

Brief Contents

	Preface	xix
CHAPTER 1	Introduction to Molecular Biology	1
SECTION 1	Protein Structure and Function	27
CHAPTER 2	Protein Structure	28
CHAPTER 3	Protein Function	71
SECTION 2	Nucleic Acids and Nucleoproteins	99
CHAPTER 4	Deoxyribonucleic Acid Structure	100
CHAPTER 5	Nucleic Acid Technology	130
CHAPTER 6	Chromosome Structure	174
SECTION 3	Genetics and Virology	211
CHAPTER 7	Genetic Analysis in Molecular Biology	212
CHAPTER 8	Viruses in Molecular Biology	263
SECTION 4	DNA Metabolism	317
CHAPTER 9	DNA Replication	318
CHAPTER 10	DNA Damage and Repair	379
CHAPTER 11	Recombination	441
	<i>Hannah Klein</i>	
CHAPTER 12	Transposons and Other Mobile Elements	504
	<i>Joseph E. Peters</i>	
SECTION 5	RNA Synthesis and Processing	553
CHAPTER 13	Bacterial RNA Polymerase	554

CHAPTER 14	Regulation of Bacterial Gene Transcription	588
CHAPTER 15	RNA Polymerase II: Basal Transcription	652
CHAPTER 16	RNA Polymerase II: Regulation	687
CHAPTER 17	RNA Polymerase II: Cotranscriptional and Post-transcriptional Processes	749
CHAPTER 18	Ribosomal RNA, Transfer RNA, and Organellar RNA Synthesis.	827
SECTION 6	Protein Synthesis	871
CHAPTER 19	Protein Synthesis: The Genetic Code	872
CHAPTER 20	Protein Synthesis: The Ribosome	916
	Index	973
