

Contents

Preface	page vii
Contributors	xi
1 Functions of Elastomeric Proteins in Animals	1
R. McNeill Alexander	
2 Elastic Proteins: Biological Roles and Mechanical Properties	15
John Gosline, Margo Lillie, Emily Carrington, Paul Guerette, Christine Ortlepp, and Ken Savage	
3 Elastin as a Self-Assembling Biomaterial	39
C. M. Bellingham and E. W. Keeley	
4 Ideal Protein Elasticity: The Elastin Models	54
D. W. Urry, T. Hugel, M. Seitz, H. Gaub, L. Sheiba, J. Dea, J. Xu, L. Hayes, E. Prochazka, and T. Parker	
5 Fibrillin: From Microfibril Assembly to Biomechanical Function	94
Cay M. Kielty, Clair Baldock, Michael J. Sherratt, Matthew J. Rock, David Lee, and C. Adrian Shuttleworth	
6 Spinning an Elastic Ribbon of Spider Silk	115
David P. Knight and Fritz Vollrath	
7 Sequences, Structures, and Properties of Spider Silks	136
R. Lewis	
8 The Nature of Some Spiders' Silks	152
Fritz Vollrath and David P. Knight	

9 Collagen: Hierarchical Structure and Viscoelastic Properties of Tendon Peter Fratzl	175
10 Collagens with Elastin- and Silk-like Domains J. Herbert Waite, Eleonora Vaccaro, Chengjun Sun, and Jared Lucas	189
11 Conformational Compliance of Spectrins in Membrane Deformation, Morphogenesis, and Signalling Graham H. Thomas and Dennis E. Discher	213
12 Giant Protein Titin: Structural and Functional Aspects J. Trinick and L. Tskhovrebova	242
13 Structure and Function of Resilin Svend Olav Andersen	259
14 Gluten, the Elastomeric Protein of Wheat Seeds Peter R. Shewry, Nigel G. Halford, Peter S. Belton, and Arthur S. Tatham	279
15 Biological Liquid Crystal Elastomers David P. Knight and Fritz Vollrath	302
16 Restraining Cross-Links in Elastomeric Proteins Allen J. Bailey	321
17 Comparative Structures and Properties of Elastic Proteins Arthur S. Tatham and Peter R. Shewry	338
18 Mechanical Applications of Elastomeric Proteins – A Biomimetic Approach J. F. V. Vincent	352
19 Biomimetics of Elastomeric Proteins in Medicine Allen J. Bailey	366
Index	379
