<i>Preface</i>	xv
1. Application of Biomimetics and Public and Industrial Perceptions	1
<i>Yuta Uchiyama, Chika Takatori, and Ryo Kohsaka</i>	
1.1 Introduction	2
1.2 Methodology	4
1.3 Museum Visitors Perception 1	6
1.4 Museum Visitors Perception 2	18
1.5 Perception of Industrial Sectors	20
1.6 Comparative Analysis	23
2. Ontology-Enhanced Thesaurus for Promoting Biomimetics Research	25
<i>Riichiro Mizoguchi and Kouji Kozaki</i>	
2.1 Introduction	26
2.2 Role of the Knowledge Infrastructure for Biomimetics	28
2.2.1 Related Work in the Framework of the Design Processes of Biology-Inspired Design	29
2.2.2 Positioning of OET in the Context of the Whole Design Process	32
2.2.3 An Envisioned Application	32
2.2.3.1 How Keyword Explorer works	32
2.2.3.2 A Motivating Example	34
2.3 Ontology-Enhanced Thesaurus	36
2.3.1 Characteristics of Biomimetics DBs	36

2.3.2	Basic Design of a Biomimetics Database Retrieval Scheme	37
2.3.3	Keyword Exploration as an Independent Task before Issuing Queries to DBs	39
2.3.3.1	Keyword exploration and missing links	39
2.3.3.2	Keyword exploration reasoning	40
2.3.3.3	Two-step help	41
2.4	Ontologies in OET	42
2.4.1	Basic Design of Ontologies in OET	42
2.4.2	Ontology of Function	42
2.4.3	Concepts other than Function	42
2.4.3.1	Taxonomy of creatures	43
2.4.3.2	Properties	44
2.4.3.3	Living environments	44
2.4.3.4	The quality of ontologies in OET	45
2.5	Implementation and Evaluation of a Prototype of Keyword Explorer	45
2.5.1	Implementation of Keyword Explorer	45
2.5.1.1	The demo version	46
2.5.1.2	The prototype version	46
2.5.2	Preliminary Evaluation Experiment	47
2.6	Concluding Remarks	48
3.	Biomimetics Image Retrieval Platform for Bridging Different Study Fields	53
	<i>Miki Haseyama and Takahiro Ogawa</i>	
3.1	Introduction	54
3.2	Background for New Image Retrieval Platform	56
3.2.1	Need for an Image Retrieval Scheme in Biomimetics Studies	56
3.2.2	Image Retrieval Based on a Visualization Technique	56
3.3	Biomimetics Image Retrieval Platform	59

3.3.1	Algorithm in Our Retrieval Platform	59
3.3.2	Functions Equipped in the Biomimetics Image Retrieval Platform	60
3.3.3	Inter-field Similarities Discovered by Our Platform	65
3.4	Conclusions	66
4	Theory of Inventive Problem-Solving Method Applying Biomimetics	69
	<i>Takeshi Yamauchi, Hidetoshi Kobayashi, and Toru Kobayashi</i>	
4.1	Introduction	69
4.2	Current Conditions Regarding Patents for Biomimetics	71
4.3	Engineering Problem Solving Method Applying Biomimetics	72
4.3.1	TRIZ Method	72
4.3.2	Bio-TRIZ Method	75
4.3.3	Examples of Solutions to Technological Contradictions	76
4.4	Database of Inventive Problem-Solving Method Applying Biomimetics	79
4.4.1	Problem-Oriented Approach-Search from Technical Contradiction Matrix	79
4.4.2	Function-Oriented Approach-Search from Function	83
4.4.3	Inventory of Biomimetic Products	84
4.5	A Motivating Example of Database	85
4.5.1	Problem-Oriented Approach for Windmills	85
4.5.2	Function-Oriented Approach for Windmills	86
4.5.3	Inventory of Biomimetic Products for Windmills	87
4.6	Conclusion	88

