

CONTENTS

The 8th international symposium on sexual reproduction in seed plants, ferns and mosses	10
Congress organization.....	11
PART I	
Microsporogenesis, microgametogenesis, anther and pollen germination in 13 ✓	
Brown, R.C. & B.E. Lemmon. Ultrastructure of meiosis in the moss <i>Entodon seductrix</i>	15
Chauhan, E. & M. Lal. Cytochemical and ultrastructural studies on sporogenesis in the moss <i>Physcomitrium cyathicarpum</i> Mitt.	16
Bednara, J. & B. Rodkiewicz. Distribution of plastids and mitochondria during sporogenesis in <i>Equisetum hyemale</i>	17
Keijzer, C.J. Anther development of <i>Gasteria</i>	20
Shridhar & D. Singh. Anther development and pollen formation in Cucurbitaceae	21
Souvré, A., L. Albertini, A.C. Dhar & M. Petitprez. Microspore and pollen grain formation in <i>Rhoeo discolor</i> Hance	24
Pacini, E., G.G. Franchi & L.M. Bellani. Pollen grain development in the olive (<i>Olea europaea</i> L.): ultrastructure and anomalies	25
Souvré, A., L. Albertini & A.C. Dhar. The effect of cold (4 °C) on ³ H-proline and ¹⁴ C-hydroxyproline incorporation in microspores, tapetum and connective of <i>Rhoeo discolor</i> Hance. A radioautographic study	28 ✓
Wiermann, R. Biochemistry of pollen pigmentation	32
Herich, R. & A. Lux. Degradation of tapetal cell nuclei during the formation of microspores	33
Jensen, W.A. The effect of a chemical hybridizing agent on the development of wheat pollen	34 ✓
Habintore, E., J.P. Tilquin & A. Serrhini. Genetical approach of autosterility in <i>Camelia sinensis</i> L.	35
Sawhney, V.K. Hormonal and temperature control of male-sterility in a tomato mutant	36
Van Marrewijk, G.A.M. & L.C.J.M. Suurs. Characterization of cytoplasmic male sterility in <i>Petunia x hybrida</i> (Hook.) Vilm.	39
Bino, R.J., S.J. de Hoop & A. van der Neut. Cytochemical localization of cytochrome oxidase in anthers of cytoplasmic male sterile <i>Petunia hybrida</i> (Hook.) Vilm.	44 ✓
Noher de Halac, I. Sterility of microspores in <i>Oenothera hookeri</i> Velans	47
Noher de Halac, I. Stages of tapetal cell development in sterile anthers of <i>Oenothera hookeri</i> Velans	50
Tan, M.M.C., J. de Bruin, G.A.M. van Marrewijk, A.J. Kool & H.J.J. Nijkamp. Isolation of <i>Petunia hybrida</i> cytoplasts	51
Schröder, M.B. & R. Hagemann. Plastid content of generative cells in Liliaceae	52
Hagemann, R. & M.B. Schröder. New results about the presence of plastids in generative and sperm cells of Gramineae	53
Rowley, J.R. & B. Walles. The surface coating of microspores and microspore mother cells in <i>Pinus sylvestris</i>	56
Willemse, M.T.M. Light absorption of pollen tube walls	57
Barnabás, B. Effect of water loss on germination ability of maize pollen	58
Van Lammeren, A.A.M. Microtubular configurations during endosperm and pollen development in <i>Zea</i> and <i>Gasteria</i> as visualized by immunofluorescence	59
Derksen, J. & J.A. Traas. Growth of tobacco tubes in vitro; effects of drugs interfering with the cytoskeleton	64
Waki-Hirosige, H., S. Nakamura & Y. Yamada. Fine structural research on germinating lily pollen tubes in vitro and in vivo	68
Kroh, M. & B. Knuiman. Membrane-structure and events in non-plasmolyzed and plasmolyzed tobacco pollen tubes: a freeze-fracture study	71
Cresti, M., F. Ciampolini, D.L.M. Mulcahy & G. Mulcahy. Ultrastructure of <i>Nicotiana glauca</i> and <i>Petunia hybrida</i> pollen tubes grown in semi-vitro conditions	72
Hough, T., P. Bernardt, R.B. Knox & E.G. Williams. Use of fluorochromes in pollen biology	73
Cadic, A., R.S. Sangwan & B.S. Sangwan-Norreel. Stress related structural modifications in the pollen of <i>Datura</i>	74
Dashek, W.V., C.S. Ridenour & R.R. Mills. <i>Lilium longiflorum</i> pollen germination and tube elongation as markers for sulfur dioxide	75
Sangwan, R.S. & B.S. Sangwan-Norreel. Early indicators of in vitro transformation from gametophyte to sporophyte in <i>Datura</i>	76

