

## CONTENTS

*Preface* ix

1	Introduction: The Diversity of Insects and Their Microbial Symbionts	1
1.1	<i>Naming the partners</i>	2
1.2	<i>Insect habitats for microorganisms</i>	10
1.3	<i>Insect associations with beneficial microorganisms</i>	16
1.4	<i>How this book is structured</i>	19
2	The Diversity of Insect-Microbial Associations	23
2.1	<i>Ectosymbioses</i>	24
2.2	<i>Gut symbioses</i>	37
2.3	<i>Endosymbioses</i>	47
2.4	<i>The dorsal organs of lagriine beetles</i>	65
2.5	<i>Summary</i>	66
3	How Insects Acquire and Control Their Microbial Symbionts	69
3.1	<i>Environmental microorganisms acquired by insects</i>	70
3.2	<i>Microbes acquired from other insects</i>	80
3.3	<i>Routes of horizontal transmission in microorganisms with high vertical transmission rates</i>	92
3.4	<i>The localization and abundance of endosymbionts in insects</i>	96
3.5	<i>Determinants of the composition of the insect gut microbiome</i>	100
3.6	<i>Microbial populations through host development</i>	110
3.7	<i>Summary</i>	117

4	Microbial Services	119
	4.1 Microbial degradation of complex biopolymers in the insect diet	120
	4.2 Microbial contributions to insect nitrogen nutrition	132
	4.3 B vitamin provisioning	150
	4.4 Sterol provisioning	157
	4.5 Microbial protection against natural enemies	160
	4.6 Microbial detoxification of dietary toxins and insecticidal chemicals	170
	4.7 Microorganisms and insect behavior	177
	4.8 Microorganisms and insect tolerance of abiotic conditions	185
	4.9 Summary	187
5	Harnessing Microbial Symbionts to Manage Insect Pests and Vectors of Disease	190
	5.1 Native microorganisms	192
	5.2 Heterologous microorganisms	205
	5.3 Engineered microorganisms	215
	5.4 Targeting required microbial symbionts and their interactions with the insect host	225
	5.5 Outlook	228
	5.6 Summary	232
6	The Insect Microbiome as a Biomedical Model	234
	6.1 Insect model systems	235
	6.2 The interface between the gut microbiota and the <i>Drosophila</i> gut	243
	6.3 The gut microbiota and immune function	250
	6.4 The gut microbiome and metabolic health	256
	6.5 The gut microbiome, nervous system function, and behavior	261
	6.6 Summary	270
7	Priorities for the Study of Insect-Microbial Associations	272
	7.1 Reinvigorating the microbiology of insect-microbial associations	273

7.2	<i>Modes of interaction between insects and microorganisms</i>	276
7.3	<i>Managing microbiomes for insect health</i>	278
7.4	<i>Concluding comments</i>	281
	<i>References</i>	283
	<i>Index</i>	317
