Preface	ix
Editors	xi
Acknowledgments	xiii
Contributors	xv

Part I Overview of Mutualistic Associations and Defense

1. Introduction: Symbiosis, Defensive Mutualism, and Variations on the Theme	3
<i>James F. White, Jr. and Mónica S. Torres</i>	
2. Defensive Mutualism and Grass Endophytes: Still Valid after All These Years?	9
<i>Keith Clay</i>	
3. Overview of Defensive Mutualism in the Marine Environment	21
<i>Charles F. Wimpee, Elizabeth A. O'Grady, and Erika L. Olson</i>	

Part II Prokaryotic Defensive Symbionts

4. Microbial Symbionts for Defense and Competition among Ciliate Hosts	45
<i>Hans-Dieter Görtz, Giovanna Rosati, Michael Schweikert, Martina Schrädlhammer, Gen Omura, and Toshinobu Suzuki</i>	
5. Bacterial Chemical Defenses of Marine Animal Hosts	65
<i>Eric W. Schmidt</i>	
6. Is the <i>Vibrio fischeri</i> – <i>Euprymna scolopes</i> Symbiosis a Defensive Mutualism?	85
<i>Eric V. Stabb and Deborah S. Millikan</i>	
7. Entomopathogenic Nematode and Bacteria Mutualism	99
<i>Heather S. Koppenhöfer and Randy Gaugler</i>	
8. Interspecies Competition in a Bacteria–Nematode Mutualism	117
<i>Nydia Morales-Soto, Holly Snyder, and Steven Forst</i>	
9. Defensive Symbionts in Aphids and Other Insects	129
<i>Kerry M. Oliver and Nancy A. Moran</i>	
10. Fungus-Growing Ant–Microbe Symbiosis: Using Microbes to Defend Beneficial Associations within Symbiotic Communities	149
<i>Michael Poulsen, Ainslie E. F. Little, and Cameron R. Currie</i>	

Part III Eukaryotic Defensive Symbionts

11. Chemical Defense in Lichen Symbioses 167
James D. Lawrey
12. Arbuscular Mycorrhizae as Defense against Pathogens 183
José Manuel García Garrido
13. Evaluation of Mycorrhizal Symbioses as Defense in Extreme Environments 199
John Dighton
14. Effect of Arbuscular Mycorrhizal Symbiosis on Enhancement of Tolerance
to Abiotic Stresses 217
Hinanit Koltaï and Yoram Kapulnik
15. Conifer Endophytes..... 235
Anna Maria Pirttilä and Piippa R. Wäli
16. Diversity and Ecological Roles of Clavicipitaceous Endophytes of Grasses 247
Mariusz Tadych, Mónica S. Torres, and James F. White, Jr.
17. Contributions of Pharmaceutical Antibiotic and Secondary Metabolite Discovery
to the Understanding of Microbial Defense and Antagonism 257
Gerald Bills, David Overy, Olga Genilloud, and Fernando Peláez

Part IV Fungal Endophyte as Model System to Understand Defensive Mutualism

18. Extensions to and Modulation of Defensive Mutualism in Grass Endophytes..... 301
*Thomas L. Bultman, Terrence J. Sullivan, Michael H. Cortez, Timothy J. Pennings,
and Janet L. Andersen*
19. Conceptual Model for the Analysis of Plant-Endophyte Symbiosis
in Relation to Abiotic Stress 319
Gregory P. Cheplick
20. Habitat-Adapted Symbiosis as a Defense against Abiotic and Biotic Stresses..... 335
Rusty J. Rodriguez, Claire Woodward, Yong-Ok Kim, and Regina S. Redman
21. Insect Herbivory and Defensive Mutualisms between Plants and Fungi 347
Alison J. Popay
22. Fungal Endophytes: Defensive Characteristics and Implications
for Agricultural Applications..... 367
*Luis C. Mejía, Edward Allen Herre, Ajay P. Singh, Vartika Singh, Nicholi Vorsa,
and James F. White, Jr.*
23. Endophytic Niche and Grass Defense 385
Charles W. Bacon, Dorothy M. Hinton, and Anthony E. Glenn
- Index 405
