Preface	vii
Contributors	xi

Part I. Methods for Exogenous Expression of Ion Channels in Cells

- 1 Functional Reconstitution of the Human Epithelial Na⁺ Channel
in a Mammalian Expression System
**Alexander Staruschenko, Rachell E. Booth, Oleh Pochynyuk,
James D. Stockand, and Qiusheng Tong** 3
- 2 Overexpression of Proteins in Neurons Using
Replication-Deficient Virus
Richard M. Ahlquist and Jane M. Sullivan 15
- 3 Exogenous Expression of Proteins in Neurons Using
the Biolistic Particle Delivery System
Nikita Gamper and Mark S. Shapiro 27

Part II. Methods for Studying Channel Structure-Function

- 4 Tertiary and Quaternary Structure Formation of Voltage-Gated
Potassium Channels
John M. Robinson, Andrey Kosolapov, and Carol Deutsch 41
- 5 Biophysical Approach to Determine the Subunit Stoichiometry
of the Epithelial Sodium Channel Using the *Xenopus laevis*
Oocyte Expression System
Farhad Kosari, Shaohu Sheng, and Thomas R. Kleyman 53
- 6 Spectroscopy-Based Quantitative Fluorescence Resonance
Energy Transfer Analysis
Jie Zheng 65

Part III. Methods for Studying Channel Regulation and Physiological Function

- 7 Probing the Effects of Phosphoinositides on Ion Channels
Chou-Long Huang 81

8	Epithelial Sodium Channel in Planar Lipid Bilayers <i>Bakhrom K. Berdiev and Dale J. Benos</i>	89
9	A Simple In Vivo Method for Assessing Changes of Membrane-Bound Ion Channel Density in <i>Xenopus</i> Oocytes <i>Mouhamed S. Awayda, Weijian Shao, Ivana Vukojicic, and Abderrahmane Bengrine</i>	101
10	Preparation of Cortical Brain Slices for Electrophysiological Recording <i>Costa M. Colbert</i>	117
11	Juxtacellular Labeling and Chemical Phenotyping of Extracellularly Recorded Neurons In Vivo <i>Glenn M. Toney and Lynette C. Daws</i>	127
12	Carbon Fiber Amperometry in the Study of Ion Channels and Secretion <i>Duk-Su Koh</i>	139
Part IV. Methods for Studying Channelopathies, Genetic Screening, and Molecular Biology		
13	Genetic Screening for Functionality of Bacterial Potassium Channel Mutants Using K ⁺ Uptake-Deficient <i>Escherichia coli</i> <i>Lyubov V. Parfenova and Brad S. Rothberg</i>	157
14	KCNQ1 K ⁺ Channel-Mediated Cardiac Channelopathies <i>Gildas Loussouarn, Isabelle Baró, and Denis Escande</i>	167
15	Tissue-Specific Transgenic and Knockout Mice <i>Andrée Porret, Anne-Marie Mérillat, Sabrina Guichard, Friedrich Beermann, and Edith Hummler</i>	185
Index		207
