1 biology.....	1
introduction	1
natural history	2
genetics	4
genetic strains	5
nomenclature	8
behavior	10
anatomy and physiology	11
Integumentary System.....	11
Musculoskeletal System.....	11
Gastrointestinal System.....	12
Respiratory System.....	13
Swim Bladder	15
Genitourinary System.....	15
Cardiovascular System	17
Hematopoietic and Lymphoid System.....	18
Endocrine System.....	19
Pituitary gland.....	20
Adrenal gland	20
Thyroid gland.....	21
Parathyroid glands.....	21
Pancreas	21
Ultimobranchial gland	22

Corpuscles of Stannius	22
Urophysis	22
Pineal gland	23
Nervous and Sensory Systems	23
clinical chemistry and hematology	23
Blood Volume	24
Hematology	25
2 husbandry	27
nutrition and feeding	27
Nutrient Requirements	27
Proteins/amino acids	28
Lipids	29
Carbohydrates	29
Vitamins	30
Minerals	30
Feed Types	31
Live feeds	31
Processed feeds	35
Life Stages	38
Larvae	38
Juveniles	43
Adults	45
breeding	47
Reproductive Cycle	47
Controlling Factors	48
Reproductive Behavior	49
Spawning Techniques and Equipment	50
In-tank strategies	51
Static-tank strategies	52
larviculture	55
Embryo Handling and Care	55
Larval Biology	57
Feeding	59
Water Quality	59
housing density	61
genetic management	64
identification and record keeping	66
Identification	66
Tank labels	66
Record Keeping	68

transportation	70
Shipping	70
General physical requirements	70
Sample packaging method – adults	71
Sample packaging method – embryos	74
Receiving	77
General physical requirements	77
Biosecurity concerns	82
Sample receiving method – adults	83
Sample receiving method – embryos	83
Regulatory Requirements	84
3 life support	85
facility design	85
Water Handling and Resistance	85
Water Production	87
Infrastructure	87
Electricity	87
Environmental Controls	89
Alarming	89
Access	90
Work Zones	91
Storage	91
Rack Configuration	91
Quarantine	92
Air	93
Sinks	93
Cleaning and Sterilization	93
Redundancy	95
housing systems	95
Tanks	96
Racks	97
Water Treatment	99
water source	104
Testing and Analysis	105
Treatment Methods	106
Reverse osmosis	106
Deionization	107
Combined water treatment systems	107
Treatment System Maintenance	107
Water Conditioning	107

water quality management	109
Key Parameters.....	110
Temperature.....	110
pH.....	110
Alkalinity.....	111
Hardness	112
Salinity	114
Dissolved oxygen.....	115
Carbon dioxide.....	116
Nitrogenous wastes	116
Testing.....	118
effluent management	119
4 management.....	121
regulatory agencies and compliance	121
institutional animal care and use committees	122
Procurement and the Source of Animals.....	124
occupational health and zoonotic diseases	125
disposal of fish	129
5 veterinary care	131
basic biologic parameters	131
animal welfare indicators for fish	133
Change in Color.....	134
Respiratory Rate	134
Swimming and Behavioral Patterns.....	134
Growth Rate	135
Body Condition	135
External Morphological Abnormalities	135
Reproductive Performance	136
Biochemical Welfare Indicators	136
Food Consumption.....	137
stress response in fish.....	137
clinical case management and sample collection	139
Source of the Fish.....	139
Management Practices	139
Genetic Background	140
Age of the Fish.....	140
Research Application	140
Water	141

Physical Examination	141
Simple protocol for preparing cutaneous wet mount preparations.....	143
Gill wet mount preparation.....	144
Skin mucus wet mount preparation	145
Fin wet mount preparation.....	146
Necropsy	147
common diseases of the laboratory zebrafish.....	147
Bacterial Agents and Disease.....	149
Bacterial gill disease	149
<i>Flavobacterium columnare</i>	150
<i>Aeromonas hydrophila</i>	150
Mycobacteriosis.....	151
Parasitic Agents	153
<i>Pseudocapillaria tomentosa</i>	153
Myxosporidiosis	157
Metazoan Parasites.....	159
Microsporidiosis	159
<i>Pleistophora hyphessobryconis</i>	160
Fungal Diseases	161
Saprolegniasis.....	161
<i>Lecytophora mutabilis</i>	162
Parasitic Diseases.....	162
Viruses	163
Endogenous retrovirus in zebrafish.....	163
Non-Infectious Conditions.....	164
Ammonia toxicity	164
Nitrite toxicity	165
Chlorine/chloramine toxicity.....	165
Gas bubble disease	166
preventive medicine.....	167
Zebrafish Diets	167
Source of Fish.....	169
Disinfection of Equipment and Cleanliness	169
health surveillance and monitoring.....	171
anesthesia and euthanasia.....	172
Chemical Agents	172
Cooling	173
Bleach	174
