Preface	v
----------------------	----------

CHAPTER 1

DNA Isolation and Transformation in *Escherichia coli*: An Introduction

Elliot B. Gingold

1. Introduction.....	1
2. Materials Provided	3
2.1. Cultures	3
2.2. Solutions.....	3
2.3. Growth Media.....	3
2.4. Equipment	3
3. Protocol.....	3
3.1. DNA Isolation.....	4
3.2. Preparing the <i>E. coli</i> Recipient.....	5
3.3. Transformation.....	5
4. Results and Discussion	6

CHAPTER 2

Isolation of Plasmid DNA: The Cleared Lysate and CsCl Gradient Technique

Stephen A. Boffey

1. Introduction.....	7
2. Materials Provided	10
2.1. Solutions and Chemicals	10
2.2. Equipment	10

3. Protocol.....	10
4. Results and Discussion	14
Reference	15

CHAPTER 3

Restriction Endonuclease Digestion and Agarose Gel Electrophoresis of DNA

Stephen A. Boffey

1. Introduction.....	17
2. Materials Provided	20
2.1. Solutions and Chemicals	20
2.2. Equipment	20
3. Protocol.....	20
3.1. Restriction of DNA	20
3.2. Casting of Agarose Gel.....	21
3.3. Loading and Running Gel	23
4. Results and Discussion	24
References	27

CHAPTER 4

Restriction Site Mapping

Alan Hall

1. Introduction	29
2. Materials Provided	32
2.1. Solutions	32
2.2. Agarose Gel Electrophoresis	33
2.3. Apparatus and Equipment	33
3. Protocol.....	33
3.1. Day 1.....	33
3.2. Day 2.....	35
4. Results and Discussion	36
Reference	38

CHAPTER 5

Southern Blotting**Alan Hall**

1. Introduction.....	39
1.1. Transfer Step	41
1.2. Preparation of Radioactive DNA.....	41
1.3. Hybridization Step	42
1.4. Washing Step	43
2. Materials Provided	44
2.1. Electrophoresis.....	44
2.2. Southern Blotting.....	44
2.3. Hybridization and Washing	44
2.4. Nick Translation	44
3. Protocol.....	45
3.1. Day 1.....	45
3.2. Day 2.....	48
3.3. Day 3.....	49
3.4. Nick Translation Procedure.....	49
4. Results and Discussion	52
References	52

CHAPTER 6

**Preparative Electrophoresis: Extraction of Nucleic
Acids From Gels****Alan Hall**

1. Introduction.....	55
1.1. Extraction From Acrylamide Gels	55
1.2. Extraction From Agarose Gels	56
2. Materials Provided	58
2.1. Solutions for Digestion.....	58
2.2. Electrophoresis.....	58
2.3. Gel Extraction	58
3. Protocol.....	58
3.1. Day 1.....	58
3.2. Day 2.....	61
4. Results and Discussion	62

CHAPTER 7

**DNA Ligation and *Escherichia coli*
Transformation*****Alan Hall***

1. Introduction.....	63
2. Materials Provided	67
2.1. Solutions for Digestion	67
2.2. Solutions for Ligation.....	67
2.3. Preparation of Competent Cells and Transformation.....	68
3. Protocol.....	68
4. Results and Discussion	71

CHAPTER 8

Detection of Plasmid By Colony Hybridization***Elliot B. Gingold***

1. Introduction.....	73
2. Materials Provided	76
2.1. Cultures	76
2.2. Solutions.....	76
2.3. Equipment	77
3. Protocol.....	77
3.1. Chloramphenicol Amplification	77
3.2. Lysis and Filter Binding	78
3.3. Hybridization	78
3.4. Washing	79
3.5. Autoradiography.....	79
4. Results and Discussion	80
Reference	80