5. Urban Planning by Learning from Living Creatures	91
<i>Mamoru Taniguchi</i>	
5.1 Introduction	91
5.2 Urban Growth and Analogy to Living Creatures	92
5.3 Cities Affected by Lifestyle-Related Diseases	92
5.3.1 Metabolic Syndrome	92
5.3.2 Hypertension	94
5.3.3 Osteoporosis	95
5.3.4 Cancer	95
5.4 Using Apoptosis in Urban Planning	98
5.4.1 Two Patterns of Cell Death	98
5.4.2 Compact Town Development Learned from Apoptosis	98
5.4.3 Necessity of Reduced Diet	99
5.4.4 Necessity of District Karte	101
5.5 Concluding Remarks: Thinking about an Evolutionarily Stable Region	102
6. Functional Elucidation of Biological Interactions in Agricultural Ecosystems and the Application of Biomimetics to Plant Protection	105
<i>Naoki Mori, Takuma Takanashi, and Hidefumi Mitsuno</i>	
6.1 Vibrational Interactions in Beetles and Bugs and Applications in Plant Protection	106
6.1.1 Background	106
6.1.2 Vibrational Interactions in Beetles and Bugs	106
6.1.3 Vibrational Senses	108
6.1.4 Application of Vibrations in Plant Protection	109
6.2 Contribution of Soybean Leaf Trichomes to the Resistance of <i>Spodoptera Litura</i>	112
6.2.1 Background	112
6.2.2 Preference Change with and without Soybean Leaf Trichomes	112

6.2.3	Chemical Analysis of Trichome Components	114
6.2.4	Observation and Measurement of Trichome Physical Parameters	115
6.2.5	Discussion	116
6.3	Insect Pheromone Communication	118
6.3.1	Background	118
6.3.2	Reception of Pheromones	119
7.	Anti-Biofouling Effects against Sessile Organisms of Soft Materials	129
	<i>Takayuki Murosaki</i>	
7.1	Introduction	129
7.2	Barnacles	130
7.3	Anti-Biofouling Effects of Soft Materials	132
7.4	Anti-Biofouling Effects of Hydrogels in the Ocean	136
7.5	Barnacle Growth Inhibition Effects of Soft Materials	138
7.6	Anti-Barnacle Settlement Activity of Microstructured Silicone Elastomers	140
7.7	Conclusion	143
8.	Biomimetic Devices by Nano/Micro Processing	149
	<i>Seiji Aoyagi, Masato Suzuki, Tomokazu Takahashi, and Takeshi Ito</i>	
8.1	Introduction	149
8.2	Fusion of MEMS with Ultra-High-Precision Three-Dimensional Processing	150
8.3	Microneedles for Drawing Blood by Mimicking Mosquitoes	154
8.3.1	Introduction	154
8.3.2	Structure of the Mosquito Needle and the Stinging Motion	155
8.3.3	Manufacture of a Microneedle by Ultra-High-Precision Three-Dimensional Laser Lithography	156

8.3.3.1	Manufacture of a set of three needles to mimic the labrum and two maxillae of a mosquito	157
8.3.3.2	Proposal for needles in which two split-in-half needles are combined	158
8.3.3.3	Manufacture of split-in-half microneedles and evaluation of the piercing and blood-drawing functions	159
8.3.4	Manufacture of a Microneedle Using a Femtosecond Laser	161
8.3.4.1	Hollow needle mimicking the labrum	162
8.3.4.2	Plate-shaped needle having a protrusion with a jagged edge	162
8.3.4.3	Comparison with the proboscis of a mosquito	162
8.3.4.4	Performance evaluation	162
8.4	Vacuum Suction Gripper That Mimics the Octopus Acetabulum	163
8.4.1	Introduction	163
8.4.2	Principle and Structure	164
8.4.3	Gripper Manufacture and Gripping Experiment	165
8.4.3.1	Semispherical gripper with multiple acetabula	166
8.4.3.2	One-acetabulum gripper with a bellows structure	168
8.5	An Antibacterial Nanosurface Mimicking Cicada's Wing Using Biomimetics	170
8.5.1	Introduction	170
8.5.2	Observational Results of Cicada Wings and Manufacturing of a Sample	171
8.5.3	Evaluation of Antibacterial Characteristics	172

8.5.4	Results	173
8.6	Fine-Protrusions that Mimic the Footpads of Gecko	174
8.6.1	Introduction	174
8.6.2	Measuring the Adhesive Area of the Footpad of Gecko	174
8.6.3	Adsorption Strength Measurement Experiment	175
8.6.4	Manufacture of an Adsorption Device Using a Three-Dimensional Laser Lithography and Transfer by UV Nano-Imprinting	177
8.7	A Robot Hand That Mimics the Fingers of a Tree Frog	177
8.7.1	Introduction	177
8.7.2	Gripping Strategy	178
8.7.3	Hand Configuration	179
8.8	Conclusion	182
9.	Structural Color in Biomimetics	187
	<i>Akira Saito</i>	
9.1	Introduction	187
9.2	Optical Principles	188
9.2.1	Principles for Structural Color	188
9.2.2	Types of Structural Color	191
9.3	Applications of Structural Color	192
9.3.1	Advantages of Structural Color	192
9.3.2	Various Artificial Approaches	193
9.4	"Single Colored" Structural Color: <i>Morpho</i> Butterfly	196
9.4.1	Principles of the <i>Morpho</i> -color	196
9.4.2	How to Reproduce the <i>Morpho</i> -color?	198
9.4.3	Another Approach to the <i>Morpho</i> -color	200
9.5	New Applications of <i>Morpho</i> -Color	201
9.6	Summary	203

