

CONTENTS

Chapter I Low-dimensional nanomaterials reinforced biomaterials by laser 3D printing

- ◇ Nanodiamond reinforced polyvinylidene fluoride/bioglass scaffolds for bone tissue engineering 1
- ◇ Graphene oxide as an interface phase between polyetheretherketone and hydroxyapatite for tissue engineering scaffolds 16
- ◇ A combined nanostructure constructed by graphene and boron nitride nanotubes reinforces ceramic scaffolds 45
- ◇ A space network structure constructed by tetraneedlelike ZnO whiskers supporting boron nitride nanosheets to enhance comprehensive properties of poly(L-lacti acid) scaffolds 71

Chapter II Oxides reinforced biomaterials by laser 3D printing

- ◇ Biosilicates scaffolds for bone regeneration: influence of introducing SrO 100
- ◇ A mesoporous silica composite scaffold: cell behaviors, biomineralization and mechanical properties 125
- ◇ MgO whiskers reinforced poly (vinylidene fluoride) scaffolds 144

Chapter III Alloying elements in biomedical metals by laser rapid solidification

- ◇ Laser rapid solidification improves corrosion behavior of Mg-Zn-Zr alloy 162
- ◇ Microstructure evolution and biodegradation behavior of laser rapid solidified Mg-Al-Zn alloy 181
- ◇ Influence of alloying treatment and rapid solidification on the degradation behavior

and mechanical properties of Mg	197
◇ Preparation and characterization of laser-melted Mg-Sn-Zn alloys for biomedical application	211
◇ Rare earth element yttrium modified Mg-Al-Zn alloy: microstructure, degradation properties and hardness	224

Chapter IV Liquid phase-assisted densification in laser 3D printing

◇ Mechanically strong CaSiO ₃ scaffolds incorporating B ₂ O ₃ -ZnO liquid phase	240
◇ Development of bioceramic bone scaffolds by introducing triple liquid phases	257

Chapter V Combination of different types of biomaterials by laser 3D printing

◇ Calcium silicate improved bioactivity and mechanical properties of poly(3-hydroxybutyrate-co-3-hydroxyvalerate) scaffolds	272
◇ Characterization and bioactivity evaluation of (polyetheretherketone/polyglycolicacid)-hydroxyapatite scaffolds for tissue regeneration.....	295
◇ Silane modified diopside for improved interfacial adhesion and bioactivity of composite scaffolds	314
◇ Biodegradation resistance and bioactivity of hydroxyapatite enhanced Mg-Zn composites via selective laser melting	335
◇ Tunable degradation rate and favorable bioactivity of porous calcium sulfate scaffolds by introducing nano-hydroxyapatite.....	351