CHAPTER 9

Microisolation and Microanalysis of Plasmid DNA***Elliot B. Gingold***

1. Introduction.....	81
2. Materials Provided	82
2.1. Cultures	82
2.2. Solutions	83
2.3. Equipment	83
3. Protocol.....	83
3.1. DNA Isolation.....	83
3.2. Minigel Analysis.....	84
4. Results and Discussion	85

CHAPTER 10

**Isopycnic Centrifugation of DNA: Extraction and
Fractionation of Melon Satellite DNA by
Buoyant Density Centrifugation in Cesium
Chloride Gradients*****Donald Grierson***

1. Introduction.....	87
2. Materials Provided	91
2.1. Plant Material.....	91
2.2. Solutions and Chemicals	91
2.3. Apparatus and Equipment	91
3. Protocol.....	91
4. Results and Discussion	97
References	98

CHAPTER 11

**Purification of Plant Ribosomal DNA: Use of
Buoyant Density Centrifugation in Cesium
Chloride-Actinomycin D Gradients and
DNA-RNA Hybridization**

Donald Grierson

1. Introduction.....	99
2. Materials Provided	100
2.1. DNA Isolation and Buoyant Density Centrifugation	100
2.2. DNA-RNA Hybridization	100
3. Protocol.....	101
4. Results and Discussion	105
References	106

CHAPTER 12

**The Extraction and Affinity Chromatography of
Messenger RNA**

Robert J. Slater

1. Introduction.....	109
2. Materials Provided	112
2.1. Day 1.....	112
2.2. Day 2.....	112
3. Protocol	113
3.1. Day 1: The Extraction of Total Nucleic Acids.....	113
3.2. Day 2: To Determine the Concentration and Specific Radioactivity of the Nucleic Acid Preparation	115
3.3. Day 2: Oligo(dT)-Cellulose Chromatography	116
4. Results and Discussion	117
5. Notes	118
References	119

CHAPTER 13

Agarose Gel Electrophoresis of RNA**Robert J. Slater**

1. Introduction.....	121
2. Materials Provided	123
2.1. Solutions and Chemicals	123
2.2. Equipment	123
3. Protocol.....	124
3.1. Casting of Agarose Gel.....	124
3.2. Loading and Running Gel	125
4. Denaturing Gels.....	126
4.1. Introduction.....	126
4.2. Materials Provided	127
4.3. Protocol.....	127
5. Results and Discussion	127
References	129

CHAPTER 14

In Vitro Protein Synthesis**Jayne A. Matthews and Raymond A. McKee**

1. Introduction.....	131
2. Materials Provided	134
2.1. Expt. 1, Preparing the Wheat Germ Lysate	134
2.2. Expt. 2, Optimizing the Magnesium Concentration for the Wheat Germ Lysate	135
2.3. Expt. 3, Translation for Analysis of Products	136
3. Protocol.....	137
3.1. Expt. 1, Day 1. Preparing the Wheat Germ Lysate.....	137
3.2. Expt. 2, Day 1. Optimizing the Magnesium Concentration for the Wheat Germ Lysate	138

3.3. Expt. 3, Day 2. Translation for Analysis of Products	141
4. Results and Discussions	143
References	146

CHAPTER 15

SDS Polyacrylamide Gel Electrophoresis of Proteins: Determination of Protein Molecular Weights and High-Resolution Silver Staining

John M. Walker

1. Introduction	149
2. Materials Provided	153
2.1. SDS Gel Electrophoresis	153
2.2. Silver Staining	153
3. Protocol	154
3.1. SDS Gel Electrophoresis	154
3.2. Silver Staining	158
4. Results and Discussion	158
References	159
Further Reading	160

CHAPTER 16

Isoelectric Focusing (IEF) of Proteins in Thin- Layer Polyacrylamide Gels

John M. Walker

1. Introduction	161
2. Materials Provided	163
3. Protocol	163
4. Results and Discussion	166
References	169
Further Reading	169

CHAPTER 17

**Protein (Western) Blotting With
Immunodetection****John M. Walker**

1. Introduction.....	171
2. Materials Provided	175
3. Protocol.....	175
4. Results and Discussion	177
References	177
Further Reading	178