PART 2

Stigma, incompatibility and pollen germination in vivo	79
Ramm-Anderson, S. & R.B. Knox. Localization of pollen surface glycoproteins using monoclonal antibodies	81
Said, C., P. Zandonella, T. Gaude & C. Dumas. Cytochemistry of the stigma surface components using the print technique	83
Owens, S.J. Stigma structure and the pollen-stigma interaction in Caesalpinioideae - Leguminosae	84
Kenrick, J., P. Bernardt, R. Marginson, G. Beresford & R.B. Knox. Acacia breeding systems	88
Kormuták, A. Incompatibility between <i>Pinus nigra</i> Arn. and <i>Pinus sylvestris</i> L. and overcoming it with chemomutagenic substances	90
Wojciechowska, W. Immediate distinction between self-pollination and cross-pollination and between self-compatibility and self-incompatibility in Papilionaceae - preliminary report	93
Serrhini, A., J.P. Tilquin & E. Habintore. Cytological approach of sterility and incompatibility in Tea (<i>Camelia sinensis</i>)	96
Tilquin, J.P., A. Serrhini & E. Habintore. Incompatibility in <i>Camelia sinensis</i> ; a general approach	97
Nakanishi, T. & M. Sawano. Pollen tube behavior by carbon dioxide in relation to overcoming self-incompatibility in Brassica	99
O'Neill, P., M.B. Singh, T.F. Neales, R.B. Knox & E.G. Williams. Carbon dioxide blocks the stigma callose response following incompatible pollinations in Brassica	100
Gaude, T., A. Palloix, Y. Hervé & C. Dumas. Molecular interpretation of overcoming self-incompatibility in Brassica	102
Dickinson, H.G., I.N. Roberts, C.J. Elleman, G. Harrod & M.I. Zuberi. Early events on the Brassica stigma following compatible and incompatible intraspecific matings	105
Hodgkin, T. & G.D. Lyon. Pollen germination inhibitors associated with the self-incompatible response of Brassica oleracea L.	108
Kenrick, J., V. Kaul & R.B. Knox. Self-incompatibility in the nitrogen-fixing tree Legume, Acacia retinodes: pre- or post-zygotic mechanism?	111
Larsen, K. Cell surface recognition glycoproteins and their possible role in angiosperm self-incompatibility	112
Rouse, J.L., R.B. Knox & E.G. Williams. Unilateral hybridization in <i>Rhododendron</i>	115
Kaul, V., J.L. Rouse, R.B. Knox & E.G. Williams. Early post-fertilization development in <i>Rhododendron</i>	116
Willemsse, M.T.M. & M.A.W. Franssen-Verheijen. Pollen tube penetration in the style of <i>Gasteria</i>	118
Williams, E.G., P. O'Neill & T. Hough. The pollen tube as an experimental growth system	119
Gilissen, L.J.W. & F.A. Hoekstra. Style-controlled corolla wilting in <i>Petunia hybrida</i> L.	121

