## Contents

*Preface* xiii

### PART ONE

---

#### Foundational Papers

*Defining Ecology as a Science*

Sharon E. Kingsland 1

1

Stephen A. Forbes (1887)

*The Lake as a Microcosm*

Bulletin of the Peoria Scientific Association, pp. 77–87. Reprinted in Bulletin of the Illinois State Natural History Survey 15 (1925): 537–50

14

2

Henry Chandler Cowles (1899)

*The Ecological Relations of the Vegetation on the Sand Dunes of Lake Michigan*

The Botanical Gazette 27:95–117, 167–202, 281–308, 361–91

28

3

Frederic E. Clements (1936)

*Nature and Structure of the Climax*

The Journal of Ecology 24: 252–84

59

4

H. A. Gleason (1926)

*The Individualistic Concept of the Plant Association*

Bulletin of the Torrey Botanical Club 53:7-26  
98

5

Joseph Grinnell (1917)

*The Niche-Relationships of the California Thrasher*

The Auk 34:427-33  
118

6

A. J. Nicholson and V. A. Bailey (1935)

*The Balance of Animal Populations, Part I*

Proceedings of the Zoological Society, London, no. 3, pp. 551-98  
125

7

Raymond L. Lindeman (1942)

*The Trophic-Dynamic Aspect of Ecology*

Ecology 23:399-418  
157

**PART TWO**

---

## Theoretical Advances

*The Role of Theory in the Rise of Modern Ecology*

Leslie A. Real and Simon A. Levin 177

8

Frank W. Preston (1962)

*The Canonical Distribution of Commonness and Rarity, Part I*

Ecology 43:185-215, 431-32  
192

9

G. Evelyn Hutchinson (1957)

*Concluding Remarks*

Population Studies: Animal Ecology and Demography. Cold Spring Harbor Symposia on  
Quantitative Biology 22:415-27  
225

10

Lamont C. Cole (1954)

*The Population Consequences of Life History Phenomena*

The Quarterly Review of Biology 29:103–37  
238

11

Robert M. May (1974)

*Biological Populations with Non-Overlapping Generations: Stable Points, Stable Cycles, and Chaos*

Science 186:645–47  
273

12

Robert H. MacArthur and Eric R. Pianka (1966)

*On Optimal Use of a Patchy Environment*

The American Naturalist 100:603–9  
276

13

Vito Volterra (1926)

*Fluctuations in the Abundance of a Species Considered Mathematically*

Nature 118:558–60  
283

14

J. G. Skellam (1951)

*Random Dispersal in Theoretical Populations*

Biometrika 38:196–218  
286

**PART THREE**

---

*Theses, Antitheses, and Syntheses**Conversational Biology and Ecological Debate*

Joel G. Kingsolver and Robert T. Paine 309

15

A. G. Tansley (1935)

*The Use and Abuse of Vegetational Concepts and Terms*

Ecology 16:284–307  
318

16

G. E. Hutchinson (1959)

*Homage to Santa Rosalia; or, Why Are There So Many Kinds of Animals?*

The American Naturalist 93:145-59

342

17

Nelson G. Hairston, Frederick E. Smith, and Lawrence B. Slobodkin (1960)

*Community Structure, Population Control, and Competition*

The American Naturalist 94:421-25

357

18

Paul R. Ehrlich and Peter H. Raven (1964)

*Butterflies and Plants: A Study in Coevolution*

Evolution 18:586-608

362

19

J. L. Harper (1967)

*A Darwinian Approach to Plant Ecology*

The Journal of Ecology 55:247-70

385

20

Thomas W. Schoener (1971)

*Theory of Feeding Strategies*

Annual Review of Ecology and Systematics 2:369-404

409

---

**PART FOUR**

---

**Methodological Advances***New Approaches and Methods in Ecology*

James H. Brown 445

21

Lennart von Post (1967 [1916])

*Forest Tree Pollen in South Swedish Peat Bog Deposits*Pollen et Spores 9:378-401. A translation by Margaret Bryan Davis and Knut Faegri of *Om skogsträdspollen i sydsvenska torfnosslagerföljder (foredragsreferat)* (Geologiska Foereningen i Stockholm. Foerhandlingar 38:384-34), with an introduction by Knut Faegri and Johs. Iversen

456

28

J. Davidson and H. G. Andrewartha (1948)

*The Influence of Rainfall, Evaporation and Atmospheric Temperature on Fluctuations in the Size of a Natural Population of Thrips Imaginis (Thysanoptera)*

The Journal of Animal Ecology 17:203-222

616

29

John M. Teal (1962)

*Energy Flow in the Salt Marsh Ecosystem of Georgia*

Ecology 43:614-24

639

30

Margaret B. Davis (1969)

*Climatic Changes in Southern Connecticut Recorded by Pollen Deposition at Rogers Lake*

Ecology 50:409-22

650

31

Alex S. Watt (1947)

*Pattern and Process in the Plant Community*

The Journal of Ecology 35:1-22

664

32

Robert H. MacArthur (1958)

*Population Ecology of Some Warblers of Northeastern Coniferous Forests*

Ecology 39:599-619

686

33

John Langdon Brooks and Stanley I. Dodson (1965)

*Predation, Body Size, and Composition of Plankton*

Science 150:28-35

707

## PART SIX

Experimental Manipulations in Lab and Field Systems  
*Manipulative Experiments as Tests of Ecological Theory*

Jane Lubchenco and Leslie A. Real 715

34

H. B. D. Kettlewell (1955)

*Selection Experiments on Industrial Melanism in the Lepidoptera*

Heredity 9: 323–42

734

35

Thomas Park (1948)

*Experimental Studies of Interspecies Competition. I. Competition between Populations of the Flour Beetles, Tribolium confusum Duvall and Tribolium castaneum Herbst*

Ecological Monographs 18: 267–307

754

36

C. B. Huffaker (1958)

*Experimental Studies on Predation: Dispersion Factors and Predator-Prey Oscillations*

Hilgardia 27: 343–83

795

37

Joseph H. Connell (1961)

*The Influence of Interspecific Competition and Other Factors on the Distribution of the Barnacle Chthamalus stellatus*

Ecology 42: 710–23

836

38

Robert T. Paine (1966)

*Food Web Complexity and Species Diversity*

The American Naturalist 100: 65–75

850

39

Daniel S. Simberloff and Edward O. Wilson (1969)

*Experimental Zoogeography of Islands: The Colonization of Empty Islands*

Ecology 50:278-96

861

40

Gene E. Likens, F. Herbert Bormann, Noye M. Johnson, D. W. Fisher, and  
Robert S. Pierce (1970)*Effects of Forest Cutting and Herbicide Treatment on Nutrient Budgets in the  
Hubbard Brook Watershed-Ecosystem*

Ecological Monographs 40:23-47

880

*List of Contributors* 905
