Preface	v
-------------------	---

THEORETICAL POPULATION GENETICS AND MOLECULAR EVOLUTION

Some Recent Data Supporting the Neutral Theory	<i>M. Kimura</i>	3
Multigene Families and Their Implications for Evolutionary Theory [*]	<i>T. Ohta</i>	15
A Trend in Population Genetics Theory	<i>N. Takahata</i>	27

ADAPTIVE EVOLUTION AT THE MOLECULAR LEVEL

Looking at Adaptive Evolution from the Viewpoint of the Neutral Theory	<i>T. Mukai</i>	51
Molecular Evolution of a Urea Cycle Enzyme to δ -Crystallin	<i>M. Mori, T. Matsubasa, Y. Amaya, and M. Takiguchi</i>	69

- Molecular Evolution of Enzymes toward Nylon-Oligomers, a
Xenobiotic Compound . . . *H. Okada, S. Negoro, and I. Urabe* 81

GENETIC VARIATIONS AT THE DNA LEVEL

- Structural Analysis of the Genes within the HLA Class III Region
on Chromosome 6 *T. Sasazuki,
K. Urabe, F. Harada, T. Iwanaga, and A. Kimura* 99
- Mitochondrial DNA in *Drosophila*: the Genetics and Evolution
. *Y. Satta and S. I. Chigusa* 117
- Molecular Phylogeny and Evolution of Human Mitochondrial DNA
. *S. Horai* 135
- Generation and Spread of Globin Gene Mutations in Populations:
 β -Thalassemia in Asian Countries
. *Y. Fukumaki and S. Fucharoen* 153

CODON, ANTICODON AND GENOME EVOLUTION

- Evolution of Codons and Anticodons in Eubacteria . . . *A. Muto,
T. Ohama, Y. Andachi, F. Yamao, R. Tanaka, and S. Osawa* 179
- G+C% Mosaic Structures of the Higher Vertebrate Genome and
Distribution of Dinucleotide Frequencies
. *K. Wada, I. Watanabe, R. Tsuchiya, and T. Ikemura* 195

REPETITIVE SEQUENCES, RETROPOSONS, AND TRANSPOSONS

- Evolutionary Implication of Sex Chromosome-Specific Repetitive
DNA Sequences in Birds Belonging to the Order, Galliformes
. *S. Mizuno* 213
- Transfer RNA-Derived Retoposons *N. Okada* 227

Translational Frameshifting in IS Elements and in Other Genetic Systems	<i>Y. Sekine and E. Ohtsubo</i> 243
Genetic Variations and Regulation of P Elements in <i>Drosophila melanogaster</i>	<i>E. Nitasaka and T. Yamazaki</i> 263
GENETICS AND MOLECULAR EVOLUTION	
ANALYSES OF DNA SEQUENCE DATA AND MOLECULAR PHYLOGENIES	
Phylogenetic Position of Archaeobacteria and Branching Patterns among Three Archaeobacterial Groups and Eukaryotes	<i>T. Miyata, N. Iwabe, K. Kuma, Y. Kawanishi, Y. Mukohata, K. Ihara, and M. Hasegawa</i> 279
Molecular Evolution of Human and Simian Immunodeficiency Viruses	<i>E. N. Moriyama and T. Gojobori</i> 291
DNA Sequence Analysis and Evolution of Hominoidea	<i>M. Hasegawa and H. Kishino</i> 303
Subject Index	319
