xiii 4. The Epigenetics of Noncoding RNA 55

I

Overview

I. Epigenetics Overview

TRISGVE O. TOLLEFSBOL

Introduction	3
Molecular Mechanisms of Epigenetics	3
Methods in Epigenetics	4
Model Organisms of Epigenetics	5
Factors Influencing Epigenetic Changes	5
Evolutionary Epigenetics	6
Epigenetic Epidemiology	6
Epigenetics and Human Disease	7
Epigenetic Therapy	7
The Future of Epigenetics	7
Conclusion	8
References	8

II

Molecular Mechanisms of Epigenetics

2. Mechanisms of DNA Methylation and Demethylation During Mammalian Development

ZHENGZHOU YING AND TAIPING CHEN

Introduction	11
DNA Methylation	12
DNA Demethylation	17
Conclusions	20
Acknowledgments	21
References	22

3. Mechanisms of Histone Modifications

ELDOVICA VANZAN, ATHENA SKLIAS, MARIA BOSKOVIC,
ZENKO HERCEG, RABIH MURR AND DAVID M. SUTER

Introduction	27
Main Histone Modifications	28
Role of Aberrant Histone Modifications in Disease	45
Conclusions	45
References	46

RAVINDRESH CHHARRA	
Introduction	55
Conclusions	67
Acknowledgments	67
References	68

5. Prions and prion-like phenomena in epigenetic inheritance 73

PHILIPPE SILAR	
Structural Heredity	74
Amyloid Prions of <i>Saccharomyces cerevisiae</i> , <i>Podospora anserina</i> , and Other Organisms	74
Cis Elements Important for Amyloid Prion Formation	76
Genetic Control of Amyloid Prion Formation and Propagation	76
Amyloid Prion Variants	77
Self-Driven Assembly of Hsp60 Mitochondrial Chaperonin	77
Cytotaxis of Cilia and Other Complex Structures	78
Mixed Heredity: "Nonamyloid Prions" That Propagate by Auto-activation	78
Regulatory Inheritance	79
The Lactose Operon and Its Positive Feedback Loop	79
Crippled Growth, A Self-sustained and Mitotically Inheritable Signaling Pathway in the Filamentous Fungus <i>Podospora anserina</i>	80
The White/Opaque Switch of <i>Candida albicans</i> , An Epigenetic Switch at the Transcription Level	81
Conclusion	82
References	83

6. Higher-order Chromatin Organization in Diseases, from Chromosomal Position Effect to Phenotype Variagation 89

FRÉDÉRIQUE MAGDINIER AND JÉRÔME D. ROBIN	
Introduction	89
Chromosomal Position Effect in Human Pathologies	93
Telomeric Position Effect; Implication in Human Pathologies	98
Conclusions	101
References	102

7. Polycomb-group proteins and epigenetic control of gene activity 111

PRASAD PETHE	
Introduction	111

Polycomb Repressive Complexes
Mechanism of Gene Regulation by Polycomb Group Proteins
PcG-Mediated Control of Gene Expression in Stem Cells to Maintain Homeostasis
PcG-mediated Control of Gene Expression in Embryonic Stem Cells
PcG-mediated Control of Gene Expression in Cancer Cells
Conclusion and Future Perspective
Acknowledgment
References

III

Methods in Epigenetics

8. Methods for Analyzing DNA Cytosine Modifications Genome-wide

TIBOR A. RAUCH AND GERD P. PFEIFER

Introduction
Methylated DNA Immunoprecipitation
MBD Protein-based Affinity Pulldown
Methylated-CpG Island Recovery Assay
Targeted Bisulfite Sequencing
Infinium and EPIC Methylation Bead Chips
Whole Genome Bisulfite Sequencing
Other Sodium Bisulfite-based Approaches
Enzymatic Methyl-sequencing and Pyrimidine Borane-based Methods
5-Hydroxymethylcytosine Mapping Methodologies
TET-assisted Bisulfite Sequencing
Oxidative Bisulfite Sequencing
APOBEC-coupled Epigenetic Sequencing
SMRT-seq and Nanopore Sequencing
Single Cell Whole Genome Methylation Analysis
Future Directions and Challenges
Acknowledgments
References

9. Genome-wide Analyses of Histone Modifications in the Mammalian Genome

SHULAN TIAN, SUSAN L. SLAGER, ERIC W. KLEE AND HUIHUANG YAN

Introduction
Histone Modifications in Regulatory Regions
High-throughput Assays for Mapping Histone Modifications
Genome-wide Mapping of Histone Modifications
Catalog of Histone Modification Profiles
Variation of Histone Modifications
Conclusions and Perspectives
ChIP-seq Data Analysis Workflow
Acknowledgments
References

