About the Authors x

Preface xii

1	What Is Plant Biology?	1
2	The Nature of Life	13
3	Cells	29
4	Tissues	53
5	Roots and Soils	64
6	Stems	84
7	Leaves	103
8	Flowers, Fruits, and Seeds	124
9	Water in Plants	146
10	Plant Metabolism	162
11	Growth	189
12	Meiosis and Alternation of Generations	213
13	Genetics	222
14	Plant Breeding and Propagation	245
15	Evolution	265
16	Plant Names and Classification	280
17	Domain (Kingdom) Bacteria, Domain (Kingdom) Archaea, and Viruses	294
18	Kingdom Protista	318
19	Kingdom Fungi	348
20	Introduction to the Plant Kingdom: Bryophytes	373
21	The Seedless Vascular Plants: Ferns and Their Relatives	388
22	Introduction to Seed Plants: Gymnosperms	413
23	Seed Plants: Angiosperms	432
24	Flowering Plants and Civilization	452
25	Ecology	478
26	Biomes	503
Appendix 1	Scientific Names of Organisms Mentioned in the Text	515
Appendix 2	Biological Controls	534
Appendix 3	Useful and Poisonous Plants, Fungi, and Algae	541
Appendix 4	House Plants and Home Gardening	566
Appendix 5	Metric Equivalents and Conversion Tables	590
Glossary		592

Index		607

About the Authors x

Preface xii

1 What Is Plant Biology? 1

Chapter Outline 1
 Overview 2
 Some Learning Goals 2
 The Relationship of Humans to Their Environment 4
 Botany as a Science 7
 Diversification of Plant Study 8
 Plant Sciences Inquiry: Plant Biology and the Internet 10
 Summary 10
 Review Questions 12
 Discussion Questions 12
 Additional Reading 12

2 The Nature of Life 13

Chapter Outline 13
 Overview 14
 Some Learning Goals 14
 Attributes of Living Organisms 14
 Chemical and Physical Bases of Life 15
 Summary 27
 Review Questions 28
 Discussion Questions 28
 Additional Reading 28

3 Cells 29

Chapter Outline 29
 Overview 30
 Some Learning Goals 30
 Cells 30
 Eukaryotic versus Prokaryotic Cells 33
 Cell Structure and Communication 33
 Cellular Components 36
 Cellular Reproduction 44
 Plant Sciences Inquiry: Microscapes 48
 Higher Plant Cells versus Animal Cells 50
 Summary 51
 Review Questions 52
 Discussion Questions 52
 Additional Reading 52

4 Tissues 53

Chapter Outline 53
 Overview 54
 Some Learning Goals 54
 Meristematic Tissues 54
 Tissues Produced by Meristems 55
 Summary 62
 Review Questions 63
 Discussion Questions 63
 Additional Reading 63

5 Roots and Soils 64

Chapter Outline 64
 Overview 65
 Some Learning Goals 65
 How Roots Develop 65
 Root Structure 66
 Specialized Roots 70
 Mycorrhizae 74
 Root Nodules 76
 Human Relevance of Roots 76
 Soils 77
 Plant Sciences Inquiry: Metal-Munching Plants 80
 Summary 81
 Review Questions 82
 Discussion Questions 82
 Additional Reading 82

6 Stems 84

Chapter Outline 84
 Overview 85
 Some Learning Goals 85
 External Form of a Woody Twig 85
 Origin and Development of Stems 86
 Plant Sciences Inquiry: Standing in Fields of Stone 87
 Tissue Patterns in Stems 89
 Specialized Stems 95
 Wood and Its Uses 97
 Summary 101
 Review Questions 102
 Discussion Questions 102
 Additional Reading 102

7**Leaves 103**

- Chapter Outline 103
- Overview 104
- Some Learning Goals 104
- Leaf Arrangements and Types 105
- Internal Structure of Leaves 106
- Stomata 107
- Mesophyll and Veins 108
- Specialized Leaves 110
- Autumnal Changes in Leaf Color 119
- Abscission 119
- Human and Ecological Relevance of Leaves 120
- Plant Sciences Inquiry:** Glass Cuts from Grass? 121
- Summary 122
- Review Questions 122
- Discussion Questions 123
- Additional Reading 123

8**Flowers, Fruits, and Seeds 124**

- Chapter Outline 124
- Overview 125
- Some Learning Goals 125
- Note to the Reader 125
- Differences between Dicots and Monocots 128
- Structure of Flowers 128
- Fruits 129
- Fruit and Seed Dispersal 137
- Seeds 140
- Plant Sciences Inquiry:** The Seed That Slept for 1,200 Years 143
- Summary 144
- Review Questions 145
- Discussion Questions 145
- Additional Reading 145

