

Contents

Preface.....	0
CHAPTER 1. The Burton Assay for DNA	1
<i>Jaap H. Waterborg and Harry R. Matthews</i>	
CHAPTER 2. DABA Fluorescence Assay for Submicrogram Amounts of DNA.....	5
<i>Theodore Gurney, Jr. and Elizabeth G. Gurney</i>	
CHAPTER 3. Preparation of "RNase-Free" DNase by Alkylation.....	13
<i>Theodore Gurney, Jr. and Elizabeth G. Gurney</i>	
CHAPTER 4. The Isolation of Satellite DNA by Density Gradient Centrifugation.....	21
<i>Craig A. Cooney and Harry R. Matthews</i>	
CHAPTER 5. The Isolation of High Molecular Weight Eukaryotic DNA	31
<i>C. G. P. Mathew</i>	
CHAPTER 6. Preparation of Lyophilized Cells to Preserve Enzyme Activities and High Molecular Weight Nucleic Acids.....	35
<i>Theodore Gurney, Jr.</i>	
CHAPTER 7. Agarose Gel Electrophoresis of DNA.....	43
<i>Stephen A. Boffey</i>	
CHAPTER 8. Autoradiography of Gels Containing ³² P	51
<i>Verena D. Huebner and Harry R. Matthews</i>	

CHAPTER 9. Detection of Specific DNA Sequences—The Southern Transfer	55
<i>C. G. P. Mathew</i>	
CHAPTER 10. The Extraction and Isolation of DNA from Gels.....	67
<i>Wim Gaastra and Per Linå Jørgensen</i>	
CHAPTER 11. One-Dimensional Electrophoresis of Nucleic Acids in Agarose Using Denaturation with Formaldehyde and Identification of ³ H-Labeled RNA by Fluorography	77
<i>Theodore Gurney, Jr.</i>	
CHAPTER 12. Gel Electrophoresis of RNA in Agarose and Polyacrylamide Under Nondenaturing Conditions	93
<i>R. McGookin</i>	
CHAPTER 13. The Extraction of Total RNA by the Detergent and Phenol Method.....	101
<i>Robert J. Slater</i>	
CHAPTER 14. RNA Extraction by the Proteinase K Method	109
<i>R. McGookin</i>	
CHAPTER 15. RNA Extraction by the Guanidine Thiocyanate Procedure	113
<i>R. McGookin</i>	
CHAPTER 16. The Purification of Poly (A)-Containing RNA by Affinity Chromatography	117
<i>Robert J. Slater</i>	
CHAPTER 17. Messenger RNA Fractionation on Neutral Sucrose Gradients	121
<i>R. McGookin</i>	
CHAPTER 18. The Estimation of mRNA Content by Poly (U) Hybridization.....	125
<i>Robert J. Slater</i>	

CHAPTER 19. DNA Directed In Vitro Protein Synthesis with <i>Escherichia coli</i> S-30 Extracts	131
<i>Jytte Josephsen and Wim Gaastra</i>	
CHAPTER 20. In Vitro Translation of Messenger RNA in a Wheat Germ Extract Cell-Free System.....	137
<i>C. L. Olliver, A. Grobler-Rabie, and C. D. Boyd</i>	
CHAPTER 21. In Vitro Translation of Messenger RNA in a Rabbit Reticulocyte Lysate Cell-Free System.....	145
<i>C. L. Olliver and C. D. Boyd</i>	
CHAPTER 22. Immunoprecipitation of In Vitro Translation Products with Protein A Bound to Sepharose.....	157
<i>C. L. Olliver and C. D. Boyd</i>	
CHAPTER 23. In Vitro Continuation of RNA Synthesis Initiated In Vivo.....	161
<i>Theodore Gurney, Jr.</i>	
CHAPTER 24. Synthesis of Double-Stranded Complementary DNA from Poly(A) ⁺ mRNA	169
<i>R. McGookin</i>	
CHAPTER 25. Plasmid DNA Isolation by the Cleared Lysate Method.....	177
<i>Stephen A. Boffey</i>	
CHAPTER 26. Plasmid DNA Isolation (Sheared Lysate Method).....	185
<i>J. W. Dale and P. J. Greenaway</i>	
CHAPTER 27. Small-Scale Plasmid DNA Preparation	191
<i>J. W. Dale and P. J. Greenaway</i>	