Evolution of Plant Histone Lysine Methyltransferases Methylating H3K4	502	Livestock Epigenetics Case Study	595
Evolution of Plant Histone Lysine Methyltransferases Methylating H3K27	508	Acknowledgment	598
Respectives	514	References	599
Acknowledgments	515		
References	515	30. Nutritional Epigenetics and Fetal Metabolic Programming	611
		HO-SUN LEE	
27. Evolution, Functions and Dynamics of Epigenetic Mechanisms in Animals	521	Introduction	611
GÜNTER VOGT		Metabolic Sensing by Epigenetic Mechanisms	612
Introduction		Impact of Prenatal Nutrition on Fetal Reprogramming	615
Evolution of Epigenetic Mechanisms in The Animal Kingdom	521	Maternal Diet and Metabolic Epigenome	616
Features of Epigenetic Mechanisms and Role in Gene Regulation	521	Summary and Perspectives	619
Dynamics of Epigenetic Marks During Development	524	Acknowledgments	620
Generation of Phenotypic Variation in Populations by Epigenetic Mechanisms	526	References	620
Relevance of Epigenetics for Animal Ecology	530		
Relevance of Epigenetics for Animal Evolution	534	31. Epigenetics of Drug Addiction	625
Conclusions and Perspectives	538	RYAN D. SHEPARD AND FERESHTEH S. NUGENT	
Summary	543	Introduction	625
References	545	What Is Addiction?	626
		Dopamine and Reward Circuits	626
28. Adaptive evolution and epigenetics	551	Synaptic Plasticity, Learning and Memory and Addiction	628
LEENA KRONHOLM		Epigenetic Processes in Drug Addiction	630
Introduction	551	Utilizing Epigenetic Targets for Diagnosis and Treatments to Combat Addiction and SUDs	632
Epigenetic Variation	551	Conclusion	634
Modeling Evolution	552	Summary	634
Induced Epigenetic Changes	552	Acknowledgments	634
Spontaneous Epigenetic Variation	554	References	634
Modeling Spontaneous Epigenetic Variation	555	Further Reading	637
Limits of Epigenetic Contributions to Adaptation	559		
Conclusions and Future Directions	560	32. Environmental Influence on Epigenetics	639
Acknowledgments	561	MARISOL RESENDIZ, DARRYL S. WATKINS, NAIL CAN ÖZTÜRK AND FENG C. ZHOU	
References	561	Introduction	639
		The Extent (Timeline) of Environmental Influence	641
VII		Exerting Environment	642
Epigenetic Epidemiology		Mental or Physiological Environment	643
		Hazardous Environmental Pollutants and Chemicals	650
29. Epigenetics of Livestock Health, Production, and Breeding	569	Conclusion and Future Direction	658
SHELINE M. IBEAGHA-AWEMU AND HASAN KHATIB		Research case study [18]	660
Introduction	569	References	663
Development of Animal Breeding	570		
Epigenetic Source of Phenotypic Variation in Livestock Health and Production	571	33. Gut Microbiome Influence on Human Epigenetics, Health, and Disease	669
Revisiting Animal Breeding Planning and Management: The Role of Epigenetic Mechanisms	587	MARTIN M. WATSON, MARK VAN DER GIEZEN AND KJETIL SØREIDE	
Conclusion	595	Introduction	669
Summary	595	Early Microbiome Exposure and Epigenetic Influence	673
		Human Gut Microflora	675
		Microbiome, Epigenetics, and Effect on Metabolism	675
		Gut microbiota, Inflammation, and Colorectal Carcinogenesis	677

Pathogenic Infections and Cancer	677	Type 1 Diabetes Mellitus	724
Pathogenic Infections and Epigenetic Modifications	680	Systemic Sclerosis	725
Summary	683	Use of Epigenetic Modifications as Potential Biomarkers	726
References	683	Use of Epigenetic Modifiers for Potential Diagnosis and Therapy in Autoimmune Diseases	727
34. Population Pharmacoepiggenomics	687	Summary	728
JACOB PEDDICAYIL		Multiomics and machine learning accurately predict clinical response to adalimumab and etanercept therapy in patients with rheumatoid arthritis [203] [ex: Autoimmunity Epigenetics Case Study]	728
Introduction	687	References	730
General Aspects of Population Pharmacoepiggenomics	688	37. Epigenetics of Brain Disorders	737
Population Variations of Epigenetic Patterns and Population Pharmacoepiggenomics	688	ALI JAWAID, ELOÏSE A. KREMER, NANCY V.N. CARULLO AND ISABELLE M. MANSUY	
Human Epigenome Projects and Population Pharmacoepiggenomics	688	Introduction	738
Population Pharmacoepiggenomics in Relation to Pharmacokinetics	689	Important Epigenetic Mechanisms for the Brain	738
Population Pharmacoepiggenomics in Relation to Pharmacodynamics	689	Epigenetic Dysregulation in Neurodevelopmental Disorders: The Example of Rett Syndrome	739
3D and 4D Chromatin Structures in the Nuclei of Cells in the Liver and Other Body Organs and Population Pharmacoepiggenomics	690	Epigenetic Dysregulation in Neurodegenerative Disorders: The Example of Alzheimer's Disease	742
Population Pharmacoepiggenomics in Relation to Adverse Drug Reactions and Drug Interactions	691	Epigenetic Dysregulation in Psychiatric Disorders: The Example of Depression	745
Conclusions	691	Epigenetic Dysregulation by Environmental Stress: The Example of Early-life Stress	748
Population Pharmacoepiggenomics Case Study	691	Conclusions and Outlook	749
