

Contents

PART I	<i>Fundamentals of Biology</i>	
CHAPTER 1	The Basic Structure of Science	3
	1.1 The Methods of Science 1.2 Biology as a Science 1.3 The Significance of Evolution 1.4 Organization of Life	
CHAPTER 2	The Chemistry of Life: An Inorganic Perspective	12
	2.1 Atoms, Molecules, and Chemical Bonding 2.2 Chemical Reactions and the Concept of Equilibrium 2.3 Colligative Properties of Solutions 2.4 The Laws of Thermodynamics 2.5 The Special Case of Water 2.6 Maintaining Stable pH in Living Systems	
CHAPTER 3	The Chemistry of Life: The Organic Level	28
	3.1 Introduction 3.2 Carbohydrates 3.3 Proteins 3.4 Structure and Functions of Lipids 3.5 The Chemical Basis of Living Systems	
PART II	<i>Biology of the Cell</i>	
CHAPTER 4	The Cellular Organization of Life	43
	4.1 The Cell Doctrine 4.2 Cellular Organization 4.3 Cellular Organelles 4.4 Plant and Animal Cells: Tissue Organization 4.5 Cell Size and Its Constraints 4.6 Movement Into and Out of the Cell	
CHAPTER 5	Energy Transformations	60
	5.1 Energy and Life 5.2 Thermodynamics 5.3 Cell Metabolism 5.4 Bioenergetics	
CHAPTER 6	Photosynthesis	79
	6.1 An Overall View 6.2 The Light Reaction 6.3 The Dark Reaction (Calvin-Benson Cycle) 6.4 Photorespiration 6.5 The C ₄ Pathway 6.6 Structure and Function in the Chloroplast	
PART III	<i>Genetics and Inheritance</i>	
CHAPTER 7	The Nature of the Gene	93
	7.1 The Concept of Information Processing in the Cell 7.2 The Search for the Chemical Bases of Inheritance 7.3 Encoding Information—The Language of the Gene 7.4 Processing the Information—Protein Synthesis 7.5 Reproduction of Information—DNA Replication 7.6 Modification of Information—Mutation 7.7 Genetic Engineering	

CHAPTER 8	Cell Reproduction	110
	8.1 Cell Cycles and Life Cycles 8.2 The Chromosomes as Packaged Genes 8.3 Mitosis 8.4 Meiosis 8.5 A Possible Mechanism for Crossing Over 8.6 Sexual Reproduction and Genetic Variability	
CHAPTER 9	The Mechanism of Inheritance	124
	9.1 Pre-Mendelian Concepts 9.2 Mendel's Laws 9.3 Linkage 9.4 Mapping the Chromosomes 9.5 Sex Linkage 9.6 Variations in Gene Expression 9.7 Chromosomes and Gene Expression 9.8 Treating Genetic Diseases	
CHAPTER 10	Control Mechanisms in Genetics	139
	10.1 The Operon Hypothesis 10.2 Cistron, Recon, and Muton 10.3 Gene Regulation in Eukaryotes 10.4 Cancer as a Genetic Aberration	
CHAPTER 11	Embryology	150
	11.1 Animal Development 11.2 Human Development 11.3 Plant Development 11.4 Control of Differentiation 11.5 Major Contributions to the Field of Embryology	
CHAPTER 12	Animal Reproduction	166
	12.1 An Evolutionary Survey 12.2 Male Reproductive System in Humans 12.3 Female Reproductive System in Humans 12.4 Sexual Response in Humans 12.5 Contraception 12.6 Sexual Preference 12.7 Sexual Dysfunction	
PART IV	Plant Biology	
CHAPTER 13	Basic Structure and Function in Vascular Plants	181
	13.1 Plant Nutrition 13.2 Movement of Water and Minerals in Xylem 13.3 Movement of Food Through the Phloem	
CHAPTER 14	Interactions of Vascular Plants with their Environment	196
	14.1 Tropisms 14.2 Plant Hormones 14.3 Photoperiodism 14.4 Plant Diseases	
PART V	Animal Biology	
CHAPTER 15	Homeostasis: Regulation of Physiological Functions	207
	15.1 Overview 15.2 Feedback Control 15.3 Regulation of Temperature 15.4 Regulation of Blood Sugar	
CHAPTER 16	Animal Nutrition and the Digestive System	217
	16.1 Food Procurement 16.2 Digestion and Absorption 16.3 The Vertebrate Liver 16.4 Diet and Health 16.5 Special Case of the Vitamins 16.6 Obesity and Eating Disorders 16.7 Deficiency Diseases	

