1 Lipids in Thylakoid Membranes and Photosynthetic Cells	1-9
<i>Hajime Wada and Norio Murata</i>	
Summary	1
I. Introduction	2
II. Genome Sequences Reveal Genes Involved in Lipid Synthesis	2
III. Mutagenesis and Transgenic Techniques	4
IV. Crystallographic Analysis of Soluble and Membrane-Bound Proteins	5
V. Electron Microscopy	6
VI. Improvements in Analytical Techniques	6
VII. Physical Methods for Assessing the Fluidity of Membrane Lipids	6
VIII. DNA Microarrays	6
IX. Perspective	7
Acknowledgements	7
References	7
2 Fatty Acid Biosynthesis in Plants – Metabolic Pathways, Structure and Organization	11-34
<i>Adrian P. Brown, Antoni R. Slabas and John B. Rafferty</i>	
Summary	12
I. Introduction	12
II. Biosynthesis of Fatty Acids	12
III. Export of Fatty Acids from the Plastid	15
IV. Biosynthesis of Polyunsaturated Fatty Acids, Unusual Fatty Acids and Chain Elongation	16
V. Acylation Reactions and the Biosynthesis of Triacylglycerol	17
VI. Structural Models for Fatty Acid Biosynthetic Pathway Components	20
VII. Integration of Fatty Acid Biosynthesis with Other Metabolic Machinery	27
VIII. Conclusions	28

	Acknowledgements	28
	References	28
3	Biosynthesis and Function of Chloroplast Lipids	35-55
	<i>Mie Shimojima, Hiroyuki Ohta and Yuki Nakamura</i>	
	Summary	35
	I. Introduction	36
	II. Structures of Chloroplast Lipids	36
	III. Biosynthesis of Chloroplast Lipids	38
	IV. Regulation of Lipid Biosynthesis	44
	V. Concluding Remarks	49
	Acknowledgements	50
	References	50
4	Lipids in Plant Mitochondria	57-76
	<i>Radin Sadre and Margrit Frentzen</i>	
	Summary	57
	I. Introduction	58
	II. Lipid Composition of Mitochondrial Membranes	59
	III. Lipid Biosynthetic Pathways within Mitochondria	60
	IV. Concluding Remarks	70
	Acknowledgements	70
	References	70
5	Plant Sphingolipids: Structure, Synthesis and Function	77-115
	<i>Ming Chen, Edgar B. Cahoon, Mariana Saucedo-García, Javier Plasencia and Marina Gavilanes-Ruíz</i>	
	Summary	78
	I. Introduction	78
	II. Sphingolipid Structure	79
	III. Synthesis of Sphingolipids	82
	IV. Sphingolipid Turnover	96
	V. Sphingolipid Function	97
	VI. Concluding Remarks	107
	Acknowledgements	107
	References	107
6	Lipids in Algae, Lichens and Mosses	117-137
	<i>Reimund Goss and Christian Wilhelm</i>	
	Summary	117
	I. Introduction	118
	II. Lipids in Algae	118
	III. Lipids in Lichens	126
	IV. Lipids in Mosses	129
	V. Conclusions	131
	Acknowledgements	132
	References	132

7	Molecular Genetics of Lipid Metabolism in the Model Green Alga <i>Chlamydomonas reinhardtii</i>	139–155
	<i>Eric R. Moellering, Rachel Miller and Christoph Benning</i>	
	Summary	139
	I. Introduction	140
	II. General Differences in Lipid Metabolism between <i>Chlamydomonas</i> and Seed Plants	140
	III. Membrane Glycerolipid Biosynthesis	142
	IV. Fatty Acid Desaturation	147
	V. Neutral Lipid Metabolism	148
	VI. Perspectives	149
	Acknowledgements	150
	References	150
8	Lipid Biosynthesis and its Regulation in Cyanobacteria	157–177
	<i>Norihiro Sato and Hajime Wada</i>	
	Summary	157
	I. Introduction	158
	II. Characteristics of Cyanobacterial Lipids	159
	III. Biosynthesis of Lipids	161
	IV. Regulation of Lipid Biosynthesis	170
	V. Conclusions and Future Perspectives	172
	Acknowledgements	173
	References	173
9	Heterocyst Envelope Glycolipids	179–202
	<i>Koichiro Awai, Sigal Lechno-Yossef and C. Peter Wolk</i>	
	Summary	179
	I. Introduction	180
	II. Chemical Structure of the Heterocyst Envelope Glycolipids	180
	III. Physiological Role of the Heterocyst Envelope Glycolipids	181
	IV. Deposition of the Heterocyst Envelope Glycolipids	183
	V. Biosynthetic <i>hgl</i> Genes; Predicted Heterocyst Envelope Glycolipid Biosynthetic Pathway	184
	VI. Regulation of Heterocyst Envelope Glycolipid Biosynthesis	186
	VII. The Organization of <i>hgl</i> Genes Resembles that of Polyunsaturated Fatty Acid-Biosynthetic Genes and Has Been Found in Only One Cyanobacterium that Does Not Form Heterocysts	188
	VIII. Are Heterocyst Envelope Glycolipid Biosynthetic Domains Distinguishable from those of Other Polyketide Synthases?	190
	IX. Perspectives	194
	Acknowledgements	198
	References	198

