CHAPTER 1 Multiple gene knockdown strategies for investigating the properties of human leukemia stem cells and exploring new therapies 1
Andrew Wu, Aysha S. Ansari, Hasan Uludag, and Xiaoyan Jiang

| | |
|----------------------------|----|
| 1. Introduction..... | 2 |
| 2. Materials..... | 6 |
| 3. Methods..... | 8 |
| 4. Notes..... | 13 |
| 5. Concluding remarks..... | 18 |
| Acknowledgments..... | 19 |
| Disclosures..... | 19 |
| References..... | 19 |

CHAPTER 2 Evaluation of cancer stem cells markers expression in HCC through real-time polymerase chain reaction 23
Barbara Bueloni, Esteban Fiore, Manuel Gidekel, Juan Bayo, and Guillermo Mazzolini

| | |
|------------------------------------|----|
| 1. Introduction and rationale..... | 24 |
| 2. Materials..... | 25 |
| 3. Methods..... | 25 |
| 4. Results and discussion..... | 31 |
| Disclosures..... | 31 |
| References..... | 32 |

CHAPTER 3 Reverse Phase Protein Arrays in cancer stem cells...33
Michele Signore and Valeria Manganelli

| | |
|----------------------------|----|
| 1. Introduction..... | 34 |
| 2. Materials..... | 36 |
| 3. Methods..... | 40 |
| 4. Notes..... | 48 |
| 5. Concluding remarks..... | 55 |
| Disclosures..... | 56 |
| References..... | 57 |

| | |
|----------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| CHAPTER 4 Isolation of cancer stem cells from skin squamous cell carcinoma | 63 |
| Priyanka Joshi, Dnyanada S. Ghadi, and Sanjeev K. Waghmare | |
| 1. Introduction..... | 64 |
| 2. Materials..... | 69 |
| 3. Methods..... | 70 |
| 4. CSCs assays..... | 75 |
| 5. Precautions to be taken during CSC isolation to avoid commonly faced problems..... | 76 |
| 6. Concluding remarks..... | 77 |
| Disclosures..... | 78 |
| References..... | 78 |
| | |
| CHAPTER 5 Immunoblotting-assisted assessment of JAK/STAT and PI3K/Akt/mTOR signaling in myeloproliferative neoplasms CD34+ stem cells | 81 |
| Laura Calabresi, Manjola Balliu, and Niccolò Bartalucci | |
| 1. Introduction..... | 82 |
| 2. Materials..... | 85 |
| 3. Isolation of mononuclear cells (MNCs) from human peripheral blood by density gradient centrifugation..... | 89 |
| 4. Immunomagnetic separation of hematopoietic stem cells (CD34+) from MNCs..... | 90 |
| 5. Protein extraction and quantification from CD34+ cells..... | 91 |
| 6. Sample preparation and SDS-PAGE Western blotting..... | 92 |
| 7. Membranes probing to detect phosphorylated proteins of JAK/STAT and PI3K/mTOR/Akt pathway..... | 94 |
| 8. Phosphorylated protein revelation and data acquisition..... | 95 |
| 9. Membrane stripping and re-probing to detect total protein of JAK/STAT and PI3K/mTOR/Akt pathway..... | 96 |
| 10. Human colony forming unit (CFU) assay of hematopoietic stem cells (CD34+)..... | 99 |
| 11. Notes..... | 102 |
| 12. Concluding remarks..... | 105 |
| Disclosures..... | 106 |
| References..... | 106 |

