

<i>About the Authors</i>	vii
<i>Rules of Conduct and General Safety in the Laboratory</i>	viii
<i>Tools for Your Success</i>	xii
<i>Guided Tour through a Lab Exercise</i>	xiii
<i>What's New in the Twelfth Edition</i>	xvi
<i>Acknowledgments</i>	xx

PART ONE

Microscopic Techniques

1. Bright-Field Light Microscopy and Microscopic Measurement of Organisms	3
2. The Hanging Drop Slide and Bacterial Motility	15
3. Dark-Field Light Microscopy	19
4. Phase-Contrast Microscopy	25

PART TWO

Bacterial Cell Biology

5. Aseptic Technique	33
6. Negative Staining	43
7. Simple Staining	49
8. Gram Stain	57
9. Acid-Fast Staining Procedure	67
10. Endospore Staining	73
11. Capsule Staining	81
12. Flagella Staining	87

PART THREE

Basic Culture Techniques

13. Preparation of Microbiology Media and Equipment	95
14. The Spread-Plate Technique	103
15. The Streak-Plate Technique	109
16. The Pour-Plate Technique	117
17. Cultivation of Anaerobic Bacteria	123
18. Determination of Bacterial Numbers	133

PART FOUR

Microbial Biochemistry

19. Carbohydrates I: Fermentation and β -Galactosidase Activity	145
20. Carbohydrates II: Triple Sugar Iron Agar Test	151
21. Carbohydrates III: Starch Hydrolysis	157
22. Lipid Hydrolysis	161
23. Proteins I: The IMViC Tests	165
24. Proteins II: Gelatin and Casein Hydrolysis	173
25. Proteins III: Catalase Activity	181
26. Proteins IV: Oxidase Test	185
27. Proteins V: Urease Activity	191
28. Proteins VI: Lysine and Ornithine Decarboxylase Tests	197
29. Proteins VII: Phenylalanine Deamination	203
30. Proteins VIII: Dissimilatory Nitrate Reduction	209

PART FIVE

Environmental Factors Affecting Growth of Microorganisms

31. Temperature	217
32. pH	225
33. Osmotic Pressure	231
34. The Effects of Chemical Agents on Bacteria I: Disinfectants and Other Antimicrobial Products	237
35. The Effects of Chemical Agents on Bacteria II: Antibiotics	243
36. Bacterial Growth Curve	251

PART SIX

Environmental and Food Microbiology

37. Monitoring Water for Coliforms	265
38. Enumeration of Soil Microorganisms	273

39. Winogradsky Columns	279
40. Bioluminescence	287
41. Plate Counts and Quality Assessment of Milk	293

PART SEVEN

Medical Microbiology

42. Staphylococci	301
43. Pneumococcus	309
44. Streptococci	315
45. Neisseriae	323
46. Normal Human Flora	329

PART EIGHT

Eukaryotic Microbiology

47. Fungi I: Yeasts (<i>Ascomycota</i>)	337
48. Fungi II: <i>Zygomycota</i> (<i>Rhizopus</i>), <i>Ascomycota</i> (<i>Penicillium</i>), and <i>Basidiomycota</i> (<i>Agaricus</i>)	345

PART NINE

Microbial Genetics and Genomics

49. Isolation and Purification of Genomic DNA from Yeast and Bacteria	355
50. 16S rRNA Gene PCR and Sequencing	363
51. Mutations	369
52. Transformation	375
53. Conjugation	381
54. Generalized Transduction	387

Appendix A Dilutions with Sample Problems A-1

Appendix B Reagents, Solutions, Stains, and Tests A-11

Appendix C Culture Media A-15

*Appendix D Sources and Maintenance of Microbiological
Stock Cultures A-23*

*Appendix E Laboratory Technical Skills
and Laboratory Thinking Skills A-25*

*Appendix F Summary of Universal Precautions and
Laboratory Safety Procedures A-27*

Appendix G Biosafety Level (BSL) A-29

Appendix H pH and pH Indicators A-31

Index I-1