CHAPTER 28. Preparation of Chromosomal DNA from <i>E. coli</i>	197
<i>J. W. Dale and P. J. Greenaway</i>	
CHAPTER 29. Preparation and Assay of Phage Lambda	201
<i>J. W. Dale and P. J. Greenaway</i>	
CHAPTER 30. Preparation of Phage Lambda DNA	211
<i>J. W. Dale and P. J. Greenaway</i>	
CHAPTER 31. The Use of Restriction Endonucleases	217
<i>Elliot B. Gingold</i>	
CHAPTER 32. Ligation of DNA with T ₄ DNA Ligase	225
<i>Wim Gaastra and Kirsten Hansen</i>	
CHAPTER 33. The Use of Alkaline Phosphatase to Prevent Vector Regeneration	231
<i>J. W. Dale and P. J. Greenaway</i>	
CHAPTER 34. Bacterial Transformation	237
<i>Elliot B. Gingold</i>	
CHAPTER 35. Bacterial Transformation (Kushner* Method)	241
<i>J. W. Dale and P. J. Greenaway</i>	
CHAPTER 36. In Vitro Packaging of DNA	245
<i>J. W. Dale and P. J. Greenaway</i>	
CHAPTER 37. Yeast Transformation	251
<i>Elliot B. Gingold</i>	
CHAPTER 38. Radiolabeling of DNA by Nick Translation	257
<i>C. G. P. Mathew</i>	
CHAPTER 39. Radiolabeling of DNA Using Polynucleotide Kinase	263
<i>Wim Gaastra and Jytte Josephsen</i>	

CHAPTER 40. Radiolabeling of DNA with 3' Terminal Transferase	269
<i>Wim Gaastra and Per Klemm</i>	
CHAPTER 41. Radiolabeling of DNA with the Klenow Fragment of DNA Polymerase	273
<i>Wim Gaastra and Jytte Josephsen</i>	
CHAPTER 42. Identification of Recombinant Plasmids by <i>In Situ</i> Colony Hybridization.....	277
<i>J. W. Dale and P. J. Greenaway</i>	
CHAPTER 43. Identification of Recombinant Phages by Plaque Hybridization	285
<i>J. W. Dale and P. J. Greenaway</i>	
CHAPTER 44. Plasmid Screening Using Single Colony Lysates.....	289
<i>J. W. Dale and P. J. Greenaway</i>	
CHAPTER 45. Immunological Detection of Gene Expression in Recombinant Clones.....	293
<i>J. W. Dale and P. J. Greenaway</i>	
CHAPTER 46. The Isolation of Minicells	301
<i>Wim Gaastra and Per Klemm</i>	
CHAPTER 47. The Isolation of Maxicells.....	305
<i>Wim Gaastra and Per Klemm</i>	
CHAPTER 48. The Identification of Gene Products in Minicells and Maxicells	309
<i>Wim Gaastra and Per Klemm</i>	
CHAPTER 49. Molecular Cloning in Bacteriophage Lambda and in Cosmids.....	313
<i>Claus Christiansen</i>	

CHAPTER 50. DNA Transformation of Mammalian Cells	321
<i>Jeffrey W. Pollard, Yunus Luqmani, Alan Bateson, and Kokila Chotai</i>	
CHAPTER 51. Chemical Cleavage (Maxam and Gilbert) Method for DNA Sequence Determination	333
<i>Wim Gaastra</i>	
CHAPTER 52. Gel Electrophoretic Analysis of DNA Sequencing Products	343
<i>Wim Gaastra</i>	
CHAPTER 53. DNA Sequence Determination Using Dideoxy Analogs	351
<i>M. J. Owen</i>	
Index	367
