

CONTENTS

Preface	vii
Short Communication	1
Biological Complexity by Natural Selection and Self-organization: A Game of Survival <i>C. Hui</i>	3
Research and Review Studies	7
Chapter 1 Epidemiological Modeling for the Real World <i>David P. Wilson</i>	9
Chapter 2 Structure-Dynamics Relationships of Metabolic Networks: The Susceptibility-Responsivity Connection Of Enzymes <i>Antonio S. Torralba</i>	55
Chapter 3 Haptotaxis in Pre-necrotic Avascular Tumours <i>D.G. Mallet and G.J. Pettet</i>	81
Chapter 4 Mathematical Analysis of a Cholera Model with Carriers: Assessing the Effects of Treatment <i>Z. Mukandavire, F.K. Mutasa, S.D. Hove-Musekwa, S. Dube and J.M. Tchuente</i>	109
Chapter 5 Mathematical Models and Parameter Estimation for Heterogeneous Cell Population Dynamics <i>Gennady Bocharov, Tatyana Luzyanina, Dirk Roose, Hagit Alon, Martin Meier-Schellersheim and Zvi Grossman</i>	147
Chapter 6 Immuno-Epidemiology and HIV/AIDS: A Modeling Perspective <i>Swati DebRoy and Maia Martcheva</i>	175
Chapter 7 Mathematical Models of Particle Deposition and Bronchial Clearance in the Human Respiratory Tract – A Review <i>Robert Sturm</i>	193

Chapter 8	Systems Biology of the Tryptophan Operon <i>M. Santillán, Eduardo S. Zeron and M.C. Mackey</i>	217
Chapter 9	Non-linear Transmission, Mortality and Stability of Discrete-Time Infectious Disease Models <i>A. Korobeinikov, P.K. Maini and W.J. Walker</i>	237
Chapter 10	Mathematical Stability Analysis in Biomechanical Applications <i>Peter Giesl and Heiko Wagner</i>	261
Chapter 11	The Behaviour of the lipid Vesicle under Osmotic Stress <i>Dumitru Popescu, Liviu Movileanu and Alin Gabriel Popescu</i>	275
Index		295