CHAPTER 18

**Thin-Layer Gel Filtration: Determination of
Protein Molecular Weights****John M. Walker**

1. Introduction.....	179
2. Materials Provided	181
3. Protocol.....	181
4. Results and Discussion	183
References	184

CHAPTER 19

**The Dansyl-Edman Method for Peptide
Sequencing****John M. Walker**

1. Introduction.....	185
1.1. The Coupling Reaction	185
1.2. The Cleavage Reaction.....	186
2. Materials Provided	189
2.1. The Edman Degradation.....	189
2.2. The Dansyl Method	189

3. Protocol.....	189
4. Results and Discussion	194
References	197
Further Reading	197

CHAPTER 20

The Double Immunodiffusion Technique:

Immunoprecipitation and Analysis of Antigenic Protein in Gel

David L. Cohen

1. Introduction.....	199
2. Materials Provided	203
2.1. Day 1.....	203
2.2. Day 2.....	204
3. Protocol.....	204
3.1. Day 1.....	204
3.2. Day 2.....	207
4. Results and Discussion	208
4.1. General Interpretation of Precipitation Patterns	209
4.2. Likely Results of Gel Diffusion Expts. 1-4.	210
References	211

CHAPTER 21

Immuno-electrophoretic Techniques:

2-D Immuno-electrophoresis and Rocket Immuno-electrophoresis

John M. Walker

1. Introduction.....	213
2. Materials Provided	216
2.1. Rocket Immuno-electrophoresis	216
2.2. 2-D Immuno-electrophoresis.....	216
2.3. General.....	216

Contents	xix
3. Protocol.....	217
3.1. Rocket Immunoelectrophoresis	217
3.2. 2-D Immunoelectrophoresis.....	221
4. Results and Discussion	223
4.1. Rocket Immunoelectrophoresis	223
4.2. 2-D Immunoelectrophoresis.....	223
References	224
Further Reading	225

CHAPTER 22

The Time Course of β -Galactosidase Induction in *Escherichia coli*

Kenneth H. Goulding

1. Introduction.....	227
2. Materials Provided	230
2.1. Equipment	230
2.2. Reagents.....	230
3. Protocol.....	231
4. Results and Discussion	234
References	235

CHAPTER 23

Experiments on Enzyme Induction in the Unicellular Green Alga *Chlorella fusca*

Kenneth H. Goulding

1. Introduction.....	237
2. Materials Provided	240
2.1. Equipment	240
2.2. Reagents.....	241
2.3. Enzyme Preparations.....	241
3. Protocol.....	241
4. Results and Discussion	243
References	246

CHAPTER 24

Yeast Protoplast Fusion***Elliot B. Gingold***

1. Introduction.....	247
2. Materials Provided	249
2.1. Strains	249
2.2. Solutions	249
2.3. Media	249
2.4. Equipment	249
3. Protocol	250
3.1. Protoplast Formation.....	250
3.2. Protoplast Fusion	251
3.3. Protoplast Regeneration.....	252
4. Results and Discussion	252
References	253

CHAPTER 25

The Ames Test***Elliot B. Gingold***

1. Introduction.....	255
2. Materials Provided	260
2.1. Cultures	260
2.2. Media	260
2.3. Additives.....	260
2.4. Mutagens	260
2.5. Equipment	260
3. Protocol	260
4. Results and Discussion	262
References	263

APPENDIX I

Glassware and Plasticware	265
Preparation of Buffers and Solutions.....	266
Quantitation of Nucleic Acids	267

Contents	xxi
----------	-----

Quantitation of Proteins	268
Safe Handling of Microorganisms	270
Safe Handling of Radioactivity	272
Autoradiography.....	274
Using an Ultracentrifuge	280
The Plasmid pBR322.....	281

APPENDIX II

Details and Notes on Preparation	283
Index	371