10. Wetting Phenomena on Structured Surfaces: Contact Angle, Pinning, Rolling and Bouncing	207
<i>Hiroyuki Mayama</i>	
10.1 Introduction	207
10.2 Equilibrium Contact Angle, Wenzel State and Cassie-Baxter State	208
10.3 Contact Angle: Thermodynamics of Static Wetting Phenomena	210
10.4 Pinning Effect	213
10.5 Lotus Effect	215
10.6 Bouncing Raindrops on Lotus Leaf: Laplace Pressure and Bouncing Phenomena in Dynamic Wetting of Macroscopic Droplets	220
10.6.1 Laplace Pressure Generated by Surface Structures	222
10.6.2 Dynamic Pressure	225
10.6.3 Bouncing Conditions of Macroscopic Droplets and Importance of Standing Angle and Length of Actual Surface Structures	225
10.6.4 Summary for Bouncing Behaviors of Macroscopic Droplets on Structured Surfaces	229
10.7 Bouncing Phenomena of Smaller Droplets on Structured Surface: Restitution Coefficient	230
10.8 Conclusion	238
11. Powdered Pressure-Sensitive Adhesives Developed Based on Biomimetics	243
<i>Syuji Fujii and Shin-ichi Akimoto</i>	
11.1 Introduction	243
11.2 What are Liquid Marbles?	244
11.3 Liquid Marbles Fabricated by Aphids	245
11.4 Development of Powdered Pressure-Sensitive Adhesives	250
11.5 Conclusions	254

12. Fabrication of Artificial Melanin-Based Structural Color Materials through Biomimetic Design	261
<i>Michinari Kohri</i>	
12.1 Introduction	261
12.2 Structural Colors Found in Nature	262
12.2.1 Role of Melanin in Structural Coloration	262
12.2.2 Melanin and Polydopamine	263
12.3 Structural Coloration by Assembly of Colloidal Particles	264
12.4 Structural Color Materials from Artificial Melanin Particles	265
12.4.1 Structural Coloration from Polydopamine Particles	265
12.4.2 Structural Coloration by Core-Shell Particles with Polydopamine as the Shell Layer	266
12.4.2.1 Particle design	266
12.4.2.2 High-visibility structural coloration	267
12.4.2.3 Effect of assembled structures on coloration	269
12.4.2.4 Effect of compositions on coloration	270
12.4.2.5 Effect of particle shapes on coloration	271
12.4.2.6 Application as coloring materials	272
12.5 Structural Coloration by Black Additives	274
12.6 Perspectives	274
13. Study of Bile Duct Stent Having Antifouling Properties Using Biomimetics Technique	279
<i>Atsushi Sekiguchi</i>	
13.1 Introduction	280
13.2 Biomimetics Technologies	282
13.3 Biliary Stents with Antifouling Properties	284

13.4	Production of Mold with Nanohole Structures Based on Snail Shell Surface Structures	286
13.5	Producing Antifouling Sheets for Stents	286
13.6	Fabrication of Biliary Stent and Liquid Passage Test	288
13.7	In vivo Study	291
13.7.1	Overview of in vivo Study	291
13.7.2	In vivo Study Procedure	291
13.7.3	Results of Animal Testing	292
13.8	Summary	294
14.	Biomimetic Designed Surfaces for Growth Suppression of Biofilm-Inspired Sharkskin Denticles	297
	<i>Mariko Miyazaki and Akihiro Miyauchi</i>	
14.1	Introduction	297
14.2	Concept of Biofilm Growth Suppression	301
14.3	Preparation for the Culture Test of Bacteria	303
14.3.1	Fabrication of Test Sample	303
14.3.2	Method of Bacterial Culture	305
14.3.3	Bacterial Culture Conditions	308
14.3.4	Method of Coverage of Bacteria Quantification	309
14.4	Evaluation of Antibacterial Effect by Biomimetics	310
14.5	Summary	312
	<i>Index</i>	317