9**Water in Plants 146**

- Chapter Outline 146
- Overview 147
- Some Learning Goals 147
- Molecular Movement 148
- Water and Its Movement through the Plant 152
- Regulation of Transpiration 154
- Transport of Food Substances (Organic Solutes) in Solution 156
- Mineral Requirements for Growth 157

- Summary 160
- Review Questions 161
- Discussion Questions 161
- Additional Reading 161

10**Plant Metabolism 162**

- Chapter Outline 162
- Overview 163
- Some Learning Goals 163
- Enzymes and Energy Transfer 164
- Photosynthesis 164
- Note to the Reader 165
- Plant Sciences Inquiry:** Photosynthesis and Pizza 174
- Respiration 178
- Additional Metabolic Pathways 183
- Assimilation and Digestion 185
- Summary 185
- Plant Sciences Inquiry:** Greenhouse Gases and Plant Growth 186
- Review Questions 187
- Discussion Questions 188
- Additional Reading 188

11**Growth 189**

- Chapter Outline 189
- Overview 190
- Some Learning Goals 190
- Nutrients, Vitamins, and Hormones 190
- Hormonal Interactions 197
- Other Hormonal Interactions 198
- Plant Movements 198
- Photoperiodism 206
- Phytochromes and Cryptochromes 207
- A Flowering Hormone? 208
- Temperature and Growth 209
- Dormancy and Quiescence 209
- Summary 211
- Review Questions 211
- Discussion Questions 212
- Additional Reading 212

12**Meiosis and Alternation of Generations 213**

- Chapter Outline 213
- Overview 214
- Some Learning Goals 214
- The Phases of Meiosis 215
- Alternation of Generations 217

Summary 220
 Review Questions 220
 Discussion Questions 220
 Additional Reading 221

13 Genetics 222

Chapter Outline 222
 Overview 223
 Some Learning Goals 223
 Molecular Genetics 224
Plant Sciences Inquiry: The Polymerase Chain Reaction (PCR) 226
 Cytogenetics 232
 Mendelian Genetics 233
 Quantitative Traits 240
 Extranuclear DNA 240
 Linkage and Mapping 240
 The Hardy-Weinberg Law 242
 Summary 242
 Review Questions 243
 Discussion Questions 243
 Additional Reading 243

14 Plant Breeding and Propagation 245

Chapter Outline 245
 Overview 246
 Some Learning Goals 246
 Crop Plant Evolution 246
 Plant Breeding 248
 Plant Propagation 257
 Summary 263
 Review Questions 263
 Discussion Questions 264
 Additional Reading 264

15 Evolution 265

Chapter Outline 265
 Overview 266
 Some Learning Goals 266
 An Introduction to Evolution 266
 A Brief Overview of the Early Development of Evolutionary Concepts 268
 Charles Darwin 270
 Evidence for Evolution 271
 Microevolution—Evolution within Species 272
 Rates of Evolution 273
 Macroevolution—How Species Evolve 273
 The Role of Hybridization in Evolution 276

Discussion 277
 Summary 278
 Review Questions 278
 Discussion Questions 278
 Additional Reading 279

16 Plant Names and Classification 280

Chapter Outline 280
 Overview 281
 Some Learning Goals 281
 Development of the Binomial System of Nomenclature 281
 Development of the Kingdom Concept 284
 Classification of Major Groups 284
 The Species Concept 288
 A Key to Major Groups of Organisms (Exclusive of Kingdom Animalia) 289
 The Future of Plant Classification 291
 Summary 292
 Review Questions 292
 Discussion Questions 292
 Additional Reading 293

17 Domain (Kingdom) Bacteria, Domain (Kingdom) Archaea, and Viruses 294

Chapter Outline 294
 Overview 295
 Some Learning Goals 295
 Features of Domains (Kingdoms) Bacteria and Archaea 296
 Domain (Kingdom) Bacteria—The True Bacteria 299
 Human Relevance of the Unpigmented, Purple, and Green Sulfur Bacteria 299
 Class Cyanobacteriae—The Cyanobacteria (Blue-Green Bacteria) 305
 Class Prochlorobacteriae—The Prochlorobacteria 309
 Domain (Kingdom) Archaea—The Archaeobacteria 309
 Viruses 311
Plant Sciences Inquiry: Plant Viruses 312
 Viroids and Prions 315
 Summary 316
 Review Questions 317
 Discussion Questions 317
 Additional Reading 317

