

CONTENTS

<i>Preface</i>	xi	CHAPTER 4 Bone	43
<i>Acknowledgments</i>	xiii	Overview	43
<i>About the Authors</i>	xv	General features of bone	44
CHAPTER 1 Epithelium	1	Organization of bone	46
Overview	1	Development of bone	48
Characteristics of epithelia	2	Maintenance of bone	50
Classification of epithelia	6	Study questions	52
Simple epithelia	8	Answers	53
Stratified epithelia	10	CHAPTER 5 Muscle Tissue	55
Functions of epithelia	12	Overview	55
Exocrine glands	14	Skeletal muscle	56
Specialized epithelial cells	14	Cardiac muscle	62
Study questions	16	Smooth muscle	64
Answers	17	Study questions	66
CHAPTER 2 Connective Tissue Proper	19	Answers	67
Overview	19	CHAPTER 6 Nervous Tissue	69
Characteristics and functions of connective tissues	20	Overview	69
Cells of connective tissues—permanent residents	22	Neuronal structures	70
Cells of connective tissue—transient cells	24	Neuronal activities	74
Extracellular matrix	26	Glial cells	78
Classification of connective tissue proper	30	Organization of the nervous system	80
Study questions	32	Support tissues of the central nervous system	82
Answers	33	Development of nervous tissue and reactions to injury	84
CHAPTER 3 Cartilage	35	Study questions	86
Overview	35	Answers	87
General features of cartilage	36	CHAPTER 7 Cardiovascular System	89
Types of cartilage	36	Overview	89
Growth, repair, and disease	38	Heart	90
Study questions	40	Blood vessels	92
Answers	41	Arteries and arterioles	94
		Exchange system	96
		Venules and veins	98
		Specialized vascular connections	98
		Lymphatics	98
		Angiogenesis	98
		Study questions	100
		Answers	101

CHAPTER 8	Blood and Hematopoiesis	103	CHAPTER 12	Digestive System	171
	Overview	103		Overview	171
	Overall composition of blood	104		Organs of the digestive system	172
	Red blood cells	106		Organization of the gastrointestinal tract	172
	White blood cells	110		Oral cavity	174
	Platelets	114		Salivary glands	176
	Hematopoiesis	116		Esophagus	176
	Study questions	122		Stomach	178
	Answers	123		Small intestine	182
CHAPTER 9	Immune System	125		Large intestine	186
	Overview	125		Pancreas	188
	Responses of the immune system	126		Liver and gallbladder	190
	Properties of the innate immune system	126		Study questions	194
	Properties of the acquired immune system	128		Answers	196
	Examples of adaptive immune responses	132	CHAPTER 13	Urinary System	197
	Thymus	134		Overview	197
	Hematopoietic Bone marrow and B-cell development	134		Anatomy of the kidney	198
	Lymph nodes and nonencapsulated lymphatic tissue	136		Nephron and collecting ducts	198
	Spleen	140		Juxtaglomerular apparatus	202
	Study questions	142		Renal blood supply	204
	Answers	143		Extrarenal collecting system	206
CHAPTER 10	Respiratory System	145		Study questions	208
	Overview	145		Answers	209
	Conducting division	146	CHAPTER 14	Endocrine System	211
	Bronchial tree	150		Overview	211
	Respiratory division	152		Endocrine signaling	212
	Interalveolar septa	154		Pituitary gland	214
	Study questions	157		Anterior pituitary gland	216
	Answers	158		Posterior pituitary gland	218
CHAPTER 11	Skin	159		Disorders of pituitary function	218
	Overview	159		Thyroid gland	220
	Epidermis	160		Parathyroid glands	222
	Dermal-epidermal junction	162		Pineal gland	222
	Dermis and hypodermis	164		Adrenal glands	224
	Vascular supply	164		Disorders of adrenal gland function	226
	Innervation	164		Diffuse neuroendocrine system	228
	Epidermal appendages	166		Adipose tissue	228
	Study questions	168		Study questions	230
	Answers	169		Answers	232

CHAPTER 15 Female Reproductive System	233	CHAPTER 17 Final Examination	263
Overview	233	Study Questions	263
Ovary	234	Answers	276
Uterine tubes	238		
Uterus	240		
Placenta	244	<i>Index</i>	283
Vagina	244		
Mammary glands	246		
Study questions	248		
Answers	250		
CHAPTER 16 Male Reproductive System	251		
Overview	251		
Testis	252		
Extratesticular genital ducts	256		
Accessory sex glands	258		
Penis	258		
Study questions	260		
Answers	261