CHAPTER 17 The Excretory System	236
17.1 Excretion in Invertebrates 17.2 Structure of the Vertebrate Kidney 17.3 Functioning of the Vertebrate Kidney 17.4 Human Kidney Function 17.5 Homeostatic Function of the Kidney 17.6 Accessory Excretory Structures	
CHAPTER 18 The Circulatory System	249
18.1 Comparative Cardiovascular Systems of Vertebrates 18.2 The Human Heart 18.3 Arteries, Veins, and Capillaries 18.4 Control of Blood Pressure 18.5 Constituents of Blood and Lymph 18.6 Osmoregulation	
CHAPTER 19 Immunology	265
19.1 The Human Immune Systems 19.2 The Immune Response 19.3 Hybridomas 19.4 AIDS 19.5 Human Blood Groups	
CHAPTER 20 The Respiratory System	275
20.1 Mechanisms of External Respiration 20.2 Mammalian Respiration 20.3 Regulation of Breathing 20.4 Exchange of O ₂ and CO ₂ in the Blood	
CHAPTER 21 Hormones and the Endocrine System	286
21.1 Early Endocrine Systems 21.2 Vertebrate Endocrine Systems 21.3 Mode of Action of Hormones	
CHAPTER 22 The Nervous System	303
22.1 Overview 22.2 Phylogenetic Development of the Nervous System 22.3 The Neuron as the Functional Unit of Nervous Activity 22.4 The Neural Impulse 22.5 The Synapse 22.6 Reflex Arc 22.7 Receptors and Effectors 22.8 Special Sense Organs 22.9 Brain and Spinal Cord 22.10 Autonomic Nervous System	
CHAPTER 23 The Musculoskeletal System: Support and Movement	321
23.1 Invertebrate Support Systems 23.2 The Vertebrate Endoskeleton 23.3 Anatomy and Physiology of Vertebrate Muscle	
CHAPTER 24 Animal Behavior	333
24.1 What Is Behavior? Components of Behavior 24.2 Cyclic Behavior Patterns 24.3 Sexual Behavior 24.4 Social Organization 24.5 Modes of Communication 24.6 Biological Determinism and Behavior	
PART VI Evolution and Ecology	
CHAPTER 25 Evolution: The Process	345
25.1 A Brief History of the Concept of Change in Organisms 25.2 The Notion of a Gene Pool: Hardy-Weinberg Equilibrium 25.3 Natural Selection: A Modern Synthesis 25.4 Punctuated Equilibrium 25.5 Molecular Biology of Evolutionary Change 25.6 Control of Gene Pools 25.7 Speciation 25.8 Microevolution versus Macroevolution	

CHAPTER 26 Ecology	357
26.1 Anatomy of an Ecosystem 26.2 Types of Ecosystems 26.3 Stability and Ecological Succession 26.4 Biomass and Species Dispersal 26.5 Upsetting the Stability of an Ecosystem	
CHAPTER 27 Origin of Life	370
27.1 The Oparin Hypothesis 27.2 Heterotroph to Autotroph 27.3 Origin of Cells	
PART VII Biological Diversity	
CHAPTER 28 The Kingdom Monera (The Prokaryotes)	379
28.1 Archaeobacteria and Eubacteria 28.2 The Significance and Origin of Organelles 28.3 Bacteria, the Ecosphere, and Human Interactions	
CHAPTER 29 The Kingdom Protista	385
29.1 Protozoans 29.2 Algal Protists 29.3 Fungilike Protists	
CHAPTER 30 The Kingdom Fungi	395
30.1 Basic Structure of Fungi 30.2 Divisions of Fungi 30.3 Reproductive Strategies of the Fungi 30.4 Fungi as Friends and Foes	
CHAPTER 31 The Kingdom Plantae	403
31.1 Bryophytes and the Challenge of a Terrestrial Environment 31.2 The Vascular Plants 31.3 Seed Plants 31.3 Economic Importance of Plants 31.4 The Green Revolution	
CHAPTER 32 The Kingdom Animalia	413
32.1 Subkingdom Parazoa: The Sponges 32.2 Radiata: Cnidaria and Ctenophora 32.3 Bilateria: Deuterostomes and Protostomes 32.4 Acoelomates 32.5 Pseudocoelomates: Rotifera and Nematoda 32.6 Protostome Coelomates 32.7 Deuterostome Coelomates	
CHAPTER 33 The Primates	430
33.1 Primate Lineages 33.2 Primate Characteristics 33.3 Humankind and its Destiny 33.4 Misconceptions of the Evolutionary Relationship Between Humans and Apes	
Glossary	439
A Biological Lexicon	449
Name Index	451
Subject Index	453
