrated Polyomavirus DNA in Transformed Cells	M. Fried, J.B. Wilson, T. Williams and C. Norbury	309
The Role of Adenovirus E1A in Transformation and Oncogenicity	R.T.M.J. Vaessen, A.G. Jochemsen, J.L. Bos, R. Bernards, A. Israël, P. Kourilsky, and A.J. van der Eb	317
Production of a Cell Proliferation Factor by Baby Rat Kidney Cells Infected with Adenovirus Type-5 12S Virus	M.P. Quinlan and T. Grodzicker	327
Studies on Adenovirus Type-12 E1 Region: Gene Expression, Transformation of Human and Rodent Cells, and Malignancy	P.H. Gallimore, J. Williams, D. Brétting, R.J.A. Grand, M. Rowe, and P. Byrd	339
The E1 Region of Human Adenovirus Type 12 Determines the Sites of Virally Induced Chromosomal Damage	D.M. Durnam, P.P. Smith, J.C. Menninger, and J.K. McDougall	349
Herpes Simplex Virus and Cytomegalovirus: Unconventional DNA Tumor Viruses	D.A. Galloway, F.M. Buonaguro, C.R. Brandt, and J.K. McDougall	355
Expression of Simian Virus 40 Oncogenes in F9 Embryonal Carcinoma Cells, in Transgenic Mice, and in Transgenic Embryos	F. Kelly, O. Kellermann, F. Mechali, J. Gaillard, and C. Babinet	363
TRANSFORMING PROTEINS		
Transformation-associated Domains of Polyomavirus Middle T Antigen	W. Markland, S.H. Cheng, B.L. Roberts, R. Harvey, and A.E. Smith	373
DNA Rearrangement and the Role of Viral Origin in SV40-transformed Mouse Cells	S. Chen and R. Pollack	381
Monoclonal Antibody Analysis of the SV40 Large T Antigen-p53 Complex	D.P. Lane and J. Gannon	387

Identification and Characterization of the Sites Phosphorylated in the Cellular Tumor Antigen p53 from SV40-transformed 3T3 Cells and in the DNA-binding Protein from Adenovirus 2	C.W. Anderson, A. Samad, and R.B. Carroll	395
The Role of Small T Antigen in the Simian Virus 40 Transforming Mechanism	I. Bikel, H. Mamon, E.L. Brown, J. Boltax, M. Agha, and D.M. Livingston	405
Growth-stimulating Activity of Polyomavirus Small T Antigen	Y. Ito, T. Noda, M. Satake, T. Robins, and M. Gonzatti-Haces	413
Nuclear Localization and Gene Activation in <i>Trans</i> Are Mediated by Separate Domains of the Adenovirus E1A Proteins	B. Krippel, B. Ferguson, N. Jones, M. Rosenberg, and H. Westphal	419
Heterogeneity of Adenovirus E1A Proteins Is Due to Posttranslational Modification of the Primary Translation Products of the 12S and 13S mRNAs	C. Stephens, B.R. Franza, Jr., C. Schley, and E. Harlow	429
Experimental Induction of Autocrine Synthesis of GM-CSF Results in Leukemogenicity	T.J. Gonda, D. Metcalf, R.A. Lang, N.M. Gough, and A.R. Dunn	435
REPLICATION		
DNA Affinity Purification of Nuclear Factor I and Characterization of Its Recognition Site	P.J. Rosenfeld, R.J. Wides, M.D. Challberg, and T.J. Kelly	443
DNA-Protein Interactions at the Replication Origins of Adenovirus and SV40	B. Stillman, J.F.X. Diffley, G. Prelich, and R.A. Guggenheimer	453
In Vitro Replication of DNA Containing the Simian Virus 40 Origin	Y. Murakami, C.R. Wobbe, L. Weissbach, F.B. Dean, and J. Hurwitz	465
A New Biochemical Property of SV40 Large T Antigen	E. Fanning and B. Vogt	471
A Sensitive and Rapid Assay for DNA-binding Proteins Exemplified by a Functional Analysis of the Inverted Terminal Repetition of Adenovirus DNA	R. Schneider, T. Dörper, I. Gander, R. Mertz, and E.L. Winnacker	477
Studies on the Adenovirus DNA-binding Protein	D.F. Klessig, S.A. Rice, V. Cleghon, D.E. Brough, J.F. Williams, and C. Voelkerding	485
<i>Cis</i> -acting Signals Involved in the Replication and Packaging of Herpes Simplex Virus Type-1 DNA	N.D. Stow, M.D. Murray, and E.C. Stow	497
Multiple Pathways for Simian Virus 40 Nonhomologous Recombination	E. Winocour, T. Chitlaru, K. Tsutsui, R. Ben-Levy, and Y. Shaul	509

A 2.7-kb Rearranged DNA Fragment from Epstein-Barr Virus Capable of Disruption of Latency	J.K. Countryman, H. Jenson, E. Grogan, and G. Miller	517
Sequence-specific Interactions of Cellular Nuclear Factor I and Epstein-Barr Virus Nuclear Antigen with Herpesvirus DNAs	D.R. Rawlins, P.J. Rosenfeld, T.J. Kelly, Jr., G.R. Milman, K.-T. Jeang, S.D. Hayward, and G.S. Hayward	525
Characterization of the Genetic Signals Required for Epstein-Barr Virus Plasmid Maintenance	S. Lupton and A.J. Levine	543
Copy Number Control of DNA Replication in SV40-BPV Hybrid Replicons	J.M. Roberts and H. Weintraub	555
The Dual Role of the Polyomavirus Enhancer in Transcription and DNA Replication	J.A. Hassell, W.J. Muller, and C.R. Mueller	561
PAPILLOMAVIRUSES		
Cellular Transformation by Bovine Papillomavirus	J.T. Schiller, E.J. Androphy, W.C. Vass, and D.R. Lowy	571
Expression of Human Papillomavirus Type-18 DNA in Cervical Carcinoma Cell Lines	E. Schwarz and A. Schneider-Gädicke	581
Human Papillomaviruses of the Genital Mucosa: Electron Microscopic Analyses of DNA Heteroduplexes Formed with HPV Types 6, 11, and 18	T.R. Broker and L.T. Chow	589
Anatomy and Expression of the Transforming Region of Bovine Papillomavirus Type 1	U. Pettersson, P. Bergman, H. Ahola, M. Ustav, A. Stenlund, J. Zabielski, B. Vennström, and J. Moreno-Lopez	595
Transcription of Human Papillomavirus Types 1 and 6	L.T. Chow, A.J. Pelletier, R. Galli, U. Brinckmann, M. Chin, D. Arvan, D. Campanelli, S. Cheng, and T.R. Broker	603
Author Index,	615	
Subject Index,	617