| | | |
|------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| CHAPTER 6 | Isolation of cancer stem cells from cultured breast cancer cells and xenografted breast tumors based on aldehyde dehydrogenase activity..... | 111 |
| | Wasundara Fernando, Derek Rowter, Raj Pranap Arun, Jaganathan Venkatesh, and Paola Marcato | |
| | 1. Background..... | 112 |
| | 2. The Aldefluor™ assay to isolate putative cancer stem cells.... | 113 |
| | 3. The importance of ALDH1A1 and ALDH1A3 in breast cancer..... | 113 |
| | 4. Conclusions..... | 122 |
| | Acknowledgments..... | 122 |
| | References..... | 123 |
| CHAPTER 7 | Intracerebroventricular transplantation of human iPSC-derived neural stem cells (hiPSC-NSCs) into neonatal mice..... | 127 |
| | Marco Luciani, Chiara Garsia, Elisabeth Mangiameli, Vasco Meneghini, and Angela Gritti | |
| | 1. Introduction..... | 128 |
| | 2. Materials..... | 130 |
| | 3. Methods..... | 133 |
| | 4. Notes..... | 140 |
| | 5. Concluding remarks..... | 143 |
| | Acknowledgments..... | 144 |
| | References..... | 144 |
| CHAPTER 8 | Quantifying epithelial-mesenchymal heterogeneity and EMT scoring in tumor samples via tyramide signal amplification (TSA)..... | 149 |
| | Meredith S. Brown, Behnaz Abdollahi, Saeed Hassanpour, and Diwakar R. Pattabiraman | |
| | 1. Introduction..... | 150 |
| | 2. Materials..... | 153 |
| | 3. Methods..... | 153 |
| | 4. Imaging and analysis..... | 156 |
| | 5. Quantification..... | 158 |
| | 6. Concluding Remarks..... | 158 |
| | 7. Limitations..... | 158 |
| | 8. Notes..... | 159 |
| | References..... | 159 |

| | |
|-----------------------------------------------------------------------------------------------------------------------------------------|------------|
| CHAPTER 9 Immunofluorescence staining of colorectal cancer patient-derived organoids | 163 |
| Joseph L. Regan | |
| 1. Introduction..... | 164 |
| 2. Materials..... | 165 |
| 3. Method..... | 166 |
| 4. Notes..... | 168 |
| 5. Concluding remarks..... | 169 |
| Disclosures..... | 169 |
| References..... | 169 |
| | |
| CHAPTER 10 Isolation of murine bone marrow hematopoietic stem and progenitor cell populations via flow cytometry | 173 |
| Weijia Yu, Tessa Schmachtel, Malak Fawaz, and Michael A. Rieger | |
| 1. Introduction..... | 174 |
| 2. Materials..... | 177 |
| 3. Methods..... | 178 |
| 4. Notes..... | 184 |
| 5. Concluding remarks..... | 190 |
| Acknowledgments..... | 191 |
| Conflict of interest..... | 191 |
| Disclosures..... | 191 |
| References..... | 191 |
| | |
| CHAPTER 11 Limiting dilution assay to quantify the self-renewal potential of cancer stem cells in hepatocellular carcinoma | 197 |
| Yingying Lai, Bin Wang, and Xi Zheng | |
| 1. Introduction..... | 198 |
| 2. Materials..... | 201 |
| 3. Method..... | 202 |
| 4. NOTES..... | 209 |
| Funding..... | 211 |
| References..... | 211 |

| | |
|------------------------------------------------------------------------------------------------------------------------|------------|
| CHAPTER 12 Methods to isolate adipose tissue-derived stem cells | 215 |
| Letizia Ferroni, Francesco De Francesco, Paolo Pinton, Chiara Gardin, and Barbara Zavan | |
| 1. Introduction..... | 216 |
| 2. Stromal vascular fraction (SVF) and adipose tissue-derived stem cells (ADSCs)..... | 216 |
| 3. Enzymatic isolation of ADSCs: An overview..... | 218 |
| 4. Non-enzymatic isolation of SVF and ADSCs..... | 222 |
| 5. Novel non-enzymatic systems of ADSCs isolation..... | 224 |
| 6. Conclusions..... | 225 |
| References..... | 226 |
| CHAPTER 13 Generation of neuronal/glial mixed cultures from human induced pluripotent stem cells (hiPSCs) | 229 |
| Elisabeth Mangiameli, Marta Freschi, Marco Luciani, and Angela Gritti | |
| 1. Introduction..... | 231 |
| 2. Materials..... | 233 |
| 3. Methods..... | 236 |
| 4. Expected results..... | 238 |
| 5. Notes..... | 241 |
| 6. Concluding remarks..... | 243 |
| Acknowledgments..... | 243 |
| References..... | 243 |
