

CONTENTS

<i>Chapter 1</i>	
Physics and Biology	1
Physics and Life	1
Molecular Physics	3
Molecular Biophysics	9
Thermodynamics and Biology	12
Information Theory	19
<i>Chapter 2</i>	
Cells, Viruses, and Heredity	27
The Living Cell	27
Cell Division	37
Viruses and Bacteriophages	44
Basic Laws of Genetics	50
Mutations and Mutability	60
Genetics of Bacteria and Phages	66
<i>Chapter 3</i>	
Biological Molecules	79
Amino Acids and Proteins	79
Asymmetry of Biological Molecules	87
Primary Structure of Proteins	94
Nucleic Acids	101
Some Biochemical Processes in the Cell	109
<i>Chapter 4</i>	
Physics of Macromolecules	123
Physical Properties of Macromolecules	123
Rotational-Isomeric Theory of Macromolecules	132
Macromolecules—Cooperative Systems	138

Crystalline Polymers	145
Methods for Studying Macromolecules in Solution	152
Polyelectrolytes	159
<i>Chapter 5</i>	
The Physics of Proteins	165
Secondary Structure of Proteins	165
Tertiary and Supramolecular Structures of Proteins	176
Interactions Which Determine the Three-Dimensional Structure of Proteins	185
Conformational Transitions of Proteins	193
Theory of Helix-Coil Transitions	199
Optical Properties of Proteins and Polypeptides	207
Optical Activity of Polypeptide Chains	218
Anomalous Dispersion of Magneto-Optical Rotation	228
<i>Chapter 6</i>	
The Physics of Nucleic Acids	233
Biological Role of Nucleic Acids	233
Secondary Structure of DNA, RNA, and Polynucleotides	239
Denaturation of DNA	254
Renaturation of DNA and Forces Which Stabilize the Double Helix	265
DNA Reduplication	273
Statistical Physics and Kinetics of DNA Reduplication	286
<i>Chapter 7</i>	
Protein Synthesis	301
Problems of the Genetic Code	301
Matrix Synthesis of Proteins	309
The Genetic Code	322
Point Mutations	336
Problems of Regulation	344
<i>Chapter 8</i>	
Biological Specificity and Structure of Molecules	357
Immunity	357
Antibodies and Antigens	367
Enzyme Reactions	377
Nature of Enzymatic Action	386
Allostery and Oxygenation of Hemoglobin	397
Nucleoproteins and Synapsis of Chromosomes	407
<i>Chapter 9</i>	
Mechanochemical Processes	417
The Nature of Mechanochemical Processes	417
Muscle Action	425

Molecular Theories of Muscle Action	435
Motion of Cells and Mitosis	451
<i>Chapter 10</i>	
Problems of Molecular Biophysics	459
Macromolecules and Biology	459
Molecular Biophysics and Quantum Mechanics	464
<i>Chapter 11</i>	
Conclusion	471
References	475
Index	505