18 Kingdom Protista 318

- Chapter Outline 318
- Overview 319
- Some Learning Goals 319
- Features of Kingdom Protista 319
- Algae 320
 - Phylum Chlorophyta—The Green Algae 320
 - Phylum Chromophyta—The Yellow-Green Algae, Golden-Brown Algae, Diatoms, and Brown Algae 327
 - Phylum Rhodophyta—The Red Algae 332
 - Phylum Euglenophyta—The Euglenoids 335
 - Phylum Dinophyta—The Dinoflagellates 336
 - Phylum Cryptophyta—The Cryptomonads 336
 - Phylum Prymnesiophyta (Haptophyta)—The Haptophytes 337
 - Phylum Charophyta—The Stoneworts 337
- Human and Ecological Relevance of the Algae 338
- Other Members of Kingdom Protista 341
- Phylum Myxomycota—The Plasmodial Slime Molds 342
- Phylum Dictyosteliomycota—The Cellular Slime Molds 344
- Phylum Oomycota—The Water Molds 344
- Summary 346
- Review Questions 347
- Discussion Questions 347
- Additional Reading 347

19 Kingdom Fungi 348

- Chapter Outline 348
- Overview 349
- Some Learning Goals 349
- Distinctions between Kingdoms Protista and Fungi 349
- Kingdom Fungi—The True Fungi 350
- Lichens 368
- Summary 371
- Review Questions 372
- Discussion Questions 372
- Additional Reading 372

20 Introduction to the Plant Kingdom: Bryophytes 373

- Chapter Outline 373
- Overview 374
- Some Learning Goals 374
- Introduction to the Bryophytes 374

- Phylum Hepaticophyta—Liverworts 376
- Phylum Anthocerotophyta—Hornworts 380
- Phylum Bryophyta—Mosses 380
- Plant Sciences Inquiry:** Hibernating Mosses 384
- Human and Ecological Relevance of Bryophytes 385
- Summary 385
- Review Questions 386
- Discussion Questions 386
- Additional Reading 386

21 The Seedless Vascular Plants: Ferns and Their Relatives 388

- Chapter Outline 388
- Overview 389
- Some Learning Goals 389
- Phylum Psilotophyta—The Whisk Ferns 389
- Phylum Lycopphyta—The Ground Pines, Spike Mosses, and Quillworts 391
- Phylum Equisetophyta—The Horsetails and Scouring Rushes 397
- Phylum Polypodiophyta—The Ferns 401
- Fossils 408
- Summary 410
- Review Questions 411
- Discussion Questions 411
- Additional Reading 411

22 Introduction to Seed Plants: Gymnosperms 413

- Chapter Outline 413
- Overview 414
- Some Learning Goals 414
- Phylum Pinophyta—The Conifers 415
- Other Gymnosperms 420
- Human Relevance of Gymnosperms 423
- Plant Sciences Inquiry:** A Living Fossil? 428
- Summary 429
- Review Questions 430
- Discussion Questions 431
- Additional Reading 431

23 Seed Plants: Angiosperms 432

- Chapter Outline 432
- Overview 433
- Some Learning Goals 433
- Phylum Magnoliophyta—The Flowering Plants 434

Plant Sciences Inquiry: The Difference
Between "*r*" and "*x*" in Plant Life Cycles 440
Pollination Ecology 442
Herbaria and Plant Preservation 445
Summary 450
Review Questions 450
Discussion Questions 451
Additional Reading 451

24 Flowering Plants and Civilization 452

Chapter Outline 452
Overview 453
Some Learning Goals 453
Origin of Cultivated Plants 453
Selected Families of Flowering Plants 455
Dicots (Now Recognized in Two
Groups) 456
Monocots 471
Plant Sciences Inquiry: Coffee
and Caffeine 474
Summary 476
Review Questions 477
Discussion Questions 477
Additional Reading 477

25 Ecology 478

Chapter Outline 478
Overview 479
Some Learning Goals 479
Plants and the Environment 479
Life Histories 484
Natural Cycles 485
Succession 488
The Impact of Humans on Plant
Communities 493
Global Warming 493
Erosion 495

Aquifer Depletion 496
Loss of Biodiversity 496
Restoration of the Land 498
Plant Sciences Inquiry: John Muir, Father
of America's National Park System 499
Summary 500
Review Questions 501
Discussion Questions 501
Additional Reading 501

26 Biomes 503

Chapter Outline 503
Overview 504
Learning Goal 504
Major Biomes of North America 504
Plant Sciences Inquiry: Photosynthesis, Global
Warming, and Tropical Rain Forests 512
Summary 513
Review Questions 513
Discussion Questions 514
Additional Reading 514

Appendix 1 Scientific Names of Organisms Mentioned in the Text 515

Appendix 2 Biological Controls 534

Appendix 3 Useful and Poisonous Plants, Fungi, and Algae 541

Appendix 4 House Plants and Home Gardening 566

Appendix 5 Metric Equivalents and Conversion Tables 590

Glossary 592

Photo Credits 605

Index 607
