Contributors	vii
Preface	xi

Section I. THE CULTURE

The Culture: Introduction. STEVEN W. DREW	2
1. Isolation of Cultures. J. C. HUNTER-CEVERA, M. E. FONDA, AND ANGELA BELT	3
2. Screening for New Products from Microorganisms. RICHARD J. WHITE, WILLIAM M. MAIESE, AND MICHAEL GREENSTEIN	24
3. Inoculum Development. G. R. HUNT AND R. W. STIEBER	32
4. Nutritional Improvement of Processes. R. GREASHAM AND E. INAMINE	41
5. Long-Term Preservation of Industrially Important Microorganisms. L. T. CHANG AND R. P. ELANDER	49

Section II. THE PROCESS

The Process: Introduction. OLDRICH K. SEBEK	58
6. Shake-Flask Fermentations. CHRISTOPHER T. CALAM	59
7. Solid-State Fermentations. RICHARD E. MUDGETT	66
8. Working with Anaerobic Bacteria. LARS G. LJUNGDAHL AND JUERGEN WIEGEL	84
9. Methods for Transformation of Organic Compounds. C. T. GOODHUE, J. P. ROSAZZA, AND G. P. PERUZZOTTI	97
10. Substrates for Large-Scale Fermentations. THOMAS L. MILLER AND BRUCE W. CHURCHILL	122
11. Continuous Fermentation. KEVIN STAFFORD	137

Section III. STRAIN IMPROVEMENT

Strain Improvement: Introduction. RICHARD H. BALTZ	154
12. Screening and Selection for Strain Improvement. STEPHEN W. QUEENER AND DAVID H. LIVELY	155
13. Protoplast Fusion. PATTI MATSUSHIMA AND RICHARD H. BALTZ	170
14. Mutagenesis in <i>Streptomyces</i> spp. RICHARD H. BALTZ	184
15. Genetic Mapping by Conjugation in <i>Streptomyces</i> spp. DAVID A. HOPWOOD	191
16. Gene Cloning in <i>Streptomyces</i> spp. DAVID A. HOPWOOD	198
17. Genetic Manipulation of <i>Saccharomyces cerevisiae</i> . THOMAS D. INGOLIA AND JOHN S. WOOD	204

Section IV. IMMOBILIZATION AND CELL CULTURE

Immobilization and Cell Culture: Introduction. BERNARD J. ABBOTT	216
18. Methods of Cell Immobilization. ICHIRO CHIBATA, TETSUYA TOSA, AND TADASHI SATO	217
19. Methods of Enzyme Immobilization. F. R. BERNATH AND K. VENKATASUBRAMANIAN	230
20. Introduction to Techniques of Mammalian Cell Culture. GEORGE B. BODER AND ROBERT N. HULL	248
21. Cells, Protoplasts, and Plant Regeneration in Culture. OLUF L. GAMBORG	263

Section V. BIOCHEMICAL ENGINEERING

Biochemical Engineering: Introduction. BRUCE K. HAMILTON	276
22. Scale-Up of Fermentations. ANTONIO TRILLI	277
23. Instrumentation and Computer Control of Fermentation Processes. HENRY Y. WANG	308
24. Sizing of Pilot Plant. BRUCE K. HAMILTON, JEFFREY J. SCHRUBEN, AND J. PATRICK WINTGUMERT	321

25. Sterilization: Prevention of Contamination. FREDRIC G. BADER	345
26. Cost Estimation for Biotechnology Projects. JAMES P. KALK AND ASGER F. LANGLYKKE	363

Section VI. SPECIAL TOPICS

Special Topics: Introduction. ALLEN I. LASKIN	388
27. Legal Protection for Biotechnology. ROMAN SALIWANCHIK	389
28. Biosafety and Biotechnology. DANIEL F. LIBERMAN, RICHARD FINK, AND FREDERICK SCHAEFER	402
29. Assays of Antimicrobial Substances. DAVID M. ISAACSON AND JOEL KIRSCHBAUM	410
30. Product Recovery. GARY J. CALTON, CARRINGTON S. COBBS, AND JOHN P. HAMMAN	436
Author Index	447
Subject Index	448
