
Contents

	List of Contributors	v
	Preface	ix
1	Metagenomics and Ecosystems Biology: Conceptual Frameworks, Tools and Methods	1
	Jianping Xu	
2	Beyond Metagenomics: Integration of Complementary Approaches for the Study of Microbial Communities	15
	Andrés Cubillos-Ruiz, Howard Junca, Sandra Baena, Ivonne Venegas and María Mercedes Zambrano	
3	Horizontal Gene Transfer in Prokaryotic Microbiobial Communities	39
	Javier Tamames and Alex Mira	
4	Analysis of Complex Microbial Communities through Metagenomic Survey	55
	María-Eugenia Guazzaroni, Peter N. Golyshin and Manuel Ferrer	
5	Public Data Resources as a Foundation for a Worldwide Metagenomics Data Infrastructure	79
	Guy Cochrane, Maria Jesus Martin and Rolf Apweiler	
6	The Potential for Investigation of Plant–Microbe Interactions using Metagenomics Methods	107
	Trevor C. Charles	
7	Application of Metagenomics to Bioremediation	119
	Isabelle George, Benoît Stenuit and Spiros Agathos	
8	Applications of Metagenomics for Industrial Bioproducts	141
	Dominic W. S. Wong	
9	Archaeal Metagenomics: Bioprospecting Novel Genes and Exploring New Concepts	159
	Alexander M. Cardoso, Maysa M. Clementino, Ricardo P. Vieira, Janaina J.V. Cavalcante, Rodolpho M. Albano and Orlando B. Martins	

iv Contents

10	Metagenomics and its Applications to the Study of the Human Microbiome Karen E. Nelson and Bryan A. White	171
11	Philosophical Themes in Metagenomics Maureen A. O'Malley and John Dupré	183
	Index	209
	Colour Plate
