

CONTENTS

1	Birds as Flying Machines	1
	Position in the Animal Kingdom	2
	The Bird as a Flying Machine	2
2	The Kinds of Birds	8
	Nomenclature	8
	Criteria of Relationships	11
	A Survey of Birds of the World	17
3	Skin, Scales, Feathers, and Colors	27
	The Skin of Birds	27
	Beaks, Scales, and Claws	30
	Feathers	32
4	Bones and Muscles	58
	The Axial Skeleton	59
	The Appendicular Skeleton	63
	Muscles	65
5	Brain, Nerves, and Sense Organs	72
	The Nervous System	73
	Sense Organs	76
6	Food, Digestion, and Feeding Habits	94
	Anatomy of the Digestive Tract	94
	Digestion	99
	Optimal Foraging and Feeding Habits	100

7	Blood, Air, and Heat	119
	The Circulatory System	119
	The Respiratory System	123
	Energy Metabolism	131
8	Excretion, Reproduction, and Photoperiodism	142
	Excretion	142
	Reproduction	144
	Photoperiodism	161
9	Behavior	171
	Innate Behavior	174
	Learned Behavior	185
10	Social Behavior	194
	Bird Aggregations	201
	Collective Behavior	203
	Social Facilitation	204
	Social Organization	206
11	Songs, Calls, and Other Sounds	212
	The Function of Voice	214
	Bird Vocabularies	216
	Sound-making Apparatus	219
	Nonvocal Sounds	222
	The Nature of Song	224
	The Ecology of Song	225
	Cycles in Song	227
	The Inheritance and Learning of Song	231
	Song Populations	234
12	Territory	239
	History of the Territory Concept	239
	Functions of Territory	241
	Types of Territory	244
	Facilities Provided by Territories	246
	Shapes and Sizes of Territories	247
	Defense of Territory	251
	Faithfulness to Territory	255

13	Courtship and Mating Habits	258
	Pair Formation 260	
	Meaning of Courtship Display 266	
	Sexual Dimorphism and Courtship 267	
	Varieties of Courtship Display 272	
	Symbolic Courtship Rites 280	
14	Nests	284
	Functions of Nests 284	
	Evolution of Nests 285	
	Choice of Nest Site 287	
	Height of Nests Above Ground 291	
	Colonial Nesting 292	
	Protective Nesting Associations 294	
	Forms of Nests 295	
	Multiple Nests 300	
	Sizes of Nests 301	
	Materials Used in Nest Building 302	
	Nest-building Behavior 307	
15	Eggs	314
	Formation of the Egg 315	
	Size, Shape, Texture, and Porosity of Eggs 317	
	Colors of Eggs 319	
	The Time of Laying 321	
	Clutch Size 323	
	Multiple and Replacement Clutches 329	
16	Incubation and Brood Parasitism	331
	Incubation Behavior 331	
	Brood Patches 335	
	Incubation Temperatures 336	
	Incubation Patterns 339	
	Brood Parasitism 344	
	Incubation Periods 349	
	Hatching 351	
17	The Care and Development of Young	355
	Feeding the Young 357	
	Nest Sanitation 367	
	Brooding the Young 369	
	Defense of Young 371	

Development of Young	373
Duration of the Nestling Period	377
Education of the Young	377

18 The Numbers of Birds and Their Regulation 380

Longevity	382
Population Stability	382
Population Densities	385
Predation	386
The Role of Competition	391
The Roles of Climate, Weather, and Accidents	392
Parasites and Diseases	395
Chances of Survival	400
Fluctuations in Populations	405

19 The Ecology of Birds 409

Physical Factors of Environment	410
Biological Factors of Environment	419
Carrying Capacity and Limiting Factors	427
Major Types of Habitats	428
Altitude and Latitude	434
Habitat Interspersion and Edge Effect	434
Succession	436

20 The Geography of Birds 438

Descriptive Bird Geography	439
Dynamic Bird Geography	447
Active Bird Dispersal	448
Passive Bird Dispersal	451
Barriers and Routes of Dispersal	453
Historical Bird Geography	462

21 Flight 467

Origin of Flight	467
Physical Principles of Flight	468
Birds as Flying Machines	470
Adaptive Structure of Wings	472
Functions of Wings	473
Gliding and Soaring Flight	476
Flapping Flight	479
Flying Speeds, Distances, and Heights	483
Flightlessness	485
Walking, Swimming, and Diving	486

22	Migration and Orientation	491
	Methods of Studying Migration	492
	Advantages of Migration	493
	Origins of Migration	495
	Patterns of Migration	497
	Mechanics of Migration	504
	Weather and Migration	508
	Timing of Migration	512
	Preparation for Migration	514
	Orientation and Navigation	518
23	The Origin and Evolution of Birds	530
	Archaeopteryx	531
	Speciation—The Mechanism of Evolution	543
	The Roles of Competition and Predation	553
	Kin Selection	557
24	Birds and Man	559
	Food and Other Products from Birds	560
	Other Material Benefits to Man	560
	Birds in Esthetics, the Supernatural, and Recreation	563
	Birds in Conflict with Man	564
	The Control of Problem Birds	567
	Man's Destruction of Birds	568
	Man's Pollution of the Environment	570
	The Effects of Pesticides on Birds	571
	Human Satellites as Predators and Competitors	575
	Extinct and Endangered Species of Birds	576
	The Preservation and Restoration of Endangered Species	578