PART 3

Megasporogenesis, ovary, embryo sac development, fertilization and embryo and endosperm development	123
Sheffield, E. & E.G. Cutter. Cryo scanning electron microscopy of reproduction in cryptogams.....	125
Tigerschiöld, E. Gametangia in ceylonese species of the fern familie Thelypteridaceae....	126
Llewellyn, G.C., J.D. Reynolds & W.V. Dashek. Water fern (<i>Marsilea quadrifolia</i>) reproduction as a bioassay for aflatoxin B ₁ and T-2 Tricothecene toxin	127
Pennell, R.I. & P.R. Bell. Fertilization in <i>Taxus baccata</i> L.	131
Polito, V.S. & Nai Yan Li. Pistillate flower differentiation in <i>Juglans regis</i> : a developmental basis for heterodichogamy	134
Went, J.L. van, N.M. van Beek & J.M. van Tuyl. Ovule development in relation to ovule position and flower development in <i>Lilium</i>	135
Snieszko, R. & C. Harte. Genetic basis of callose pattern, megaspore degeneration and polarity in the ovules of <i>Oenothera</i>	136
Schulz, P. Ultrastructure and ultracytochemical localization of acid phosphatase in the dyad, tetrad and developing megaspore of <i>Capsella bursa-pastoris</i>	137
Cass, D. & D. Peteya. Aspects of megagametogenesis in <i>Hordeum vulgare</i>	140
Wilms, H.J. Behaviour of spinach cells in pollen tubes prior to fertilization	143
Russell, S.D. Sperm specificity in <i>Plumbago zeylanica</i>	145
McConchie, C.A., S. Jobson & R.B. Knox. The structure of sperm cells in Brassica ..	147
Kadej, A. & F. Kadej. Sperm cells in the fertilization process in <i>Lycopersicon esculentum</i>	149

Czapik, R. Secondary nucleus in Rosoideae	150
Van Went, J.L., C.H. Theunis & A.P.M. den Nijs: Embryo sac ultrastructure before and after fertilization in <i>Cucumis stivus</i>	153
Bannikova, V.P. & T.A. Plyushch. Embryo sac ultrastructure in <i>Peperomia blanda</i> H.B. et K. before and after fertilization	155
Choizez-Givron, D. Sexual reproduction in the genus <i>Fuchsia</i> . Embryogenesis in <i>F. Fulgens</i>	156
Longly, B., T. Rabau & B.-P. Louant. A cytological method for detecting coexistence of sexual and diplosporic reproductive processes I	157
Abeln, Y.S., H.J. Wilms & A.J.P. van Wijk. Initiation of apomictic seed production in Kentucky bluegrass, <i>Poa pratensis</i> L.	160
Nijs, A.P.M. den & P. Milotay. Pollination and fertilization in pickling and slicing cucumbers	165
Singh, M.B., R.B. Knox & E.G. Williams. Gamete competition in oil seed rape: effect of pollen - galactosidase deficiency on fertilization	166
Georgieva, I.D. Cytochemical investigation of <i>Lilium regale</i> embryogenesis after pollination with -irradiated pollen	167
Erdelská, O. Some structural features of the embryo/endosperm interaction in angiosperms	168
Schel, J.H.N., A.A.M. van Lammeren & H. Kieft. Ultrastructural analysis of embryo-endosperm interactions in developing maize seeds (<i>Zea mays</i> L.)	171
Shah, C.K. Reproductive physiology of <i>Limnophyton obtusifolium</i> (L.) Mig. A histochemical analysis	172
Shah, C.K. Grass embryos - A SEM and histochemical analysis	173
Wieg, L. & G.C. Renzoni. DNA measurements in the chalazal proliferating cells of <i>Capsella bursa-pastoris</i> (L.) Medic.	176
Ryczkowski, M. Respiration rate of the embryo in its natural environment in vitro	177
Ryczkowski, M., A. Kowalska & W. Reczyński. Element concentrations in the sap surrounding the developing embryo	180
Borzan, Z. Hybridization between <i>Pinus nigra</i> and <i>Pinus sylvestris</i> and morphology of chromosomes	181
Pretová, A. In Vitro embryogenesis of flax (<i>Linum usitatissimum</i>).....	182
Maheswaran, G. & E.G. Williams. Direct somatic embryogenesis for rapid genotype propagation.....	183
Batygina, T.B. Applied aspects of embryology.....	185
Chebatarus, A.A. To the morpho-functional gametogenesis status of higher plant.....	191
Willemsse, M.T.M. Sexual reproduction of seed plants, ferns and mosses. A background.....	194
List of participants.....	200
Subject index.....	203
Plant index	205
Authors index	206