10	Lipids in the Structure of Photosystem I, Photosystem II and the Cytochrome b_6f Complex	203–242
	<i>Jan Kern, Athina Zouni, Albert Guskov and Norbert Krauß</i>	
	Summary	204
	I. Introduction	204
	II. Lipids Localized in the Structural Models	208
	III. Functions of Lipids	225
	IV. Conclusions and Perspectives	237
	Acknowledgements	237
	References	237
11	The Role of Phosphatidylglycerol in Photosynthesis	243–263
	<i>Hajime Wada and Naoki Mizusawa</i>	
	Summary	243
	I. Introduction	244
	II. Biosynthesis of Phosphatidylglycerol	245
	III. Phosphatidylglycerol in Photosynthetic Membranes	247
	IV. The Role of Phosphatidylglycerol in Photosynthesis	250
	V. The Role of Phosphatidylglycerol in Non-Photosynthetic Processes	256
	VI. Conclusions and Future Perspectives	258
	Acknowledgements	258
	References	258
12	The Role of Glycolipids in Photosynthesis	265–282
	<i>Peter Dörmann and Georg Hölzl</i>	
	Summary	265
	I. Introduction	266
	II. Glycoglycerolipids in Photosynthetic Membranes	266
	III. Enzymes Involved in Glycoglycerolipid Biosynthesis	267
	IV. The Role of MGDG, DGDG and SQDG in Oxygenic Photosynthesis	270
	V. The Role of Glycoglycerolipids in Anoxygenic Photosynthesis	277
	VI. Conclusions	278
	References	278
13	Role of Lipids in the Dynamics of Thylakoid Membranes	283–294
	<i>Conrad W. Mullineaux and Helmut Kirchhoff</i>	
	Summary	283
	I. Introduction	284
	II. Methods for Measuring Thylakoid Membrane Dynamics	284
	III. Lipid and Protein Mobility in Thylakoid Membranes	287
	IV. Effects of Lipid Composition on Membrane Fluidity and Tolerance of Low Temperatures	291
	V. Importance of Lipids for Creating Diffusion Space for Proteins and Plastoquinone	292
	Acknowledgements	293
	References	293

14	Architecture of Thylakoid Membrane Networks	295–328
	<i>Reinat Nevo, Silvia G. Chuartzman, Onie Tsabari, Ziv Reich, Dana Charuvi and Eyal Shimoni</i>	
	Summary	295
	I. Introduction	296
	II. Techniques in Electron Microscopy of Plant Samples	297
	III. Thylakoid Network Organization in Cyanobacteria and Algae	300
	IV. Thylakoid Networks of Higher Plants	307
	V. Concluding Remarks	319
	Acknowledgements	320
	References	320
15	Regulatory Role of Membrane Fluidity in Gene Expression	329–348
	<i>Dmitry A. Los and Vladislav V. Zinchenko</i>	
	Summary	329
	I. Introduction	330
	II. Modulation of Membrane Fluidity	330
	III. Perception of Membrane Rigidification	334
	IV. Perception of Membrane Fluidization	339
	V. Multifunctional Sensors	341
	VI. Conclusions and Perspectives	342
	Acknowledgements	343
	References	343
16	Lipid Trafficking in Plant Photosynthetic Cells	349–372
	<i>Juliette Jouhet, Emmanuelle Dubots, Eric Maréchal and Maryse A. Block</i>	
	Summary	349
	I. Introduction	350
	II. Lipid Trafficking Involved in Formation of Chloroplast Lipids	351
	III. Lipid Trafficking Induced by Phosphate Deprivation	355
	IV. Molecular Mechanisms Involved in Lipid Trafficking	357
	V. Conclusions	367
	Acknowledgements	367
	References	367
17	Regulatory Roles in Photosynthesis of Unsaturated Fatty Acids in Membrane Lipids	373–388
	<i>Suleyman I. Allakhverdiev, Dmitry A. Los and Norio Murata</i>	
	Summary	373
	I. Introduction	374
	II. Engineered Decreases in Unsaturation of Fatty Acids in Membrane Lipids in <i>Synechocystis</i>	375
	III. Engineered Increases in Unsaturation of Fatty Acids in Membrane Lipids in <i>Synechococcus</i>	379
	IV. Modulation of Unsaturation of Fatty Acids in Membrane Lipids in Higher Plants	380

V. Conclusions	384
Acknowledgements	385
References	385

18 Oxidation of Membrane Lipids and Functions of Oxylipins 389-405

John Browse

Summary	389
I. Introduction	390
II. Chemical and Enzymatic Pathways of Oxylin Synthesis	390
III. The Synthesis and Function of Jasmonate in Higher Plants	393
IV. Conclusions and Perspectives	401
Acknowledgements	401
References	401

19 Biosynthesis and Biotechnology of Seed Lipids 407-444

Including Sterols, Carotenoids and Tocochromanols
Knut Meyer and Anthony J. Kinney

Summary	407
I. Introduction	408
II. Sterols	409
III. Carotenoids	412
IV. Tocochromanols	418
V. Acyl Lipids	422
References	436

20 Advanced Mass Spectrometry Methods for Analysis 445-461

of Lipids from Photosynthetic Organisms
Bettina Seiwert, Patrick Giavalisco and Lothar Willmitzer

Summary	445
I. Introduction	446
II. Lipid Extraction	447
III. Chromatographic Methods for Lipid-Class Separation	447
IV. Mass-Spectrometry-Based Lipid Analysis	451
V. Qualification and Quantification	457
VI. Outlook	458
References	459
